From natural disaster areas to conflict zones, humanitarian workers today find themselves operating in diverse and difficult environments. While humanitarian work has always presented unique ethical challenges, such efforts are now further complicated by the impact of globalization, the escalating refugee crisis, and mounting criticisms of established humanitarian practice. Featuring contributions from humanitarian practitioners, health professionals, and social and political scientists, this book explores the question of ethics in modern humanitarian work, drawing on the lived experience of humanitarian workers themselves. Its essential case studies cover humanitarian work in countries ranging from Haiti and South Sudan to Syria and Iraq, and address issues such as gender based violence, migration, and the growing phenomenon of 'volunteer tourism'. Together, these contributions offer new perspectives on humanitarian ethics, as well as insight into how such ethical considerations might inform more effective approaches to humanitarian work.

Who Really Made Your Car? Purdue University Press

This groundbreaking international bestseller lays to rest many myths about the Holocaust: that Germans were ignorant of the mass destruction of Jews, that the killers were all SS men, and that those who slaughtered Jews did so reluctantly. Hitler's Willing Executioners provides conclusive evidence that the extermination of European Jewry engaged the energies and enthusiasm of tens of thousands of ordinary Germans. Goldhagen reconstructs the climate of "eliminationist anti-Semitism" that made Hitler's

pursuit of his genocidal goals possible and the radical persecution of the Jews during the 1930s popular. Drawing on a wealth of unused archival materials, principally the testimony of the killers themselves, Goldhagen takes us into the killing fields where Germans voluntarily hunted Jews like animals, tortured them wantonly, and then posed cheerfully for snapshots with their victims. From mobile killing units, to the camps, to the death marches, Goldhagen shows how ordinary Germans, nurtured in a society where Jews were seen as unalterable evil and dangerous, willingly followed their beliefs to their logical conclusion. "Hitler's Willing Executioner's is an original, indeed brilliant contribution to the...literature on the Holocaust."--New York Review of Books "The most important book ever published about the Holocaust...Eloquently written, meticulously documented, impassioned...A model of moral and scholarly integrity."--Philadelphia Inquirer

Neural Circuit and Cognitive Development Mariner Books
Models in Microeconomic Theory covers basic models in current microeconomic theory. Part I (Chapters 1-7) presents models of an economic agent, discussing abstract models of preferences, choice, and decision making under uncertainty, before turning to models of the consumer, the producer, and monopoly. Part II (Chapters 8-14) introduces the concept of equilibrium, beginning, unconventionally, with the models of the jungle and an economy with indivisible goods, and continuing with models of an exchange economy, equilibrium with rational expectations, and an economy with asymmetric information. Part III (Chapters 15-16) provides an introduction to game theory, covering strategic and extensive games and the concepts of Nash equilibrium and subgame perfect equilibrium. Part IV (Chapters 17-20) gives a taste of the topics of mechanism design, matching, the axiomatic analysis of economic systems, and social choice. The book focuses on the concepts of model and equilibrium. It states models and results precisely, and provides proofs for all results. It uses only elementary mathematics (with almost no calculus), although many of the proofs involve sustained logical arguments. It includes about 150 exercises. With its formal but accessible style, this textbook is designed for undergraduate students of microeconomics at intermediate and advanced levels.

Hitler's Willing Executioners Prentice Hall

This book analyses how certain types of social systems generate violent conflict and discusses how these systems can be transformed in order to create the conditions for positive peace. Resolving Structural Conflicts addresses a key issue in the field of conflict studies: what to do about violent conflicts that are not the results of misunderstanding, prejudice, or malice, but the products of a social system that generates violent conflict as part of its normal operations. This question poses enormous challenges to those interested in conflict resolution, since the solution to this problem involves restructuring social, political, and cultural systems rather than just calling in a mediator to help people arrive at an agreement. This study breaks new ground in showing how local conflicts involving crime, police, and prisons; transnational conflicts involving religious terrorism by groups like ISIS; and international conflicts involving Great Power clashes are all produced in large part by elite-driven, exploitative or oppressive social structures. It also presents new ideas about the implications of this 'structural turn' for the practice of conflict resolution, emphasizing the need for conflict resolvers to embrace a new politics and to broaden their methods far beyond traditional forms of facilitation. Written by a leading scholar, this book will be of much interest to students of conflict resolution, peace studies, war and conflict studies, sociology, political science and international relations in general.
