*Public Policy for Academic Quality* Vanderbilt University Press

Section 1 deals with surficial seafloor mapping and characterization. Sections 2 and 3 deal with fundamental geologic and oceanographic processes that introduce, transport, and deposit sediment particles and contaminants in the Southern California Bight.

*Auditing, Trust and Governance* HIMSS

Education and training for the library profession have changed over the decades, and this publication looks both at the past and the future of these developments at schools of library and information science as well as the role of IFLA's Section on Education and Training. The chapters cover regional developments in Europe, Asia, Africa, Australia and the Americas; special topics, such as quality assurance and case studies; and future considerations in LIS education.

*Big Data in Medical Science and Healthcare Management*  
Routledge

With the rapid development of economy and international

communication, world population mobility increase significantly. As migrating population is one of vulnerable populations to infectious diseases, strengthening monitoring system and intervention approaches will be a key factor in controlling the spread of infectious diseases. This book is intended to provide valuable information on creating effective prevention and intervention strategies of tuberculosis, taking Shenzhen, one of typical immigrant cities, as an example. Followed by overview of tuberculosis, the control strategy, diagnosis and treatment of tuberculosis, drug resistant tuberculosis, and HIV-associated tuberculosis in migrating population is introduced. In addition, application of innovative technologies, for example, internet, molecular biology, and artificial intelligence in tuberculosis control is presented. It will be a useful reference for practitioners in centers for infectious disease control and prevention, hospitals, academic institutions, as well as staff in government agencies and non-government organizations with interests in tuberculosis prevention and control.

**General Technical Report RMRS** National Academies Press

A valuable resource for students preparing for certification, registered accountants and auditors, and financial personnel in various businesses, this is the 9th updated edition of a classic auditing text. Integrating theory with practice and application, it is up-to-date with the field's recent and gradual transition from self-regulation to external auditing and supervision.

**Open and Distance Education in Asia, Africa and the Middle East** CABI

"A valuable resource for all those engaged in post-qualifying social work practice, ... It is impressive in its coverage of

contemporary social work practice across the four countries of the UK" Professor Jackie Powell, University of Southampton "The PQ landscape is complex and changing fast, so the reader will be grateful to Pat Higham and her colleagues for this clear and comprehensive analysis of PQ" Professor Mark Doel, Sheffield Hallam University. " a comprehensive introduction to social work education at post-qualifying level. It identifies the key issues qualified social workers need to consider in contemporary practice and enables them to engage in critical reflection through the development of their post-qualifying expertise." Professor John Harris, University of Warwick This core textbook provides an authoritative overview of the post-qualifying awards in social work. Written in response to recent policy and training guidelines, the book will enhance social workers' post-qualifying knowledge, skills and values within specialist areas of practice. The book will:

- Use critical self-appraisal to construct different ways of thinking about and doing social work
- Encourage reflection on their practice
- Enable social workers to build confidence in their professional identity
- Move from competence to increased capability and to expertise
- Help social workers to explore values dilemmas
- Increase social workers' knowledge for practice
- Promote learning and career development.

This book examines core assumptions about post qualifying practice - that values and relationships (including partnerships with service users) are essential to good practice, that social workers will work in diverse organisational structures and that social workers in the United Kingdom should become aware of European models of social work.

*PACFISH/INFISH Biological Opinion (PIBO)* Routledge

Promoting All-Round Education for Girls presents the history of Heep Yunn School, one of the oldest girls' schools in Hong Kong. Amalgamated from two British mission schools founded in the 1880s for destitute girls and daughters of Christian parents, and renamed Heep Yunn School in 1936, the institution has witnessed and responded to the dramatic changes of Hong Kong over the years. By the time of the outbreak of the Second World War, Heep Yunn had expanded to offer a full Chinese middle school course for girls based upon Christian principles of all-round education. The school expanded rapidly after the war and became a bilingual institution to meet the demand for English language education. Eventually English would become the primary medium of instruction soon after the introduction of nine-year universal education in 1978. Heep Yunn strives to provide a full-fledged all-round education in the midst of political and education reforms. The school opted to switch its status from a government-aided school to a direct subsidy scheme school in the early 2010s so as to retain a larger degree of autonomy. This history of Heep Yunn School documents the concerted efforts of the school council, staff, students, alumnae, and parents to achieve the evolving visions of Christian education for girls as Hong Kong grew from a colonial trading port to a global financial centre in the twenty-first century. 'Promoting All-Round Education for Girls convincingly charts the shifting purposes and practices of girls' education in Hong Kong. The text moves seamlessly between the history of the school and the wider context of Hong Kong's history. Patricia P. K. Chiu illustrates how the school's educational policy evolved according to the wider strategies and shifts that relate models of femininity and nation-building.'

—Joyce Goodman, University of Winchester 'This solidly-referenced work provides a balanced and detailed outlook on the unique, evolving features of education in Hong Kong. It shows the effects on Heep Yunn School of major historical changes in education policy and how the school has contributed to the education of girls in Hong Kong in periods of dramatic challenge like the Sino-Japanese War and the disturbances of the late 1960s.' —Ruth Hayhoe, University of Toronto  
[Earth Science in the Urban Ocean](#) Harvard Business Review Press  
 This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series, following *Open and Distance Education in Australia, Europe and the Americas* (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online, open and distance education, this book will prove particularly valuable for policy-makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

*Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2008, Part 2B, 110-1 Hearings, \* Hong Kong University Press*

This book contains a foreword by Maurice Conlon, Associate Director, Appraisal and Revalidation Lead, NHS Clinical Governance Support Team. This is an invaluable, detailed guide offering practical resources for medical professionals in the challenging role of appraiser. It assists with confidence, professionalism and competency and contains a comprehensive, up-to-date summary of the 'state of play' for appraising doctors. It also includes sample forms, contracts for guidance and links to web resources. "The Appraiser's Handbook" provides vital information for all those involved in continuing professional development in primary and secondary care. Appraisal leads and managers in primary and secondary care trusts will find it of great interest, as will clinical tutors, GP tutors and deanery educational teams. "This book aims to support appraisers in developing their skills in order to ensure that the doctor whom they appraise, gains the maximum possible benefit from the time spent in, and preparing for, the appraisal. The appraiser will find appraisees who enthusiastically embrace appraisal and those who doubt its use and place in their professional development. Different approaches may be needed to support and understand different individuals." - Nick Lyons, Susanne Caesar and Abayomi McEwen. "This book, written by a trio steeped in appraisal, is a valuable resource for appraisers. It will help doctors learning to be appraisers, and experienced appraisers. It will also help those organising appraisal, to remind them of the aims of the process. Teachers of appraisal will be able to use it to supplement and

support their curricula. I believe revalidation, when it arrives, will be the single biggest step towards improvement taken by the profession, since the introduction of the medical register. I also believe this depends upon the inclusion of appraisal within the revalidation package. Putting high-quality, developmental appraisal 'in the water' for the medical profession will bring about a whole-profession shift in terms of lifelong professional development. This book will support that aim." - Maurice Conlon, in the Foreword.

Leadership, Strategy, and Innovation: Health Care Collection (8 Items) Walter de Gruyter GmbH & Co KG

Proton and Carbon Ion Therapy is an up-to-date guide to using proton and carbon ion therapy in modern cancer treatment. The book covers the physics and radiobiology basics of proton and ion beams, dosimetry methods and radiation measurements, and treatment delivery systems. It gives practical guidance on patient setup, target localization, and treatment planning for clinical proton and carbon ion therapy. The text also offers detailed reports on the treatment of pediatric cancers, lymphomas, and various other cancers. After an overview, the book focuses on the fundamental aspects of proton and carbon ion therapy equipment, including accelerators, gantries, and delivery systems. It then discusses dosimetry, biology, imaging, and treatment planning basics and provides clinical guidelines on the use of proton and carbon ion therapy for the treatment of specific cancers. Suitable for anyone involved with medical physics and radiation therapy, this book offers a balanced and critical assessment of state-of-the-art technologies, major challenges, and the future outlook of proton and carbon ion therapy. It

presents a thorough introduction for those new to the field while providing a helpful, up-to-date reference for readers already using the therapy in clinical settings.

*Defense Health Care: Comprehensive Oversight Framework Needed to Help Ensure Effective Implementation of a Deployment Health Quality Assurance Program* Geological Society of America

Big Data in medical science – what exactly is that? What are the potentials for healthcare management? Where is Big Data at the moment? Which risk factors need to be kept in mind? What is hype and what is real potential? This book provides an impression of the new possibilities of networked data analysis and "Big Data" – for and within medical science and healthcare management. Big Data is about the collection, storage, search, distribution, statistical analysis and visualization of large amounts of data. This is especially relevant in healthcare management, as the amount of digital information is growing exponentially. An amount of data corresponding to 12 million novels emerges during the time of a single hospital stay. These are dimensions that cannot be dealt with without IT technologies. What can we do with the data that are available today? What will be possible in the next few years? Do we want everything that is possible? Who protects the data from wrong usage? More importantly, who protects the data from NOT being used? Big Data is the "resource

of the 21st century" and might change the world of medical science more than we understand, realize and want at the moment. The core competence of Big Data will be the complete and correct collection, evaluation and interpretation of data. This also makes it possible to estimate the frame conditions and possibilities of the automation of daily (medical) routine. Can Big Data in medical science help to better understand fundamental problems of health and illness, and draw consequences accordingly? Big Data also means the overcoming of sector borders in healthcare management. The specialty of Big Data analysis will be the new quality of the outcomes of the combination of data that were not related before. That is why the editor of the book gives a voice to 30 experts, working in a variety of fields, such as in hospitals, in health insurance or as medical practitioners. The authors show potentials, risks, concrete practical examples, future scenarios, and come up with possible answers for the field of information technology and data privacy.

### Bank Publications

At the start of the 21st century, fighting poverty and protecting the environment are two of the most urgent challenges facing the international community. Environmental changes will jeopardize people's survival to an even greater extent in the future, and will hit the poor hardest. To meet these challenges, it will be essential to breathe new life into the partnership between industrialized and developing countries. It will be equally essential to combine poverty reduction with environmental protection in an integrated policy structure spanning all levels from local to global. In this report, the German Advisory Council on Global Change (WBGU) shows that global environmental policy is a prerequisite for global poverty reduction. WBGU analyses the relevant policy processes and delivers recommendations charting the way forward. 'With its interdisciplinary approach, providing a complex and systematic analysis of the poverty-environment nexus, WBGU's latest report breaks new ground. Indira Gandhi's old, convenient maxim was 'Poverty is the biggest polluter'. Put forward at the 1972 UN Conference on the Human Environment in Stockholm, it has been sorely misused ever since to override environmental precaution and prioritize economic development strategies instead. The new WBGU report maps out a way to shape a coherent environment and development policy. This report revitalizes the Rio spirit and gives it a robust scientific base'. Prof Dr Ernst Ulrich von Weizsäcker, Member of the German Bundestag (MdB)

### Proton and Carbon Ion Therapy CRC Press

This book provides readers with the comprehensive insights of the recent research breakthroughs in additive, subtractive, and hybrid technologies. Further, the book examines incomparable

design and manufacturing independences, as well as strategies to upgrade the product performance characteristics through collaborating additive and subtractive technologies. Indeed, the intrinsic benefits and limitations of both additive and subtractive manufacturing technologies could be merged to obtain appreciable hybridizations. The editorial team members and contributors to Additive, Subtractive, and Hybrid Technologies are highly motivated experts committed to and the advance of hybrid manufacturing technologies.

### Landmine Monitor Report Springer Nature

The reputation of corporate reporting has been in crisis. Trust in the process of financial accounting and auditing has been undermined by a series of high profile scandals involving major corporations, including Enron, Parmalat, Ahold, and Worldcom. In response, regulators and practitioners world-wide have put forward a series of initiatives to re

### **Quality Assurance and Certification in Ecotourism** DIANE Publishing

Written for academic developers, academic administrators and others responsible for promoting organizational change, *Evaluating the Effectiveness of Academic Development* shares best practice advice and frameworks for evaluation and monitoring.

### *The Principles and Practice of Auditing* Springer Nature

Over the last decade the structure of higher education in most countries has undergone significant change brought about by social demands for expanded access, technological developments, and market forces. In this period of change the traditional concerns with access and cost have been

supplemented by a new concern with academic quality. As a consequence, new public policies on academic quality and new forms of academic quality assurance have rapidly emerged and swiftly migrated across continents and around the globe. The growing public debate about academic quality assurance within and across countries however has not always been well informed by analyses of the strengths and weaknesses of these new policy instruments. The Public Policy for Academic Quality Research Program (PPAQ) was designed to provide systematic analyses of innovative external quality assurance policies around the world. This volume presents the fourteen analyses of national policies on academic quality assurance conducted as part of the PPAQ Research Program utilizing the knowledge of informed international scholars. Each policy analysis examines the policy goals, implementation problems, and impacts of these newly developed national quality assurance instruments. The book concludes with an assessment of the lessons learned from these collected policy analyses and outlines the framework conditions that appear essential for assuring academic standards in the university sector.

*PEPFAR Implementation* Human Rights Watch

Genuine ecotourism can have many positive impacts, particularly the conservation of biodiversity and cultural heritage and the creation of economic opportunities for local communities. While promoting these, it aims to eliminate negative impacts such as environmental degradation, cultural commoditisation and playground effects. Unfortunately, the concept is broadly misunderstood and its true definition is widely debated. It is often used as a marketing tool, with some operators taking advantage

of the ecotourism label to attract more business while behaving in environmentally irresponsible ways. This book considers the important topic of quality control and accreditation in ecotourism, describing the mechanisms that can be implemented to ensure quality in all aspects of the industry, namely protected areas, businesses, products and tour guides.

**Annual Report** SAGE

A history of the struggle among competing stakeholders in one of the oldest and most controversial experiments in US health care policy, a precursor to Obamacare. In 1993, Tennessee launched a reform initiative designed to simultaneously expand the proportion of residents with health insurance and curtail cost increases. It was guided by principles that nearly match those that guided the creation of the Affordable Care Act, also known as Obamacare. Like the ACA, TennCare used corporations, rather than a single government payer, to implement the plan, and it relied on a mix of managed care, market competition, and government regulation. While many states cut back on their Medicaid enrollments from 1993 to 2001, TennCare grew from 750,000 to 1.47 million enrollees. The state was less successful in controlling costs, however. Each major stakeholder group (the state, the managed care organizations, the providers, and the enrollees and their advocates) pushed back against parts of the state's strategy that adversely affected their interests, and they eventually dismantled the mechanisms of cost constraint. The author lays out the four stakeholder perspectives for each period in the history of TennCare and provides a link to difficult-to-access primary documents.
