### **Global Civil Society 2007/8** LINK Ltd.

The Regional State of Coast Report for the western Indian Ocean (WIO) is the first comprehensive regional synthesis to provide insights into the enormous economic potential around the WIO, the consequential demand for marine ecosystem goods and services to match the increasing human population, the pace and scale of environmental changes taking place in the region and the opportunities to avoid serious degradation in one of the world's unique and highly biodiverse oceans.

### **Haematologica (Rome, Italy)** OECD Publishing

The divide between the West and Southeast Asia seems to be nowhere more apparent than in debates about human rights. Within these diverse geographical, political and cultural climates, human rights seem to have become relative, and the quest for absolutes seems unattainable. In this new book Philip J Eldridge seeks to question this stalemate. He argues that the Association of Southeast Asian Nations' inclusion in United Nations' human rights treaties could be the common ground that bridges the gap between East and West. Eldridge uses topical case studies and primary research from Malaysia, Indonesia, East Timor and Australia, to compare the effectiveness of United Nations' human rights directives on local democracies. This study presents insightful research into a hotly debated topic. As such it will be a thought-provoking resource for students of human rights, politics and international relations.

### **Evaluation of Australian Government Funded NGO Projects in Africa** SAGE

This Handbook provides a cutting-edge survey of the state of research on religions and global development. Part one highlights

critical debates that have emerged within research on religions and development, particularly with respect to theoretical, conceptual and methodological considerations, from the perspective of development studies and its associated disciplines. Parts two to six look at different regional and national development contexts and the place of religion within these. These parts integrate and examine the critical debates raised in part one within empirical case studies from a range of religions and regions. Different religions are situated within actual locations and case studies thus allowing a detailed and contextual understanding of their relationships to development to emerge. Part seven examines the links between some important areas within development policy and practice where religion is now being considered, including: Faith-Based Organisations and Development Public Health, Religion and Development Human rights, Religion and Development Sustainable Development, Climate Change and Religion Global Institutions and Religious Engagement in Development Economic Development and Religion Religion, Development and Fragile States Development and Faith-Based Education Taking a global approach, the Handbook covers Africa, Latin America, South Asia, East and South-East Asia, and the Middle East. It is essential reading for students and researchers in development studies and religious studies, and is highly relevant to those working in area studies, as well as a range of disciplines, from theology, anthropology and economics to geography, international relations, politics and sociology.

### **Global Civil Society 2007/8** Anu Press

The Australian Council for International Development is the peak body of Australian international development NGOs. This book explores ACFID's history since its founding in 1965, drawing on current and contemporary literature as well as extensive archival material. The trends and challenges in international development are seen through the lens of an NGO peak body: from the heady optimism of the first Development Decade of the 1960s, through the growth in government support of NGOs in the 1980s, to the challenges of the 2010s. The major themes of ACFID are

presented: human rights; gender justice; humanitarianism; NGO codes of conduct; and influencing government policy both broadly and as it relates to NGOs. Each of these themes is placed in a global context and in relation to what other NGO networks are doing internationally.

### **ACFOA Development Dossier** Commonwealth Secretariat

„What does it mean to be a good leader?“ Die Frage nach der Führungspersönlichkeit wird heute neu diskutiert. Ein fundierter Einblick in gegenwärtige Leadership-Konzepte bildet den theoretischen Rahmen, innerhalb dessen hier diese Frage mit Blick auf das konkrete Führungshandeln in sozialen Organisationen analysiert werden: Traditionelle Führungsbilder stoßen an ihre Grenzen, aktuelle Anforderungen und Organisationsmodelle zwingen, über Ziele und Governance neu nachzudenken. Auf die Zunahme von Komplexität wird mit organisationaler Professionalität reagiert und der Spielraum für Führung eingeschränkt. Helmut K. Anheier (Universität Heidelberg), Julia Evetts (University of Nottingham), Howard Gardner (Harvard University), Hans H. Hinterhuber (Universität Innsbruck), Rolf Wunderer (Universität St. Gallen) und viele andere verleihen dem Begriff Leadership Kontur.

### **Project Identification, Design and Appraisal** De Gruyter Saur

This Handbook provides a comprehensive ten-step model that will help guide development practitioners through the process of designing and building a results-based monitoring and evaluation system.

### **Sustainability and the U.S. EPA** Routledge

Sustainability is based on a simple and long-recognized factual premise: Everything that humans require for their survival and well-being depends, directly or indirectly, on the natural environment. The environment provides the air we breathe, the water we drink, and the food we eat. Recognizing the importance of sustainability to its work, the U.S. Environmental Protection Agency (EPA) has been working to create programs and applications in a variety of areas to better incorporate sustainability into decision-making at the agency. To further

strengthen the scientific basis for sustainability as it applies to human health and environmental protection, the EPA asked the National Research Council (NRC) to provide a framework for incorporating sustainability into the EPA's principles and decision-making. This framework, Sustainability and the U.S. EPA, provides recommendations for a sustainability approach that both incorporates and goes beyond an approach based on assessing and managing the risks posed by pollutants that has largely shaped environmental policy since the 1980s. Although risk-based methods have led to many successes and remain important tools, the report concludes that they are not adequate to address many of the complex problems that put current and future generations at risk, such as depletion of natural resources, climate change, and loss of biodiversity. Moreover, sophisticated tools are increasingly available to address cross-cutting, complex, and challenging issues that go beyond risk management. The report recommends that EPA formally adopt as its sustainability paradigm the widely used "three pillars" approach, which means considering the environmental, social, and economic impacts of an action or decision. Health should be expressly included in the "social" pillar. EPA should also articulate its vision for sustainability and develop a set of sustainability principles that would underlie all agency policies and programs.

*Australian Overseas Aid* OECD Publishing

In *International Development Projects: Peculiarities and Managerial Approaches*, researchers-practitioners from two of Italy's most prestigious universities provide practical insights into this phenomenon...and how the lessons learned in this high stakes international arena can help anyone managing projects that span companies, cultures and continents. Incorporating the wisdom of almost 500 experienced ID project managers, as well as the latest in academic research, this book provides an unprecedented look at the unique characteristics of ID projects, the methods being used to manage them and the specific tools and processes that most often lead to success.

**Politics of Human Rights in Southeast Asia** Routledge

The Australian Council for International Development is the peak body of Australian international development NGOs. This book explores ACFID's history since its founding in 1965, drawing on current and contemporary literature as well as extensive archival material. The trends and challenges in international development

are seen through the lens of an NGO peak body: from the heady optimism of the first Development Decade of the 1960s, through the growth in government support of NGOs in the 1980s, to the challenges of the 2010s. The major themes of ACFID are presented: human rights; gender justice; humanitarianism; NGO codes of conduct; and influencing government policy both broadly and as it relates to NGOs. Each of these themes is placed in a global context and in relation to what other NGO networks are doing internationally.

"The findings and recommendations from this evaluation suggest ways of managing the risks while optimising AusAID's engagement with civil society to achieve development results. "-- P. ix.

**Yearbook of International Organizations 2005/2006**

Kumarian Press

The annual Global Civil Society Yearbooks provide an indispensable guide to global civil society or civic participation and action around the world. The 2007/8 Yearbook focuses on the potentially powerful relationship between communication and democracy promotion. The Global Civil Society Yearbook remains the standard work on all aspects of contemporary global civil society for activists, practitioners, students and academics alike.

**Regional State of the Coast Report** World Bank Publications

This unique study from the OECD Development Centre presents a comprehensive review by independent experts of the relationships and division of responsibility between the 22 member governments of the OECD Development Assistance Committee (DAC), and NGOs from these donor countries, working in international development. Additional chapters cover the roles of the European Union and the World Bank. Among other themes, the book looks at two very significant issues. First, at the way in which an overemphasis on evaluation may be leading NGOs to focus purely on measuring their output, thus choosing activities which are easily accountable. Second, it examines the important impacts of the evolution in the funding relationship between governments and NGOs - from matching grants to contracts - where NGOs must increasingly compete for contracts.

**Papua New Guinea Sustainable Forestry and Conservation Project Design Mission** UN-HABITAT

Comprises ten papers which document "good practice" in gender

budget work from across the globe.

**Report and Recommendation of the President to the Board of Directors on a Proposed Loan and Technical Assistance Grant to the Kingdom of Cambodia for the Small and Medium Enterprise Development Program** SAGE Publications Limited

Originally published in 1986, this book evaluated the review of the Australian Overseas Aid Program (the 1984 Jackson Report) and discusses the significance of Australia's contribution to overseas aid for the future. The book focusses on the overall context of the Jackson report; discusses the geographical distribution of aid proposed by the report and examines aid administration in its more specific bureaucratic context and with broader questions of community participation in developmental processes.

*The DAC Journal* Routledge

The annual Global Civil Society Yearbooks provide an indispensable guide to global civil society or civic participation and action around the world. The 2007/8 Yearbook focuses on the potentially powerful relationship between communication and democracy promotion. The Global Civil Society Yearbook remains the standard work on all aspects of contemporary global civil society for activists, practitioners, students and academics alike.

**The Routledge Handbook of Religions and Global Development** Routledge

The journal of the OECD Development Assistance Committee. This issue presents Development Co-operation Reviews of Austria and Australia.

**Landmine Monitor Report 2000** Human Rights Watch

This landmark reference work is the first complete history of Australia and its relationship with, and role within, the United Nations. On 17 January 1946, when the United Nations Security Council held its inaugural session, an Australian representative, Norman Makin, presided. If all members adhered to the principles of the United Nations Charter, predicted Makin, the United Nations would become "a great power for the good of the world, bringing that freedom from fear, which is necessary before we can hope for progress and welfare in all lands". Australia and the United Nations traces how Australia committed itself to the United Nations project, from before the convening of the first United Nations Security Council until the eve of its election to a fifth term

on that body. The book begins with Australian involvement with the organisation that preceded the United Nations, the League of Nations. It then analyses the role played by Australian Minister for External Affairs, HV Evatt, and his staff in framing the United Nations Charter at San Francisco in 1945. Three chapters analyse Australia's diplomacy towards the Security Council, its efforts in peacekeeping, and evolving policies and attitudes towards arms control and disarmament. Two chapters discuss Australia's engagement with the United Nations' manifold specialised agencies and the role of the broader UN family in development. Another two chapters are devoted to a study of Australia's role in areas of United Nations operation only dimly foreseen by its founders at San Francisco-decolonisation and the environment. The two final chapters examine Australia's contribution to the promotion of human rights and international law and the important role it has played seeking to improve the United Nations' performance to equip it to meet new challenges in global

politics. Australia and the United Nations tells us what was done in the past, and why. It is essential reading for anyone who wants to better understand Australia's multilateral diplomacy, and our future choices.

Organization Descriptions and Cross-references Springer-Verlag  
 \* Uses an instructive historical event to show how NGOs with good intentions are sometimes capable of supporting harmful government policies \* A fascinating picture of the players involved in misguided development program In Surrogates of the State Jennings explores the delicate relationship between development NGOs and the states they work in using his exhaustive and illuminating case study of Tanzania in the 1960s and 70s. During that time Tanzania instituted the rural socialist Ujamaa program, resulting in the forced resettlement of 6 million people to villages, transforming the map of the country. Rather than questioning this policy, NGOs working in the area (as typified by Oxfam) became surrogates of the state, helping to carry out

the program. Jennings argues that the NGO community was seduced by its own interpretations of what Ujamaa represented, and was consequently blinded to the dark realities of resettlement. Bound by ideological chains of their own forging, organizations that in other contexts have criticized over-mighty states and the use of overt force, NGOs committed themselves fully to Tanzania and its development policy. Through this study, the book uncovers not just the story of development in Tanzania in this critical period, but the history of the NGO itself. And in doing so, raises questions about the future direction of this institution which has become so prominent in international development.
