Egg Grading Manual

Downsview : Ontario,
Ministry of Transportation,
Electrical Engineering
Section

Since 1958 the Maritime
Administration has
continuously conducted
instructions in use of
collision avoidance radar
for qualified U.S. seafaring
personnel and
representatives of
interested Federal and
State Agencies.Beginning
in 1963, to facilitate the
expansion of training
capabilities and at the
same time to provide the
most modern techniques
in training methods, radar
simulators were installed
in Maritime

Administration's three
region schools.It soon
became apparent that to
properly instruct the
trainees, even with the
advanced equipment, a
standardize up-to-date
instruction manual was

needed. The first manual
was later revised to serve
both as a classroom
textbook and as an
onboard reference
handbook.This newly
updated manual, the
fourth revision, in keeping
with Maritime
Administration policy, has
been restructured to
include improved and
more effective methods of
plotting techniques for
use in Ocean, Great
Lakes, Coastwise and
Inland Waters
navigation.Robert J.
