This is a collection of work by W.E.H. Stanner, one of Australia's finest essayists. A superb anthropologist, he was both perceptive and prophetic about the Aboriginal people he knew; yet his work has been out of print and astonishingly hard to find for many years. The revival of these essays, selected and introduced by Robert Manne, is a significant event. 'Bill Stanner was a superb essayist with a wonderful turn of phrase and ever fresh prose. He always had important things to say, which have not lost their relevance. It is wonderful that they will now be available to a new and larger audience.' -Henry Reynolds

In *Listening to Images* Tina M. Campt explores a way of listening closely to photography, engaging with lost archives of historically dismissed photographs of black subjects taken throughout the black diaspora. Engaging with photographs through sound, Campt looks beyond what one usually sees and attunes her senses to the other affective frequencies through which these

photographs register. She hears in these photos—which range from late nineteenth-century ethnographic photographs of rural African women and photographs taken in an early twentieth-century Cape Town prison to postwar passport photographs in Birmingham, England and 1960s mug shots of the Freedom Riders—a quiet intensity and quotidian practices of refusal. Originally intended to dehumanize, police, and restrict their subjects, these photographs convey the softly buzzing tension of colonialism, the low hum of resistance and subversion, and the anticipation and performance of a future that has yet to happen. Engaging with discourses of fugitivity, black futurity, and black feminist theory, Campt takes these tools of colonialism and repurposes them, hearing and sharing their moments of refusal, rupture, and imagination.

Maggie Wilson was born in the highlands of Papua New Guinea to Melka Amp Jara, a woman of the highlands, and Patrick Leahy, brother of Australian explorers Michael and Daniel Leahy, who were among the first Australian explorers to encounter people in the Highlands of Papua New Guinea, during an expedition in search for gold. Maggie's life serves as a window into the complex social and cultural transformations experienced during

the early years of the Australian administration in Papua New Guinea and the first three decades after independence. This ethnography--started as an autobiography and completed by Rosita Henry after Maggie's death in 2009--tells Maggie's story and the stories of those whose lives she touched. Their recollections of Maggie Wilson offer insights into life in Papua New Guinea today.

Exactly 450 years after the solemn closure of the Council of Trent on 4 December 1563, scholars from diverse regional, disciplinary and confessional backgrounds convened in Leuven to reflect upon the impact of this Council, not only in Europe but also beyond. Their conclusions are to be found in these three impressive volumes. Bridging different generations of scholarship, the authors reassess in a first volume Tridentine views on the Bible, theology and liturgy, as well as their reception by Protestants, deconstructing many myths surviving in scholarship and society alike. They also deal with the mechanisms 'Rome' developed to hold a grip on the Council's implementation. The second volume analyzes the changes in local ecclesiastical life, initiated by bishops, orders and congregations, and the political strife and confessionalisation accompanying this reform process. The third and final volume examines the afterlife of Trent in arts and music, as well as in the global impact of Trent through missions.

One of Australia's finest essayists, the first to cut through 'the great Australian silence' to convey the richness and uniqueness of Aboriginal culture to settler Australians 'The most literate and persuasive of all contributions on Australia's Indigenous people' —Marcia Langton W.E.H. Stanner's words changed Australia. In his 1968 Boyer Lectures he exposed a 'cult of forgetfulness practised on a national scale', regarding the fate of First Nations people, for which he coined the phrase 'the great Australian silence'. And in his essay 'Durmugam' he provided an unforgettable portrait of a warrior's attempt to hold back cultural change. The pieces collected here span Stanner's career as well as the history of Australian race relations. They reveal the extraordinary scholarship, humanity and vision of one of Australia's finest essayists. Stanner's writings remain relevant in a time of reckoning with white Australia's injustices against Aboriginal people and the path to reconciliation. With an introduction by Robert Manne 'Bill Stanner was a superb essayist with a wonderful turn of phrase and ever fresh prose. He always had important things to say, which have not lost their relevance. It is wonderful that they will now be available to a new and larger audience.' —Henry Reynolds 'Stanner's essays still hold their own among this country's finest writings on matters black and white.' —Noel Pearson

A New York Times bestseller by the author of *The Ninja*: An American uses his martial arts expertise to track a serial killer preying on the women of Tokyo. A sadist haunts the back alleys and sex clubs of Tokyo, picking up women, horrifically mutilating them, and leaving behind a calling card written in blood: This could be your wife. He kills fearlessly, certain the police will never catch him. The only man who might stop this fiend is Nicholas Linnear, a martial arts expert whose childhood education in the dojos of Japan has made him one of the country's leading practitioners of ninjutsu. But Linnear fears that his illness may

have left him Shiro Ninja—stripped of his power and discipline. With the killer growing increasingly brazen, Linnear must summon all his strength and training before his own family becomes the next target. "Compelling [and] highly charged with action," this is a chilling tale of menace, crime, and corruption featuring the half-British, half-Chinese hero of *The Ninja and The Miko*, by the #1 New York Times bestselling author of the Jason Bourne series (Publishers Weekly).

The Narendra Modi government, ever since it came to power in May 2014, has made several departures from the past in India's foreign and national security policies. The Prime Minister's personal attention to these two aspects of governance has set new benchmarks. These decisions have made the world sit up and take notice of a more confident and assured Indian government, not afraid to take potentially risky decisions. In *Securing India the Modi Way: Pathankot, Surgical Strikes and More*, released in September 2017, Nitin A. Gokhale provided the most intimate and sweeping account of Team Narendra Modi's approach to national security and foreign policy initiatives. This revised and updated edition includes details of how the unprecedented decisions to strike a Jaish-e-Mohammad terrorist camp at Balakot inside Pakistan and to carry out a test to acquire the capability to destroy a satellite in space, were taken. Drawing on internal discussions, as yet unknown information, meeting notes and hours of interviews with key players in the national security team, Gokhale brings alive inside stories of policy formulation at the highest levels in the government. Painstakingly researched, the book details hitherto unknown aspects of the planning and execution of the Balakot strike, the aerial dogfight between Indian and Pakistani air forces and India's quiet diplomacy in turning the situation around in Maldives. The earlier edition had details surgical strikes, revamping of New Delhi's policy towards China and Pakistan, India's renewed outreach to the Middle East, Prime Minister Modi's attempt to leverage the Indian diaspora worldwide and his attention to smallest of details besides focusing on some small but far-reaching steps taken to secure India in every possible way—on land, in space, cyber and maritime domains. The book in many ways is the first authentic account of the Modi government's decision making process on vital issues.

Bhangra is commonly understood as the hybrid music produced in Britain by British Asian music producers through mixing Panjabi folk melodies with western pop and black dance rhythms. This is derived from a Punjabi harvest dance of the same name. This book looks at Bhangra's global flows from one of its originary sites, the Indian subcontinent, to contribute to the understanding of emerging South Asian cultural practices such as Bhangra or Bollywood in multi-ethnic societies. It seeks to trace Bhangra's moves from Punjab and its 'return back' to look at the forces that initiate and regulate global flows of local texts and to ask how

their producers and consumers redirect them to produce new definitions of culture, identity and nation. The critical importance of this book lies in understanding the difference between the present globalizing wave and previous trans-local movements. Gera Roy contrasts the frames of cultural imperialism with those of cultural invasion to show how Indian cultures have constantly reinvented themselves by cross-pollinating with 'invading' cultures such as Hellenic, Persian, Arabic and many others in the past. By looking at Bhangra's flows to and from India, the book revises the relation between culture, space and identity and challenges boundaries. It weighs both the uses and costs of visibility provided by global networks to marginalized groups in diverse localities and explores whether collaborations between Bhangra practitioners, largely of working class origin, give ordinary people any control over the circulation of culture in the global village. Finally, the book considers whether cultural practices can alter hierarchies and power structures in the real world.

Award-winning photographer Matt Black traveled over 100,000

miles to chronicle the reality of today's unseen and forgotten

America. When Magnum photographer Matt Black began

exploring his hometown in California's rural Central

Valley—dubbed "the other California," where one-third of the

population lives in poverty—he knew what his next project had to

be. Black was inspired to create a vivid portrait of an unknown

America, to photograph some of the poorest communities across

the US. Traveling across forty-six states and Puerto Rico, Black

visited designated "poverty areas," places with a poverty rate

above 20 percent, and found that poverty areas are so numerous

that they're never more than a two-hour's drive apart, woven

through the fabric of the country but cut off from "the land of

opportunity." *American Geography* is a visual record of this five-

year, 100,000-mile road trip, which chronicles the vulnerable

conditions faced by America's poor. This compelling compilation

of black-and-white photographs is accompanied by Black's own

travelogue—a collection of observations, overheard

conversations in cafe's and public transportation, diner menus,

bus timetables, historical facts, and snippets from daily news

reports. A future classic of photography, this monograph is

supported by an international touring exhibition and is a must-

have for anyone with an interest in witnessing the reality of an America that's been excluded from the American Dream.

A concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Stalin, Mao, Hitler, Mussolini, and other dictators routinely doctored photographs so that the images aligned with their messages. They erased people who were there, added people who were not, and manipulated backgrounds. They knew if they changed the visual record, they could change history. Once, altering images required hours in the darkroom; today, it can be done with a keyboard and mouse. Because photographs are so

easily faked, fake photos are everywhere—supermarket tabloids, fashion magazines, political ads, and social media. How can we tell if an image is real or false? In this volume in the MIT Press Essential Knowledge series, Hany Farid offers a concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Farid, an expert in photo forensics, has spent two decades developing techniques for authenticating digital images. These techniques model the entire image-creation process in order to find the digital disruption introduced by manipulation of the image. Each section of the book describes a different technique for analyzing an image, beginning with those requiring minimal technical expertise and advancing to those at intermediate and higher levels. There are techniques for, among other things, reverse image searches, metadata analysis, finding image imperfections introduced by JPEG compression, image cloning, tracing pixel patterns, and detecting images that are computer generated. In each section, Farid describes the techniques, explains when they should be applied, and offers examples of image analysis.
