This volume further complicates and advances the contemporary perspective on language endangerment by examining the outcomes of the most commonly cited responses to language endangerment, i.e.

language documentation, language revitalization, and training. The present collection takes stock of many complex and pressing issues, such as the assessment of the degree of language endangerment, the contribution of linguistic scholarship to language revitalization programs, the creation of successful language reclamation programs, the emergence of languages that arise as a result of revitalization efforts after interrupted transmission, the ethics of fieldwork, and the training of field linguists and language educators. The

volume's case studies provide detailed personal accounts of fieldworkers and language activists who are grappling with issues of language documentation and revitalization in the concrete physical and socio-cultural settings of native speaker communities in different regions of the world.

"Allende can spin a yarn with the grace of a poet."—Entertainment Weekly AN INSTANT NEW YORK TIMES BESTSELLER, NOW WITH A NEW DEAR READER LETTER From the New York Times bestselling author of *A Long Petal of the Sea* and *The House of the Spirits*, an enthralling and suspenseful coming-of-age story about a teenage girl who must unravel the mysteries of her past in order to save

herself. Nineteen-year-old Maya Vidal grew up in a rambling old house in Berkeley with her grandmother Nini—a force of nature whose formidable strength helped her build a new life after she emigrated from Chile in 1973—and Popo, an African-American astronomer and professor whose solid, comforting presence helps calm the turbulence of Maya's adolescence. When Popo dies of cancer, Maya comes undone and turns to drugs, alcohol, and petty crime. When she becomes lost in the dangerous underworld of Las Vegas, Maya becomes caught in the crosshairs of deadly warring forces. Her one chance for survival is Nini, who helps her escape to a remote island off the coast of Chile. Here, Maya tries to make sense of the past to discover the truth about her life and her family, and embarks on her greatest adventure: a journey of self-discovery and forgiveness.

Lacandon Maya U of Nebraska Press Through flashbacks, recollections, and short narratives, this story powerfully communicates an individual's experience of exile from an emotional and psychological perspective while at the same time linking the individual

experience to the collective one."--BOOK JACKET.

The Mayan Languages presents a comprehensive survey of the language family associated with the Classic Mayan civilization (AD 200–900), a family whose individual languages are still spoken today by at least six million indigenous Maya in Mexico, Guatemala, Belize, and Honduras. This unique resource is an ideal reference for advanced undergraduate and postgraduate students of Mayan languages and linguistics. Written by a team of experts in the field, The Mayan Languages presents in-depth accounts of the linguistic features that characterize the thirty-one languages of the family, their historical evolution, and the social context in which they are spoken. The Mayan Languages: provides detailed

grammatical sketches of approximately a third of the Mayan languages, representing most of the branches of the family; includes a section on the historical development of the family, as well as an entirely new sketch of the grammar of "Classic Maya" as represented in the hieroglyphic script; provides detailed state-of-the-art discussions of the principal advances in grammatical analysis of Mayan languages; includes ample discussion of the use of the languages in social, conversational, and poetic contexts. Consisting of topical chapters on the history, sociolinguistics, phonology, morphology, syntax, semantics, discourse structure, and acquisition of the Mayan languages, this book will be a resource for researchers and other readers with an interest in historical linguistics, linguistic

anthropology, language acquisition, and linguistic typology.
