"Take Glee, toss it in Lincoln Center, shake out the bizarre stereotypes and you get Take a Bow . . . one page turner that has us yearning for an encore." —MTV's Hollywood Crush From the award-winning author of Prom & Prejudice and Past Perfect Life comes a story of all the drama and comedy of four friends who grow into themselves at a performing arts high school. Emme, Sophie, Ethan, and Carter are getting ready for their Senior Showcase recital, where the pressure is on to appeal to colleges, dance academies, and professionals in show business. For Sophie, a singer, it's been great to be friends with Emme, who composes songs for her, and to date Carter, soap opera

heartthrob who gets plenty of press coverage. Emme and Ethan have been in a band together through all four years of school, but wonder if they could be more than just friends and bandmates. Carter has been acting since he was a baby, and isn't sure how to admit that he'd rather paint than perform. The Senior Showcase is going to make or break each of the four, in a funny, touching, spectacular finale that only Elizabeth Eulberg could perform. "This fresh, fun, fabulous read will have you cheering for new beginnings. Five shiny gold stars!" —Susane Colasanti, bestselling author of the City Love series "The cutthroat competitiveness is balanced by quiet, thoughtful moments of soul-searching regarding stardom, the creative process, and doing and sharing what they love. Readers who love seeing underdogs come out ahead will be delighted with the conclusion." —Publishers Weekly "Realistic dialogue and a healthy dose of teen angst keep the pages turning." —Kirkus Reviews

This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

The first introductory text to present biological concepts through the research that revealed them, Life covers the full range of topics with an integrated experimental focus that flows naturally from the narrative. This approach helps to bring the drama of classic and cutting-edge research to the classroom - but always in the context of reinforcing core ideas and the innovative scientific thinking behind them. Married to the retired magistrate of Vetusta, Ana Ozores cares deeply for her much older husband but feels stifled by the monotony of her life in the shabby and conservative provincial town. And when she embarks on a quest for fulfillment through religion and even adultery, a bitter struggle begins between a powerful priest and a would-be Don Juan for the passionate young woman's body and soul. Scandalizing contemporary Spain when it was first published in 1885, with its searing critique of the Church and its frank treatment of sex, *La Regenta* is a compelling and witty depiction of the complacent and frivolous world of upper-class society.
