Text Book of Environmental Studies I. K. International Pvt Ltd

The importance of environmental science and environmental studies cannot be disputed. The need for sustainable development is a key to the future of mankind. Continuing problems of pollution, loss of forest, solid waste disposal, degradation of environmental issues like economic productivity and national security, Global warming, the depletion of ozone layer and loss of biodiversity have made everyone aware of environmental issues and consequences. In spite of the deteriorating status of the environment, study of environment has so far not received adequate attention in our academic programmes. Recognizing this, the Hon'ble supreme court directed the UGC to introduce a basic course on environment at undergraduate level in college education. Accordingly, UGC constituted an expert committee, which drafted the core module course, comprising of 7 units and field work. This book tries to cover up and match with the module core syllabus suggested by UGC, New Delhi for all branches of Engineering.

An Introductory Notes Book on Environmental Studies The Energy and Resources Institute (TERI)
 Environmental Studies pertain to a systematic analysis of the natural and man-made world encompassing various scientific, economic, social and ethical aspects. Human impacts leading to large-scale degradation of the environment have aroused global concern on environmental issues in the recent years. The apex court has hence, issued directive to impart environmental literacy to all. In this book the fundamental concepts of environmental studies have been introduced and analyzed in a simple manner strictly as per the Jntu Syllabus for Undergraduate Courses in Science, Humanities, Engineering, Medicine, Pharmacy, Commerce, Management and Law. Besides the Undergraduate Students of All Disciplines the book will also be useful for those appearing in various competitive exams since environmental issues now find a focus in most of such examinations. The contents of the book will be of interest to all educationists, planners and policy makers. Key features of the book include a simple and holistic approach with illustrations, tables and specific case studies mainly in the Indian context. The basic terminologies have been defined in the text while introducing the topics and some useful terms mentioned in the text have been explained in the glossary for an easy grasp by students of all disciplines.

Text book for Environmental science and Ecology Galgotia Publications

Environmental Studies: Understanding the World Around Us is a series of five books for classes 1 to 5 on Environmental Studies. The series strictly follows the new NCERT syllabus and the vision of the National Curriculum Framework (NCF) 2005. The series introduces young learners to their environment. They also learn how to preserve it while reading the books. The books have been written in a child-friendly language and are supported by lively illustrations. The concepts have been explained in a simple, clear and logical manner for better understanding.

Introduction to Environmental Sciences APH Publishing

About the Book: Environmental Studies pertain to a systematic analysis of the natural and man-made world encompassing various scientific, economic, social and ethical aspects. Human impacts leading to large scale degradation of the environment have aroused global concern on environmental issues in the recent years. The apex court has hence, issued directive to impart environmental literacy to all. In this book the fundamental concepts of environmental studies have been introduced and analysed in a simple manner strictly as per the module syllabus designed by the U.G.C. for undergraduate courses in science, humanities, engineering, medicine, pharmacy, commerce, management and law. Besides the undergraduate students of all disciplines the book will also be useful for those appearing in various competitive exams since environmental issues now find a focus in most of such examinations. The contents of the book will be of interest to all

educationists, planners and policy makers. Key features of the book include a simple and holistic approach with illustrations, tables and specific case studies mainly in the Indian context. The basic terminologies have been defined in the text while introducing the topics and some useful terms mentioned in the text have been explained in the glossary for an easy grasp by students of all disciplines.

Fundamentals Of Environmental Studies New Age International

For B.A. , B.Sc. , B.Com. , B.H.Sc. , B.C.A., (Management) and other Undergraduate Classes as per UGC Model Curriculum In addition to certain corrections, topics like Hydrologic Cycle, Air Pollution, Solar and Wind Energies are modified in the light of present requirement. Some new topics like Dissolved Oxygen, Biological Oxygen Demand, Chemical Oxygen Demand, Natural Geysers, Environmental Club, Green Accounting, Honey and Bee Keeping, Social Forestry are also introduced. With additional data, new topics and necessary diagrammes, the book will be of immense use and more popular among students and readers.

Environmental Science The Energy and Resources Institute (TERI)

Anubha Kaushik is Professor and Founder Chairperson, Department of Environmental Science and Engineering, G.J. University, Hisar, India. She obtained her Doctorate from Kurukshetra University, Kurukshetra and has been teaching Ecology and Environmental Sciences in M.D. University, Rohtak, K.U. Kurukshetra and G.J. University, Hisar for the last 20 years. She has won 8 Gold Medals in her Academic Career and was awarded Dr. B.R. Ambedkar Fellowship Award and Gold Medal and various National Scholarships/Fellowships. She has published a large number of research papers in International and National Journals of Repute and guided several P.G. and Doctoral Thesis. She is in the Editorial Board of several International and National Journals and reviewer of many International Journals of Environment. She has attended many International and National Conferences, Seminars and Workshops and chaired Technical Sessions in some. She is a member of the Appellate Authority, Haryana; has been a member State Steering Committee of National Biodiversity Strategy and Action Plan; Nominee State Environmental Protection Council, Haryana; Resource Person of United States Educational Foundation in India (Usefi, Fulbright) at International Round Table (Saarc) on Environment and Health, and member of several other prestigious Academic and Advisory Committees of University Grants Commission, All India Radio and various Indian Universities. C.P. Kaushik is Professor and Chairman, Department of Environmental Science and Engineering, Dean, Faculty of Non Conventional Sources of Energy and Environmental Science, and Dean, Academic Affairs, G.J. University, Hisar, India. He obtained his M.Phil. and Doctorate from The University of Delhi, Delhi. He has a vast teaching and research experience of 28 years of which more than 8 years as a Professor. He was awarded various National Scholarships/Fellowships during his Academic and Research Career. He has a large number of research publications in International and National Journals of Repute. He is reviewer of many International and National Journals. He has guided several M.Phil., M.Tech. and Ph.D. students and has handled a number of major research and consultancy projects. He has attended many International and National Conferences and chaired Technical Sessions in some of them. He also organized many National Seminars, Workshops and Consortia. He is member of several prestigious committees of Ministry of Human Resource Development, GoI, University Grants Commission, Department of Science and Technology, GoI, National Council of Educational Research and Training, National Assessment and Accreditation Council, Department of Environment, Govt. of Haryana and Academic and Administrative Bodies of various Indian Universities.

Environmental Studies (Bharathidasan University) S. Chand Publishing

An Introductory Notes Book on Environmental Studies is a compilation of information required by students in the form of notes, to the point details as per Delhi University syllabus and highlighted important points with illustrations in its simplest form. With this notes book, you won't have to

prepare notes, just start reading for exams.

Environmental Science And Engineering (anna University) New Age International
Urbanization and industrialization during the last few decades have invited a large number of environmental issues which demand urgent attention and remedy. The rapid growth in population and over exploitation of our natural resources including large scale deforestation have been responsible for environmental degradation and consequent unexpected spike in the occurrence of natural disasters such as flood, drought, cyclones etc which have taken heavy toll of human life during the recent past. Although, there has been efforts to minimize environmental damages through development of eco friendly technology and optimal utilization of resources, the problems remain because of inadequate awareness among the masses. Therefore, as per the decision of Hon'ble Supreme Court of India, the University Grants Commission (UGC) has made Environmental science a compulsory subject for all the undergraduate university students. This step was taken to make the student community aware about the environment and ensure their participation in conservation of our fragile ecosystems. This book has been written incorporating topics prescribed by the UGC model syllabus for AECC Environmental science. All the topics have been described in a simple and concise manner with suitable figures for better understanding of the students. The authors hope that the book will cater to the needs of undergraduate students of various Universities/Colleges of India for whom it has been written.

Essential Environmental Studies PHI Learning Pvt. Ltd.

Environmental Science is one of the most important areas of research and study in present time and its application in every aspect of life has also increased. Keeping this in view, almost all Indian Universities have introduced it as a compulsory course. This book is intended to suit the needs of graduate and postgraduate students pursuing environmental studies. To save the natural environment, a good and effective understanding of environmental science is needed.

Environmental science is a term that has been widely used in recent years and its manifestations can range from environmental awareness learning through complex and expensive environmental study to operational research studies of environmental education systems.

Introduction to Environmental Science New Age International

Environmental Science And Engineering Pertain To A Systematic Analysis Of The Natural And Man-Made World Encompassing Various Scientific, Economic, Social And Ethical Aspects.
