Christopher Hart,
America's best-selling

author of art instruction books, tosses all that aside to make drawing animals truly amazingly easy, by simplifying animal anatomy so that artists can get the poses they really want. What does that animal look like as it moves, bends, twists, jumps, runs? Simplified

skeletons and an innovative new approach show how to look at an animal as a strangely built human with an odd posture--allowing the artist to draw animals by identifying with them. Hart's step-by-step instructions and clear text mean true-to-life results

every time, whether the subjects are dogs, cats, horses, deer, lions, tigers, elephants, monkeys, bears, birds, pigs, goats, giraffes, or kangaroos.

With her unique perspective as both an artist and a veterinarian, Mari Suzuki provides step-by-step instruction on drawing animals that even beginners can grasp. In meticulous detail, she explores different animals' proportions, skeletal forms, musculature, and other physical fundamentals. While Suzuki includes an

array of creatures--from pandas and penguins to kangaroos and elephants--dogs and cats provide the template, because of their availability and wide range of movements. Each project is done in pencil, giving the work a genuine figure-drawing feel.
