With her newly completed PhD in astronomy in hand, twenty-eight-year-old Grace Porter goes on a girls' trip to Vegas to celebrate. She's a straight A, work-through-the-summer certified high achiever. She is not the kind of person who goes to Vegas and gets drunkenly married to a woman whose name she doesn't know...until she does exactly that. This one moment of departure from her stern ex-military father's plans for her life has Grace wondering why she doesn't feel more fulfilled from completing her degree. Staggering under the weight of her parent's expectations, a struggling job market and feelings of burnout, Grace flees her home in Portland for a summer in New York with the wife she barely knows. In New York, she's able to ignore all the constant questions about her future plans and falls hard for her creative and beautiful wife, Yuki Yamamoto. But when reality comes crashing in, Grace must face what she's been running from all along—the fears that make us human, the family scars that need to heal and the longing for connection, especially when navigating the messiness of adulthood.

This is a reissue of the novel inspired by Hunter S. Thompson's ether-fuelled, savage journey to the heart of the American Dream: We were somewhere around Barstow on the edge of the desert when the drugs began to take hold... And suddenly there was a terrible roar all around us and the sky was full of what looked like huge bats, all swooping and screeching and diving around the car, which was going about a hundred miles an hour with the top down to Las Vegas.

Lonely Planet's *The Best Things in Life are Free* is packed full of money-saving tips, tricks and recommendations for the best-value sights and experiences around the world. From parks, museums and exercise classes that are free, to insider ideas on food and experiences offered at great value, this book features over 60 major cities around the world and promises to help any traveller on a budget to make the most of their trip. Includes parks and gardens, street markets and food trucks, viewing points, museums and galleries, free experiences, spectator sports, city beaches, and much more. For many, free and cheap things are not only appealing but essential for stretching the funds to last as long as possible for an extended journey. Yet, even on a short trip, many unforgettable blasts of freedom and discovery can happen on a thin budget. You quickly realise that cheap can mean much, much better. No fancy Roman trattoria dinner can truly rival the bread and cheese picnic in Villa Celimontana, a short walk from the Colosseum, on a visit to the Eternal City. Needless to say, the monetary value implied in the term 'free' can misrepresent what's on offer within these pages. The quality of an experience, after all, is not always attached to a price tag, such as the priceless experience of unearthing the world's secret wonders, whether that's swimming around Sydney's ocean pools or strolling the tombs and monuments of Delhi's Lodi Gardens. Additionally, it's an exaggeration to say that everything good is 100% free, so you'll find plenty of excellent value cheap things to experience throughout this book as well. Dip into your spare change for classy street food like a choripán (chorizo sandwich) in Buenos Aires, the best views of Hong Kong's skyline from the Star Ferry and a Boston brewery tour. After using the tips in this book, you'll be left with great memories, a happier you and a grateful wallet. Happy travels!

As part of the notorious MIT Team depicted in Ben Mezrich's now classic *Bringing Down the House*, Jeff Ma used math and statistics to master the game of blackjack and reap handsome rewards at casinos. Years later, Ma has inspired not only a bestselling novel and hit movie, but has also started

three different companies—the latest of which, Citizen Sports, is an innovative marriage of sports, betting, and digital technology—and launched a successful corporate speaking career. The *House Advantage* reveals Ma's cutting-edge mathematical insights into the world of statistics and makes them applicable to a wide business audience. He argues that numbers are the key to analyzing nearly everything in the world of business, from how to spot and profit from global market inefficiencies to having multiple backup plans in anticipation of every probability. Ma's stories and business lessons are as intriguing as they are universally applicable.
