 ““Gettysburg had everything,” Henry S. Commager recently wrote. “It was the greatest battle ever fought on our continent; it boasts more heroic chapters than any other one battle. It was the high tide of the Confederacy.” This is the way Glenn Tucker has always seen it and this is the way he reports it in *High Tide at Gettysburg*. The story of Gettysburg has never been told better, perhaps never so well as in this volume. Glenn Tucker has the immediacy of a war correspondent on the spot along with the insights that come from painstaking research. The armies

live again in his pages. In his big, generous book Glenn Tucker has room to follow Lee’s army up from Chancellorsville across Maryland into Pennsylvania. With Jackson recently killed, Lee had revamped his top command. When Meade’s men caught up with the Confederates and the two armies were probing to locate each other’s concentrations, Mr. Tucker’s account becomes sharper, more dramatic. His rapidly moving, vivid narrative of the three-day battle is filled with fascinating episodes and fresh, stimulating appraisals. Glenn Tucker is akin to Ernie Pyle in his interest in people. With him you meet Harry King Burgwyn, “boy colonel” of the 26th North

Carolina, just turned twenty-one, who slugged it out with Col. Henry A. Morrow of the 24th Michigan until few survived on either side. You feel the patriotic surge of white-haired William Barksdale, who led his Mississippians on the “grandest charge of the war” and died as he broke the Federal line. You sense the magnetism of Hancock the Superb, and feel the driving power of rugged Uncle John Sedgwick as he hurried his big VI Corps to the battlefield. With Old Man Greene you struggle in the darkness to save the Culp’s Hill trenches. And much more. Mr. Tucker weaves in many sharp thumbnail biographical sketches without slowing the action. Many North Carolinians, previously

slighted, here receive their due. Full, dramatic, immediate, here is Gettysburg.” [Donna Kooler's Encyclopedia of Crochet](#) Scholastic Teaching Resources The Analysis of Drugs of Abuse Edited by Terry A. Gough, The Laboratory of the Government Chemist, Teddington, UK Analytical techniques based on separation processes, such as chromatography and electrophoresis, are finding a growing range of applications in chemical, biochemical and clinical laboratories: The aim of this series is to provide the analyst in these laboratories with well-focused books covering individual techniques and methods. This volume, devoted to the analysis

of drugs which are commonly misused, provides a comprehensive source of up-to-date information. Detailed individual chapters are written by experts in the field describing various analytical techniques and applications. A special feature of the book is its emphasis on the complementary roles of chemist, law enforcer and the law maker in combatting drugs smuggling and the need for collaboration. This book will be a valuable reference for chemists, toxicologists and forensic scientists

working in the field.
