"Mardukite Chamberlains," and now accessible to the modern public for contemporary practice in an incredible new way for the first time ever. Here is an authentic cuneiform tablet collection--perhaps the very first "spellbook" of its kind on the planet--the complete account of a Mesopotamian magical tradition that forms a "grimoire" of very real and very ancient Sumerian Anunnaki magic. "The Maqlu Ritual Book" reveals materials used by magicians and

priests for thousands of years to reverse the effects of evil spells and curses, banish disease and nightmares, combat in wizards' duels, and even conjure protection and blessings of the gods to benefit the entire community! The Maqlu Ritual Tablets of Babylon... no mere "folk magic" or rural witches Book of Shadows, the Maqlu cuneiform tablet series was first in possession only of the highest orders of priest-scribes, temple-magicians, priestesses

and kings of ancient Mesopotamia--the ancient "cradle of modern human civilization." Maqlu magic was so powerful that the government of the greatest ancient empires in history employed it to ensure prosperous lands, happiness among the population, and carrying the awesome abilities to dispel chaos, evil, and malignant forces in the world--things we long for, and are in great need of, even today. Perhaps this long forgotten occult secret is the key!

INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social

evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber

and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors

show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest

that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes

 For generations, Mia's family has shaped human history to push them to the stars. The year is 1945 and now it is her turn. Her mission: to lure scientist Wernher Von Braun away from the Nazi

party and into the American rocket program, securing the future of the space race. But there is a threat. A ruthless enemy lurks behind the scenes. Sylvain Neuvel's genre-bending sci-fi thriller is a dark and gripping exploration of the amorality of progress and the nature of violence, as seen through the eyes of the women who make that progress possible and the men who are determined to stop them. Always run, never fight. Preserve the knowledge. Survive at all costs. Take

them to the stars. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. [Ancient Egyptians and Their Neighbors](#) Verso Books

 "This sweeping history of the ancient Near East (Mesopotamia, Syria, Anatolia, Iran) takes readers on a journey from the creation of the world's first cities to the conquest of Alexander the Great. The book is built around the life stories of many ancient men and women, from kings, priestesses, and merchants to bricklayers, musicians, and weavers. Their habits

of daily life, beliefs, triumphs, and crises, and the changes that they faced over time are explored through their written words and the archaeological remains of the buildings, cities, and empires in which they lived. Rather than chronicling three thousand years of kingdoms, the book instead creates a tapestry of life stories through which readers come to know specific individuals from many walks of life, and to understand their places within the broad

history of events and institutions in the ancient Near East. These life stories are preserved on ancient cuneiform tablets, which allow us to trace, for example, the career of a weaver as she advanced to become a supervisor of a workshop, listen to a king trying to persuade his generals to prepare for a siege, and feel the pain of a starving young couple who were driven to sell all four of their young children into slavery during a famine. What might seem at first glance to be a remote and

inaccessible ancient culture proves to be a comprehensible world, one that bequeathed to us many of our institutions and beliefs, a truly fascinating place to visit"-

A collector's edition of the long-lost translated cuneiform tablet collection, revealing secret underground methods to acquire direct communication with what some call "alien intelligences" via a program of ancient-styled Babylonian-inspired devotion, reviving the same techniques as ancient Mardukite priests of the Sumerian Anunnaki

in Mesopotamia. This amazing 10th Anniversary collector's edition of "The Book of Marduk by Nabu" reflects a very real modern philosophical and meta-spiritual "New Thought" movement aligned specifically with the Anunnaki paradigm. In ancient Babylon, this was famously celebrated among the followers of MARDUK--recognized among the pantheon as patron of Babylon city and self-made Anunnaki "King of the Gods" for the "Mardukite" or "Babylonian" branch of

the Mesopotamian mythos, with the assistance of the Nabu priesthood of scribes. Ten years ago, materials from "The Complete Book of Marduk by Nabu" circulated underground, serving as an early cornerstone of "Mesopotamian Neopaganism," paving the way for a decade of developmental research and experimentation by the "Mardukite Research Organization" of "Mardukite Chamberlains." Selections included in this revised

and expanded, beautifully crafted, portable hardcover Mardukite Liber-W+Z volume have also inspired many other incredible literary classics, including "The Complete Anunnaki Bible" and "The Sumerian Legacy" by Joshua Free. In commemoration of the anniversary release of a "complete" Book of Marduk by Nabu, additional portions once released separately as "The Book of Zagmuk" are also included, detailing the annual Spring Equinox Festival or Babylonian

"Akiti"/"Akitu" New Year Rituals. As an additional bonus, this special edition of a favored underground classic now includes graphic images of Mesopotamian Art that beautifully supplements key information, as reproduced from "The Anunnaki Tarot" guidebook by Joshua Free and Kyra Kaos-- forthcoming in June 2019.

A grand sweep of history by the late Fernand Braudel—one of the twentieth century's most influential historians—Memory and the Mediterranean chronicles the Mediterranean's immeasurably rich past during the foundational period from prehistory to classical antiquity, illuminating nothing less than the bedrock of our civilization and the very origins of Western culture. Essential for historians,

yet written explicitly for the general reader, this magnificent account of the ebb and flow of cultures shaped by the Mediterranean takes us from the great sea's geologic beginnings through the ancient civilizations that flourished along its shores. Moving with ease from Mesopotamia and Egypt to the flowering of Crete and the early Aegean peoples, and culminating in the prodigious achievements of ancient Greece and Rome, Braudel conveys in

absorbing detail the geography and climate of the region over the course of millennia while brilliantly explaining the larger forces that gave rise to agriculture, writing, sea travel, trade, and, ultimately, the emergence of empires. Impressive in scope and gracefully written, *Memory and the Mediterranean* is an endlessly enriching work of history by a legend in the field.

Hold out a glass and ask for &“wa-tar.&” This unique activity book for children ages nine and up shows what life was like among the Nubians, Mesopotamians, Hittites, and their neighbors the Egyptians from around 3100 B.C., when Upper and Lower Egypt became one kingdom, to the death of Queen Cleopatra under

the Romans, in 30 B.C. Projects such as building a Nubian irrigation machine, creating a Mesopotamian cylinder seal out of clay, making kilts like those worn by Egyptian boys and men, and writing in Hittite cuneiform help young readers to connect with these ancient cultures and see how profoundly they have influenced our own.

A vibrant account of how measurement has invisibly shaped our world, from ancient

civilizations to the modern day. From the cubit to the kilogram, the humble inch to the speed of light, measurement is a powerful tool that humans invented to make sense of the world. In this revelatory work of science and social history, James Vincent dives into its hidden world, taking readers from ancient Egypt, where measuring the annual depth of the Nile was an essential task, to the intellectual origins of the metric system in the French Revolution, and from the surprisingly

animated rivalry between metric and imperial, to our current age of the “quantified self.” At every turn, Vincent is keenly attuned to the political consequences of measurement, exploring how it has also been used as a tool for oppression and control. Beyond Measure reveals how measurement is not only deeply entwined with our experience of the world, but also how its history encompasses and shapes the human quest for knowledge.

From the fiery kimchi of Korea to American dill spears; from the spicy achar of India to the ceviche of Latin America; from Europe’s sauerkraut to brined herrings and chutneys, pickles are

unquestionably a global food. They are also of the moment. Growing interest in naturally fermented vegetables—pickles by another name—means that today, in the early twenty-first century, we are seeing a renaissance in the making and consumption of pickles. Across continents and throughout history, humans have relied upon pickling to preserve foods and add to their flavor. Both a cherished food of the elite and a staple of the masses, pickles have also acquired new

significance in our health-conscious times: traditionally fermented pickles are probiotic and said to possess anti-aging and anti-cancer properties, while pickle juice is believed to prevent muscle cramps in athletes and reduce sugar spikes in diabetics. Not a bene: It also cures hangovers. In *Pickles*, Jan Davison explores the cultural and gastronomic importance of pickles from the earliest civilizations' brine-makers to twenty-first-century dilettantes of dill. Join

Davison and discover the art of pickling as mastered by the ancient Chinese; find out why Korean astronaut Yi So-yeon took pickled cabbage into space in 2008; learn how the Japanese pickle the deadly puffer fish; and uncover the pickling provenance of that most popular of condiments, tomato ketchup. A compulsively consumable, globe-trotting tour sure to make you pucker, Davison's book shows us how pickles have been omnipresent in

humanity's common quest not only to preserve foods, but to create them—with relish.
