From 1966 to 1971 the

First Australian Task

Force was part of the

counterinsurgency

campaign in South

Vietnam. Though

considered a small

component of the Free

World effort in the war,

these troops from

Australia and New

Zealand were in fact

the best trained and

prepared for

counterinsurgency

warfare. However, until

now, their

achievements have

been largely

overlooked by military

historians. The Search for Tactical Success in Vietnam sheds new light on this campaign by examining the thousands of small-scale battles that the First Australian Task Force was engaged in. The book draws on statistical, spatial and temporal analysis, as well as primary data, to present a unique study of the tactics and achievements of the First Australian Task Force in Phuoc Tuy Province, South Vietnam. Further, original maps throughout the text help to illustrate how the Task Force's tactics were employed.

It is nearly impossible to overestimate the significance of a professional ethos in

pedagogical situations. Most theories of education understand ethos and ethical acting as belonging to the core of the pedagogical profession. Despite this evidence, remarkably few empirical studies exist on ethos. This book has three main aims: 1) to conceptualize the pedagogical ethos at the theoretical level, 2) to operationalize it systematically, and 3) to study it empirically from the trainers' perspective but also from that of apprentices. Part 1 offers a critical discussion on different theoretical approaches of professional morality. These include theories on moral values or professional codes, virtue ethics, professional sensitivity,

moral commitment, and caring. Identified communalities are combined to form a new model of professional ethos. More intensively than other existing theories, the ethos approach presented in this book stresses the content's situational impact on decision-making and motivation. The main question guiding the instrument development, dealt with in Part 2, asks how we can distinguish professional morality from the general notion that people should be good. In order to answer this question, vocational education but also a trainer's pedagogical duties and responsibilities are discussed. Part 3 then presents the result of two empirical studies

with vocational trainers and apprentices. It offers some interesting findings for further reflection - input not only relevant for researchers but also educational institutes, professional associations, and practitioners themselves. In short: this book contributes significantly to research on professional morality as well as vocational education.
