Profits in the Stock Market Kogan Page Publishers

Most people buy a stock because they hope it will go up and they will make profits. They buy on tips, or what someone else thinks, without any concrete knowledge of their own that the stock will advance. Thus they entered the market wrong and did not recognize this mistake or attempt to correct it until too late. Finally they sell because they fear the stock will go lower and often they sell out near low levels, getting out at the wrong time, making two mistakes, getting in the market at the wrong time and getting out at the wrong time. One mistake could have been prevented: they could have gotten out right after getting in wrong. They do not realize that operating in Stocks and Commodities is a business or a profession, the same as engineering or the medical profession.

When I wrote TRUTH OF THE STOCK TAPE in 1923, it was because there was a demand for a book of that kind. People needed the help that I could give them and the benefit of my experience and knowledge. In that book I gave the best I had and received my reward. People appreciated my efforts. They bought the book then and they are still buying it. They say it is a good book and more than worth the money. That is very gratifying to me. After the 1929 bull market culminated there was a demand for a new book to meet changed conditions under the so-called "New Era," so I wrote WALL STREET STOCK SELECTOR in the spring of 1930. I gave freely of my knowledge and the benefit of years of experience. This book helped others to protect their principal and make profits. People who read the book pronounced it one of the best. It is still selling, and again I have been rewarded. No man can learn all there is to know about forecasting the trend of stocks in 3, 5, 10, or 20 years, but if he is a deep student and hard worker, he learns more and knowledge comes easier after years of experience. I knew more about determining the trend of stocks in 1923 than I did in 1911. Seven more years of experience gave me more knowledge and enabled me to write the WALL STREET STOCK SELECTOR in 1930 and give my readers the benefit of my increased knowledge. Now, after five more years have elapsed, my experience and practical test of new rules have enabled me to learn more of value since 1930. The 1929-1932 panic and what has followed since, gave me valuable experience and I have gained more knowledge about detecting the right stocks to buy and sell. I cannot lose if I pass this knowledge on to those who will appreciate it.

45 Years In Wall Street Wiley

In reading and studying Gann's novel, The Tunnel Thru the Air or Looking Back From 1940, a certain set of passages had always grabbed the author's attention and he wondered what Mr. Gann may have been referring to. This book is a result of his investigations concerning these passages, which concerns itself with what Gann calls in his novel, the Law of Harmonic Analysis. In the author's previous work, W.D. Gann: Divination By Mathematics, published in June of 2013, he pointed out that Astrology was not the main factor that Gann utilized to forecast future events. Even Gann said that in the 1919 Milwaukee Sentinel article which is analyzed in that book. In the article, Gann uses the science of letters and numbers to make predictions regarding the German Kaiser, Wilhelm Hohenzollern. In the analysis of that article, the author showed how Gann may have used cycles and geometry to forecast the specific dates and periods mentioned. In this second book, the author continues with the mathematical aspect of Gann's work, the foundation of which, is based on a couple of passages within Gann's novel, The Tunnel Thru the Air. The author shows us that Gann was indeed trying to tell us something valuable in these passages, and this book outlines the author's research & investigation into what he believes Gann was talking about, and the application of those findings. You will learn how to apply the mathematics being presented, which is explained in simple terms for the non-mathematician. Gann was consistent in saying that mathematics was the basis of his forecasting methods. The material presented in this book is consistent with what Gann has always said. It is the hope and desire of the author that this work will inspire others to continue research into Gann's work along these lines. Even Gann said that Astrology failed, that something else had to be added into the equation.

Trader Vic--Methods of a Wall Street Master John Wiley & Sons

As you know, W.D. Gann was a legendary trader. Some say he amassed a fortune in the markets. He died in 1955. He wrote several important books on trading as well as a commodity trading course and a stock market trading course. He charged \$3000 to \$5000 for the trading courses which included 6 months of personal instruction by phone. The books and courses were written in veiled language which is almost impossible to understand by the average person. I have found many successful traders used the techniques of W.D. Gann. Due to the overwhelming interest in the W.D. Gann trading techniques, I created the Gann Masters Trading Course to help traders become successful. The course was created in combination with asking large traders how they used the techniques of W.D. Gann. This was put together in an easy-to-understand course designed for the average person. The course includes dozens of charts and illustrations which were not included in the courses of W.D. Gann. The course length is 200 pages. An Excel template was also developed to help the students with master table and circle charts. It is included with the course. It has electronic versions of all the master charts including the square of 4 and 9. It is possible to extend these master charts out to infinity with the Excel template.
