### **Roman Identity from the Arab Conquests to the Triumph of Orthodoxy**

University of  
Pennsylvania  
Press

Liturgical  
Subjects  
examines the  
history of the  
self in the  
Byzantine  
Empire,  
challenging  
narratives of  
Christian  
subjectivity  
that focus  
only on  
classical  
antiquity and  
the Western  
Middle Ages.

As Derek  
Krueger  
demonstrates,  
Orthodox  
Christian  
interior life  
was  
profoundly  
shaped by  
patterns of  
worship  
introduced  
and  
disseminated  
by Byzantine  
clergy.  
Hymns,  
prayers, and  
sermons  
transmitted  
complex  
emotional  
responses to  
biblical  
stories,  
particularly  
during Lent.  
Religious  
services and  
religious art  
taught  
congregants

who they were  
in relation to  
God and each  
other.  
Focusing on  
Christian  
practice in  
Constantinopl  
e from the  
sixth to  
eleventh  
centuries,  
Krueger charts  
the impact of  
the liturgical  
calendar, the  
eucharistic  
rite, hymns for  
vigils and  
festivals, and  
scenes from  
the life of  
Christ on the  
making of  
Christian  
selves.  
Exploring the  
verse of great  
Byzantine  
liturgical  
poets,  
including

Romanos the Melodist, Andrew of Crete, Theodore the Stoudite, and Symeon the New Theologian, he demonstrates how their compositions offered templates for Christian self-regard and self-criticism, defining the Christian "I." Cantors, choirs, and congregations sang in the first person singular expressing guilt and repentance, while prayers and sermons defined the collective

identity of the Christian community as sinners in need of salvation. By examining the way models of selfhood were formed, performed, and transmitted in the Byzantine Empire, Liturgical Subjects adds a vital dimension to the history of the self in Western culture.

**The Late Byzantine Romance in Context**

Routledge  
An essential, one-of-a-kind reader, this book frames,

explores, and interprets Eastern Orthodoxy through primary sources. It is the first comprehensive reader on the Eastern Orthodox Church for the English-speaking world and is accessible to readers with no prior knowledge of theology or religious history. Lively introductions and short narratives touch on anthropology, art, law, literature, music, politics,

women's studies, and a host of other areas. These texts are brought together to survey the fascinating history of the Eastern Orthodox Christian tradition-- From back cover.

**Unrivalled Influence**

Routledge 2022 Catholic Media Association second place award in mysticism From its origins in the fourth and fifth centuries, first in monastic circles and

then in wider Christian communities, the story of Mary of Egypt was wildly popular. From early Christianity through the medieval periods, from Egypt to Scandinavia, verse lives in Greek, Latin, and vernacular languages portray her as the model of repentance. Continuously venerated in the liturgy and icons of the Orthodox Churches, she is now seldom known in the West. This modern verse

life and the accompanying essay reintroduces St. Mary's extraordinary life, its theological and spiritual implications, and its remarkable depiction of gender complementarity.

**The Ashgate Research Companion to Byzantine Hagiography**

University of Pennsylvania Press This sharply honed and well-constructed work brings to the fore and explores the New

<p>Testament story regarding the woman who entered a house where Jesus was dining and anointed him with precious oil shortly before His Passion and Crucifixion. The author unveils the intricate nature of the tradition of the Church that gives the woman a voice and elucidates her backstory through its liturgical poetry, oratory, and other writings. Scholarly consideration</p>	<p>is given to all these sources in addressing questions such as: Who was this woman? Where did she come from? How did she acquire the precious oil? How did she enter into the house of Simon uninvited? How did she perceive her own bold actions? The reader will learn that in the liturgical tradition of the Orthodox Church, as found in the hymnology of Holy Week, this sinful woman is</p>	<p>shown to be an example of repentance and unconstrained love. The intricate nature of the hymns and homilies of the Orthodox Church give greater scope and application to the biblical record primarily in Greek and Syriac manuscripts, with particular attention given to the former texts, too often overshadowed by the latter. The author shares previously inaccessible</p>

texts of late antiquity such as homilies by Amphilochius of Iconium and Ephrem Graecus found here in English for the first time. This in-depth and readable study will engage those who encounter the story of the sinful woman in the living tradition of worship within the Orthodox Church, together with those who have encountered this story in Scripture, or in the course of their academic

studies. The Oxford Handbook of Religious Space BRILL Explores the exceptional roles that women played in the vibrant cultural and political life of medieval Byzantium. Drawing on a diverse range of sources, this title focuses on the importance of marriage in imperial statecraft, the tense coexistence of empresses in the imperial court, and the critical relationships of mothers and

daughters. **The Cult of St Anna in Byzantium** Oxford University Press Nature is as much an idea as a physical reality. By 'placing' nature within Byzantine culture and within the discourse of Orthodox Christian thought and practice, *Landscape, Nature and the Sacred in Byzantium* explores attitudes towards creation that are utterly and fascinatingly

different from the modern. Drawing on Patristic writing and on Byzantine literature and art, the book develops a fresh conceptual framework for approaching Byzantine perceptions of space and the environment. It takes readers on an imaginary flight over the Earth and its varied topographies of gardens and wilderness, mountains and caves, rivers and seas, and invites them

to shift from the linear time of history to the cyclical time and spaces of the sacred - the time and spaces of eternal returns and revelations. *Questions of Gender in Byzantine Society* John Wiley & Sons The imperial government over the central provinces of the Byzantine Empire was sovereign and, at the same time, apathetic, dealing effectively with a narrow set of

objectives, chiefly collecting revenue and maintaining imperial sovereignty. Outside of these spheres, action needed to be solicited from imperial officials, leaving vast opportunities for local people to act independently without legal stricture or fear of imperial involvement. In the absence of imperial intervention provincial households competed with each other for control over

community decisions. The emperors exercised just enough strength at the right times to prevent the leaders of important households in the core provinces from becoming rulers themselves. Membership in a successful household, wealth, capacity for effective violence and access to the imperial court were key factors that allowed one to act with authority. This book

examines in detail the mechanisms provincial households used to acquire and dispute authority. *The Reading Biblical-Theological of 1 Timothy 2,12 and Acts 18,26 in The Patristic Tradition: The woman's Role in the Church and in The Family with Particular Reference to The Theology Protological* BRILL The essays collected in *Christians Shaping Identity* celebrate

Pauline Allen's significant contribution to early Christian, late antique, and Byzantine studies, especially concerning bishops, heresy/orthodoxy and christology. Covering the period from earliest Christianity to middle Byzantium, the first eighteen essays explore the varied ways in which Christians constructed their own identity and that of the society around

them. A final four essays explore the same theme within Roman Catholicism and oriental Christianity in the late 19th to 21st centuries, with particular attention to the subtle relationships between the shaping of the early Christian past and the moulding of Christian identity today. Among the many leading scholars represented are Averil Cameron and Elizabeth A. Clark. *Holy Women of Byzantium*

Holy Trinity Publications The American Historical Association's Committee on Women Historians commissioned some of the pioneering figures in women's history to prepare essays in their respective areas of expertise. This volume, the second in a series of three, collects their efforts. As a counterpoint to the broad themes discussed in the first volume, Volume 2 is

concerned with issues that have shaped the history of women in particular places and during particular eras. It examines women in ancient civilizations; including women in China, Japan, and Korea; women and gender in South and South East Asia; Medieval women; women and gender in Colonial Latin America; and the history of women in the US to 1865.

Authors included are Sarah Hughes and Brady Hughes, Susan Mann, Barbara N. Ramusack, Judith M. Bennett, Ann Twinam, and Kathleen Brown. Incorporating essays from top scholars ranging over an abundance of regions, dates, and methodologies, the three volumes of *Women's History in Global Perspective* constitute an invaluable resource for anyone interested in a comprehensive overview on the latest in feminist scholarship. Coming of Age in Byzantium BRILL This volume brings together a group of international scholars, who explore many unusual aspects of the world of Byzantine women in the period 800-1200. The specific aim of this collection is to investigate the participation of women - non-imperial women in particular - in supposedly 'masculine' fields of operation. This new research across a range of disciplines attempts to provide an analysis of the activities of and attitudes towards Byzantine women in this period. Using evidence from sources as diverse as tax registers, monastic foundation documents, twelfth-century novels, historical texts, art history and the writings of women

themselves, such as the hymnographer Kassia and the historian Anna Komnene, these papers elucidate the context in which Byzantine women lived. They emphasize the variety of female experiences, the circumstances that shaped women's lives, and the ways in which individual women were perceived by their society. Contributions focus on women's dress, their participation

in the street life of Constantinople, their appearance in Byzantine fiscal documents, their monastic foundations, their engagement with entertainment at the imperial court, and the way heroines are portrayed in the Byzantine novels. Analysis of the writings of the hymnographer Kassia, the networking of Mary 'of Alania' and the ways she overcame the disadvantages of being a

foreign-born empress, and the family values reflected in Anna Komnene's *Alexiad*, draw attention to specific problems. All these aim to expand our understanding of the circumstances that shaped women's lives and expectations in the Middle Byzantine period and to analyze the range of women's experiences, the roles they played and the impact they made on society.

### **The Living Icon in Byzantium and Italy**

Routledge  
An exciting analysis of gender and sexual desire in sixth century Greek epigram that bridges classical and early Byzantine culture.

Women in Medieval Western European Culture Taylor & Francis

For an entire millennium, Byzantine hagiography, inspired by

the veneration of many saints, exhibited literary dynamism and a capacity to vary its basic forms. The subgenres into which it branched out after its remarkable start in the fourth century underwent alternating phases of development and decline that were intertwined with changes in the political, social and literary spheres. The selection of saintly heroes, an interest in depicting

social landscapes, and the modulation of linguistic and stylistic registers captured the voice of homo byzantinus down to the end of the empire in the fifteenth century. The seventeen chapters in this companion form the sequel to those in volume I which dealt with the periods and regions of Byzantine hagiography, and complete the first comprehensive

survey ever produced in this field. The book is the work of an international group of experts in the field and is addressed to both a broader public and the scholarly community of Byzantinists, medievalists, historians of religion and theorists of narrative. It highlights the literary dimension and the research potential of a representative number of texts, not only those appreciated by the

Byzantines themselves but those which modern readers rank high due to their literary quality or historical relevance. *Metaphrasis: A Byzantine Concept of Rewriting and Its Hagiographical Products* Ashgate Publishing, Ltd. Mobility and migration were not uncommon in Byzantium, as is true for all societies. Yet, scholarship is only beginning to pay attention to these

phenomena. This book presents in English translation a wide array of relevant source texts from ca. 650 to ca. 1450 originally written in medieval Greek: from administrative records, saints' lives and letters by churchmen to ego-documents by ambassadors and historical narratives by court historians. Each source text is accompanied by a detailed introduction, commentary

and further bibliography, thus making the book accessible to both scholars and students and laying the groundwork for future research on the internal dynamics of Byzantine society. *Studies in Byzantine Monasticism* Princeton University Press This book investigates issues of identity and narrativity in late Byzantine romances in a Mediterranean context, covering the chronological

span from the capture of Constantinople by the Crusaders in 1204 to the 16th century. It includes chapters not only on romances that were written and read in the broader Byzantine world but also on literary texts from regions around the Mediterranean Sea. The volume offers new insights and covers a variety of interrelated subjects concerning the narrative representation of self-

identities, gender, and communities, the perception of political and cultural otherness, and the interaction of space and time with identity formation. The chapters focus on texts from the Byzantine, western European, and Ottoman worlds, thus promoting a cross-cultural approach that highlights the role of the Mediterranean as a shared environment that facilitated communications, cultural interaction,

and the trading and reconfiguration of identities. The volume will appeal to a wide audience of researchers and students alike, specializing in or simply interested in cultural studies, Byzantine, western medieval, and Ottoman history and literature. *Christians Shaping Identity from the Roman Empire to Byzantium* Princeton University Press From the

reception of imperial ekphraseis in Hagia Sophia to the sounds and smells of the back streets of Constantinople, the sensory perception of Byzantium is an area that lends itself perfectly to an investigation into the experience of the Byzantine world. The theme of experience embraces all aspects of Byzantine studies and the Experiencing Byzantium symposium brought together

archaeologists, architects, art historians, historians, musicians and theologians in a common quest to step across the line that divides how we understand and experience the Byzantine world and how the Byzantines themselves perceived the sensual aspects of their empire and also their faith, spirituality, identity and the nature of 'being' in Byzantium. The papers in this volume

derive from the 44th Spring Symposium of Byzantine Studies, held for the Society for the Promotion of Byzantine Studies by the University of Newcastle and University of Durham, at Newcastle upon Tyne in April 2011. They are written by a group of international scholars who have crossed disciplinary boundaries to approach an understanding of experience in the Byzantine world.

Experiencing Byzantium is volume 18 in the series published by Ashgate on behalf of the Society for the Promotion of Byzantine Studies.

**Crying in the Middle Ages**

Routledge  
In obedience to Jesus' command, 'Do this in remembrance of me', the ritual repetition of the Lord's Supper down through the ages and across multiple Christian cultures in the liturgies of East and

West, has given rise, inevitably, to innumerable diversities of shape, text, cultural context, and theological interpretation, as well as to debates, sometimes heated, among modern experts as to the methodologies for resolving the problems arising from these differences. The problems of cultural history, structural, historical, and textual reconstruction , theological

interpretation, and method involved in the modern scholarly debate on these issues, are the object of the studies in this volume, dedicated to the liturgies of Byzantium, Armenia, Syria, and Palestine. **She Who Loved Much** Cambridge University Press The volume ranges from the close examination of specific objects to larger questions of their signification for the

medieval societies that fashioned them and the ways in which they have been, and are currently, interpreted. **Eastern Orthodox Christianity** Taylor & Francis This volume explores concepts of fiction in late antique hagiographical narrative in different cultural and literary traditions. It includes Greek, Latin, Syriac, Armenian, Persian and Arabic material.

Whereas scholarship in these texts has traditionally focussed on historical questions, this book approaches imaginative narrative as an inherent element of the genre of hagiography that deserves to be studied in its own right. The chapters explore narrative complexities related to fiction, such as invention, authentication, intertextuality, imagination and

fictionality. Together, they represent an innovative exploration of how these concepts relate to hagiographical discourses of truth and the religious notion of belief, while paying due attention to the various factors and contexts that impact readers' responses. Byzantine Intersectionality Routledge Byzantinists entered the study of emotion with Henry Maguire's ground-

breaking article on sorrow, published in 1977. Since then, classicists and western medievalists have developed new ways of understanding how emotional communities work and where the ancients' concepts of emotion differ from our own, and Byzantinists have begun to consider emotions other than sorrow. It is time to look at what is distinctive about

Byzantine emotion. This volume is the first to look at the constellation of Byzantine emotions. Originating at an international colloquium at Dumbarton Oaks, these papers address issues such as power, gender, rhetoric, or asceticism in Byzantine society through the lens of a single emotion or cluster of emotions. Contributors focus not only on the construction of emotions with respect to perception and cognition but also explore how emotions were communicated and exchanged across broad (multi)linguistic, political and social boundaries. Priorities are twofold: to arrive at an understanding of what the Byzantines thought of as emotions and to comprehend how theory shaped their appraisal of reality. Managing Emotion in Byzantium will appeal to researchers and students alike interested in Byzantine perceptions of emotion, Byzantine Culture, and medieval perceptions of emotion.
