Star Trek: The Original Series: New Earth #5: Thin Air Simon and Schuster

It's been said that for any event, there are an infinite number of possible outcomes. Our choices determine which outcome will follow, and therefore all possibilities that could happen do happen across countless alternate realities. In these divergent realms, known history is bent, like white light through a prism -- broken into a boundless spectrum of what-might-have-beens. But in those myriad universes, what might have been...is what actually happened. **THE CHIMES AT MIDNIGHT:** In a continuum where Spock died during childhood, an Andorian named Thelin became Captain Kirk's stalwart friend and first officer. But at the moment of Khan's final defeat, history takes an even stranger turn, and the emerging potential of Project Genesis is revealed as the galaxy's greatest hope...and its most ominous threat. **A GUTTED WORLD:** Terrorist Kira Nerys -- from a Bajor that was never liberated -- may hold the key to winning a war that has engulfed

half the galaxy. But with the Romulans and the Klingons at each other's throats, and the Federation pulled into the conflict, even victory may not bring salvation. **BRAVE NEW WORLD:** Dr. Noonien Soong's dream has been realized: androids are now woven inextricably into the fabric of the Federation, revolutionizing Starfleet and transforming the quality of humanoid life. But when Soong's long-missing breakthrough creation, Data, mysteriously resurfaces, civilization reaches a crossroads that could lead to a bright new future, or to ruin.

Is there one food that humans, Klingons, Bajorans, and Vulcans would like? If so, what would it taste like? How would you prepare it? Could you find all the ingredients locally? This is the task that faces Neelix, chef for the U.S.S. *Voyager*<sup>™</sup>, every time he takes on the challenge of trying to feed its crew of 140 food critics. But over the course of their journey, Neelix's learned a few tricks of the trade. He had to, just as a matter of self-preservation. Ethan Phillips, in the persona of Neelix, and William J. Birnes, the New York Times bestselling coauthor of *The Day After Roswell*, throw wide the vaults of interstellar haute cuisine, revealing for the first time the secret preparation techniques behind all those exotic

dishes and drinks. The favorite foods of characters from every Star Trek series and movie are here, all adapted for easy use in twentieth-century kitchens. The Star Trek Cookbook also features a complete guide for whipping up the all the drinks served at Quark's. Fun, and easy to use, the Star Trek Cookbook is your indispensable guide to the food of the stars!

"Based upon Star Trek created by Gene Roddenberry and Star Trek: Enterprise created by Rick Berman & Brannon Braga."

The Children of Hamlin Open Road Media

A book in the tradition of the Heinlein juveniles. Young Alex Bredakoff always wanted to be a star trader. But it wasn't until his family moved to the Nexus space colony and he met Kasinda Venderling--daughter of a trader, and someone who's been plying the star lanes her entire life--that he realized how truly exciting--and dangerous--his life could become. But when you're in a runaway starship with a kidnapped alien prince, flying straight into a sun, it's a little late to re-evaluate your options.

Crossroads to the Cinema John Wiley & Sons

An array of leading Democrats, Republicans, and independent thinkers provide a road map for America's political future. America is at a turning point. For the first time in history, the United States is the world's lone superpower--in Andrew Cuomo's words, "both the tamer and target of an unstable world." New technology and the omnipresent media have transformed the way we do everything, from amassing wealth to practicing politics. Simultaneously, the U.S. economy is in a shambles, with the largest federal budget deficit in our history. The coming octogenarian boom promises to put the greatest strain on federal government resources the United States has ever known, and America is faced with new security threats and diplomatic crises daily. The success of our nation in the coming decades will depend on how our elected leaders respond to these challenges. Can the Democrats, divided and ineffectual since well before the crushing defeats of 2002, revitalize their agenda, forge a meaningful message, and end the Republican stranglehold on the federal government? Can Republicans, fresh from new victories, build on their successes? And how will a younger generation, largely alienated from both parties but often intensely political, articulate its desires in the years ahead? The writers invited by Andrew Cuomo to contribute to this landmark book, a who's who of American leadership, address these and other pressing questions of our political life. At once a diagnosis and a call to arms, *Crossroads* will set the terms of political debate as America moves forward.

**The Epic of Cassius Crossroads** Simon and Schuster

The novel begins after the events of STAR TREK VI: THE UNDISCOVERED COUNTRY. Spock's mother, Amanda Grayson, is dying and Spock returns to the planet Vulcan where he and Sarek enjoy a rare moment of rapprochement. But just as his wife's illness grows worse, duty calls Sarek away--once again sowing the seeds of conflict between father and son. Yet soon Sarek and Spock must put aside their differences and work together to foil a far-reaching plot to destroy the Federation--a plot that Sarek has seen in the making for nearly his entire career. The epic story will take the crew of the U.S.S. Enterprise to the heart of the Klingon Empire where Captain Kirk's last surviving relative has become a pawn in the battle to divide the Federation... and conquer it. With Sarek's help, the crew of the Starship Enterprise learns that all is not as it seems. Before they can prevent the Federation's destruction, they must see the face of their hidden enemy--an enemy more insidious and more dangerous than any they have faced before...

The Lost Years National Geographic Books

"In *Popular Culture in the Age of White Flight*, Eric Avila offers a unique argument about the restructuring of urban space in the two decades following World War II and the role played by new suburban spaces in dramatically transforming the political culture of the United States. Avila's work helps us see how and why the postwar suburb produced the political culture of 'balanced budget conservatism' that is now the dominant force in politics, how the eclipse of the New Deal since the 1970s represents not only a change of views but also an alteration of spaces."—George Lipsitz, author of *The Possessive Investment in Whiteness*  
Star Trek: Enterprise: The Romulan War: To Brave the Storm Pocket Books/Star Trek

The Pulitzer Prize winner explores the literary joys of sci-fi and superheroes, gumshoes and goblins, and the stories that bring us together. "I read for entertainment, and I write to entertain. Period." Such is the manifesto of Michael Chabon, an author of indisputable literary renown who maintains a fierce appreciation of the seductive arts of so-called "genre" fiction. In this lively collection of sixteen critical and personal essays, the author of *The Amazing Adventures of Kavalier & Clay* champions the cause of westerns, horror, and all the stories, comics, and pulp fiction that get pushed aside when literary discussion turns serious. Whether he's taking up Superman or Sherlock Holmes, Poe or Proust, Chabon makes it his emphatic mission to explore the reasons we tell one another tales. Throughout, Chabon reveals his own blooming as a writer, from *The Mysteries of Pittsburgh* to *The Yiddish Policeman's Union*. He is living proof of his theory that the stories that give us great pleasure are in many ways our truest, best art--the building blocks of our shared imagination--and in *Maps and Legends*, he "makes an inviting case for bridging the gap between popular and literary writing" (O, The Oprah Magazine). This ebook features a biography of the author.
