An integrated language arts approach to literacy development that brings early childhood perspectives on how children learn in pre-kindergarten through grade three, together with explicit teaching of literacy skills and strategies teachers need to make it all work. Pre-service and in-service teachers get a wealth of

valuable information for making children active participants in the process of literacy development with this integrated approach to language arts. The book encourages teaching reading, writing, listening, thinking, and viewing at the same time, using each skill to develop the others, and discusses both constructivist problem-solving teaching and more explicit systematic instruction. Through both theoretical and research-based rationales, plus extensive practical applications, renowned author Lesley Mandel Morrow presents literacy development as an active process between children and adults to create meaning and real purpose—and helps pre- and in-service teachers grasp the scope and complexity of early literacy development. This comprehensive, balanced approach to literacy teaching and learning covers oral language development, word study, phonological awareness, phonics, comprehension, listening and writing. The reader is provided with a complete picture of early literacy development.

Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs “who account for more than 9 percent of enrollment in grades K-12 in U.S. schools” are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

This detailed book is a “how-to” guide to building controlled vocabulary tools, cataloging and indexing cultural materials with terms and names from controlled vocabularies, and using vocabularies in search engines and databases to enhance discovery and retrieval online. Also covered are the following: What are controlled vocabularies and why are they useful? Which vocabularies exist for cataloging art and cultural objects? How should they be integrated in a cataloging system? How should they be used for indexing and for retrieval? How should an institution construct a local authority file? The links in a controlled vocabulary ensure that relationships are defined and maintained for both cataloging and retrieval, clarifying whether a rose window and a Catherine wheel are the same thing, or how pot-metal glass is related to the more general term stained glass. The book provides organizations and individuals with a practical tool for creating and implementing vocabularies as reference tools, sources of documentation, and powerful enhancements for online searching.

How do women writers cope with changes and juggle the demands in their already full lives to make time for their lives as artists? In this anthology, noted female novelists, journalists, essayists, poets, and nonfiction writers address the old and new challenges of "doing it all" that face women writers as the twenty-first century approaches. With eloquence, sensitivity, and more than a touch of wry humor, *Sleeping with One Eye Open* relates positive stories from women who lead effective lives as artists, emphasizing how sources of inspiration, discipline, resourcefulness, and determination help them succeed despite the obstacle of "no time." The title essay, Judith Ortiz Cofer's "The Woman Who Slept with One Eye Open," defines the collection. Cofer relates the ways in which a mythological story from her Puerto Rican culture gave her confidence and courage, encouraging her creative success and emphasizing the rewards of "women's power" and personal strength. Denise Levertov's "The Vital Necessity" urges poets to make time for daydreams—essential, empowering creative food. Tillie Olsen offers a frank discussion of the pressures of work and expectations that too often sap creative energy. Tess Gallagher connects her mother's creative gardening with her own inspiration as a poet and the need for growth in her writing. Marilyn Kallet's interview with Lucille Clifton relates the personal strength that helped Clifton raise six children and publish her first book at the same time. This affirming collection offers a wealth of writing advice, given through honest accounts of perseverance and accomplishment.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

How can today's teachers, whose classrooms are more culturally and linguistically diverse than ever before, ensure that their students achieve at high levels? How can they design units and lessons that support English learners in language development and content learning—simultaneously? Authors Amy Heineke and Jay McTighe provide the answers by adding a lens on language to the widely used Understanding by Design® framework (UbD® framework) for curriculum design, which emphasizes teaching for understanding, not rote memorization. Readers will learn the components of the UbD framework; the fundamentals of language and language development; how to use diversity as a valuable resource for instruction by gathering information about students' background knowledge from home, community, and school; how to design units and lessons that integrate language development with content learning in the form of essential knowledge and skills; and how to assess in ways that enable language learners to reveal their academic knowledge. Student profiles, real-life classroom scenarios, and sample units and lessons provide compelling examples of how teachers in all grade levels and content areas use the UbD framework in their culturally and linguistically diverse classrooms. Combining these practical examples with findings from an extensive research base, the authors deliver a useful and authoritative guide for reaching the overarching goal: ensuring that all students have equitable access to high-quality curriculum and instruction.
