Edward J. Bloustein was the president of Rutgers University, and a distinguished scholar of the law. The four essays on privacy that comprise this book were completed over a thirteen-year period, and the development of the author's thinking parallels increasing thoughtful concern about privacy in the larger society. This development is especially appropriate to discussions of privacy and the "right to know" in the current era. The author analyzes individual and group privacy as legal concepts and examines the relationship of each to the legal right of the public to be informed about, and of a publisher to publish, private or confidential information. In exploring a series of problems associated with privacy and the First Amendment, Bloustein defines individual and group privacy, distinguishing them from each other and related concepts. He also identifies the public interest in individual privacy as individual integrity or liberty, and that of group privacy as the integrity of social structure. The legal protection afforded each of these forms of privacy is illustrated at length, as is the clash between them and the constitutional guarantees of the First Amendment and the citizen's general right to know. In his final essay, Bloustein insists that the concept of group privacy is essential to a properly functioning social structure, and warns that it would be disastrous if this principle were neglected as part of an overreaction to the misuse of group confidences that characterized the Nixon era. The new opening by Nathaniel Pallone provides a fresh context for evaluating the intellectual as well as organizational contribution of Bloustein. "A notable contribution to the emerging law of privacy Bloustein has not only developed a unified theory of privacy but he has gone far to relate it to the First Amendment right to freedom of expression and to other features of our constitutional structure."-Thomas Emerson, Yale Law School Edward J. Bloustein (1925-1989) was president of Rutgers, The State University of New Jersey from 1971 until his death in 1989, where he also served as professor of law and philosophy. Bloustein was also a professor of law at New York University. Nathaniel J. Pallone, who served in the Bloustein administration, is University Distinguished Professor (Psychology), Center for Alcohol Studies, at Rutgers-The State University of New Jersey. He is the author of Criminal Behavior as well as a number of other books in the area of criminology, many of them published by Transaction.

This fifth edition of International Law: A South African Perspective is now titled Dugard's International Law: A South African Perspective, in recognition of the fact that this work is a continuation of the earlier editions written by John Dugard. The substance of the work has undergone major changes to take account of new developments both on the international legal scene and in South Africa. Dugard's International Law: A South African Perspective presents a South African perspective of international law. The basic principles of international law are described and examined with reference to the principal sources of international law. This examination, however, takes place within the context of South African law. South African state practice, judicial decisions and legislation on international law receive equal treatment with international law as it is practised and taught abroad. The present work is designed to assist judicial officers and practitioners, educate students, and guide diplomats in the intricacies of international law both at home in South Africa and abroad.

The so-called «doctrine of informed consent» is one of the most controversial and hotly-debated issues on the present-day international medico-legal scene. This study comprises an investigation of the nature, scope and application of the doctrine in the West German, English and South African legal systems as representatives of widely diverging and often conflicting approaches to the doctor's duty of disclosure. The problems relating to the informed-consent requisite and the solutions offered thereto are expounded, discussed, analysed and evaluated within the framework of case law and legal opinion in the three selected legal systems. The study concludes with a synopsis of fundamental principles of informed consent recommended for South Africa.

Introduction, by Jan Martenson.

The South African Law of Persons and Family Law Bantam

The irreparable injury rule says that courts will not grant an equitable remedy to prevent harm if it would be adequate to let the harm happen and grant the legal remedy of money damages. After surveying more than 1400 cases, Laycock concludes that this ancient rule is dead--that it almost never affects the results of cases. When a court denies equitable relief, its real reasons are derived from the interests of defendants or the legal system, and not from the adequacy of the plaintiff's

legal remedy. Laycock seeks to complete the assimilation of equity, showing that the law-equity distinction survives only as a proxy for other, more functional distinctions. Analyzing the real rules for choosing remedies in terms of these functional distinctions, he clarifies the entire law of remedies, from grand theory down to the practical details of specific cases. He shows that there is no positive law support for the most important applications of the legal-economic theory of efficient breach of contract. Included are extensive notes and a detailed table of cases arranged by jurisdiction.

Only available in paperback version ISBN 90 411 1091 7 This volume draws upon the author's own experience to highlight the complexities behind the global violations of children's rights. Analysis and description are interwoven to provide a coherent study of the international status of children and the rights which attach to this status, both for those familiar and unfamiliar with international law. The author demonstrates the potential of international law in protecting the rights of children, even in states which are restructuring their economies. To be effective, international law cannot be used in isolation and the text seeks to place the rights of the child in their cultural and historical contexts. All royalties from *The International Law on the Rights of the Child* are being donated to the International Save the Children Alliance to assist them in their work with children. 'Ms van Bueren combines skilfully an enormous amount of factual material with careful legal analysis and comment. [...] this book will rapidly become indispensable to children's rights lawyers...' C.M. Chinkin, University of Southampton 'Among numerous publications dealing with the subject of promotion and protection of the rights of the child issued up to date, G. Van Bueren's *The International Law on the Rights of the Child* is the most serious monograph in the field of international law.'

"The law of persons is a dynamic area of the law, and it is this dynamic nature that generates interest in this subject and makes it stimulating to teach and learn. Law of Persons seeks to make this subject area accessible to students, including first-year students. In the law of persons, the common law and legislation have been harmonised with the spirit, purport and objects of the Bill of Rights, while the values entrenched in the Constitution are permeating every area of the law. The greatest change in our law of persons to date has been the Children's Act 38 of 2005: it had redefined basic concepts, it has revolutionised the parent-child relationship, it has ended the labelling of children in terms of their parents' marital status and it has radically altered the legal status of unmarried fathers. Law of Persons is also available in Afrikaans, and should ideally be used in conjunction with *Personeregbronnebundel / Law of Persons Sourcebook*"--Provided by publisher.
