Living Through a Natural Disaster is a Recount text covering Science and Geography themes for Year 5. It is part of Four Corners, the most visually compelling series of cross-curricular books to motivate all readers from 4 to 11.

Living Through a Natural Disaster
National Geographic Books

Natural disasters happen, and that's a fact. But does your child truly understand why they take place? It's not always easy to explain disasters by telling a child about it. Words are not enough, pictures are required to visualize. That is why this educational book

capitalizes on learning through visuals. It is complete with more colors and less text. Grab a copy now!

A Storm Called Katrina
Explore Your World
Assesses the long-term impact of Hurricane Andrew on the children of South Florida.
Includes step-by-step specific activities to be used to help children after a disaster, as well lessons to be used at the beginning of each Hurricane season, & an activity to use during a warning of a possible natural disaster.
Annotated bibliography, references & suggested additional readings.
Loose Leaf for Natural Disasters Celebration Press (NJ)
When natural disasters happen they grab headlines around the

world. People, creatures, and the environment are all impacted when nature gets out of control. Natural disasters can be upsetting to live through, but scientists today better understand their causes and how we can protect ourselves and others. *Natural Disasters: Investigate Earth's Most Destructive Forces with 25 Projects* teaches readers about some of the natural disasters throughout history, what caused them, their impact on civilizations, and how people today cope with natural disasters. Readers of this book will make their own shake tables, create a cake batter lava flow, invent a wind tunnel, and experiment with avalanches. These

hands-on activities engage readers and add depth to the text while ensuring that the learning is made lasting and fun.

2005c Penguin

First in a series of resources for middle primary school teachers. Provides 80 photocopiable pages with integrated units on explorers, famous Australians, myths and legends, religions and beliefs, endangered animals, natural disasters, and moving pictures. Each unit addresses a key learning area for lower primary - either Science or SOSE/HSIE. Includes an overview of unit content and an assessment grid.

Living Through a Natural Disaster DIANE Publishing
"A scientific introduction to the forces behind extreme meteorological events, including earthquakes, tsunamis, volcanoes, flooding, drought, storms, wildfires, and

more! Plus, learn the science behind why climate change makes these events more extreme. STEM activities, fascinating facts, essential questions, and links to online /i resources all help promote deep learning"--

Coping with Crises

Springer

"Composed in the wake of the devastating earthquake of January 2010, this inspired child's-eye view will leave no reader or listener unmoved."

—Kirkus Reviews (starred review) From the New York Times-bestselling author and National Book Award finalist comes a brilliantly crafted story of hope and imagination—a powerful tribute to Haiti and children

around the world . . .

While Junior is trapped for 8 days beneath his collapsed house after an earthquake, he uses his imagination for comfort. Drawing on beautiful, everyday-life memories, Junior paints a sparkling picture of Haiti for each of those days—flying kites with his best friend or racing his sister around St. Marc's Square—helping him through the tragedy until he is finally rescued. Love and hope dance across each page—granting us a way to talk about resilience as a family, a classroom, or a friend. "An uplifting story, told in the ingenuous voice of Junior, a boy pulled from the rubble of his former home eight days after the earthquake that devastated Port-au-

Prince in January 2010 . . . a moving celebration of hope, determination, and resilience.”

—Publishers Weekly
“Focusing on one child who survived the 2010 disaster in Haiti, this beautiful and touching picture book is a true testament to the spirit of the people of this nation.” —School Library Journal
“Their moving storytelling personalizes the dramatic news stories of the disaster with a close-up, fictionalized narrative of one child’s experience.” —Booklist
Teach Like Your Hair’s on Fire Penerbit

LeutikaPrio
Focusing on natural hazards, this is part of an A-Level Geography series which presents a wide range of detailed case studies. Students are helped to progress

from GCSE and Standard Grade within each topic book as they work through the questions that appear at regular intervals, and the enquiry activities at the end of each chapter. The series also offers separate books on study advice and skills development, as well as exam support. Question banks focus on the deveopment of core skills and are designed to help in the construction of essays. [A Unit Model for Geography Years 7-10](#)
Speedy Publishing LLC
Colourfully illustrated, large format reference for upper primary school children providing scientific information about natural disasters such as cyclones, earthquakes, and volcanoes. Includes

hands-on experiments to simulate these phenomena and explain why they occur. Includes a glossary and an index. Also available in smaller size for classroom use. The author is associate professor in environmental studies at Flinders University. *Natural Disasters* DIANE Publishing

What is the relationship between education and natural disasters? Can education play a role in ameliorating and mitigating them, preparing people in how to respond, and even helping to prevent them? If so, how? Drawing on research carried out in a number of different countries, including Australia, China, India, Japan, the UK and the

USA, the contributors consider the role of education in relation to natural disasters. The case studies expand conceptual and empirical understandings of the understudied relationship between education and natural disasters and uncover the potential and the limitations of education for mitigating, responding to, and potentially preventing, natural disasters. The contributors also consider the extent to which so-called natural disasters, such as mudslides caused by deforestation and flooding areas built on known flood plains, are linked to human behaviour and how education can impact on these.

McGraw-Hill Education
Read Rafe Esquith's posts on the Penguin Blog. The New York Times bestseller that is revolutionizing the way Americans educate their kids-"Rafe Esquith is a genius and a saint" (The New York Times) Perhaps the most famous fifth-grade teacher in America, Rafe Esquith has won numerous awards and even honorary citizenship in the British Empire for his outstandingly successful methods. In his Los Angeles public school classroom, he helps impoverished immigrant children understand Shakespeare, play Vivaldi, and become happy, self-confident people. This bestseller gives any teacher or parent all the techniques, exercises,

and innovations that have made its author an educational icon, from personal codes of behavior to tips on tackling literature and algebra. The result is a powerful book for anyone concerned about the future of our children.

Helping Children Prepare for and Cope with Natural Disasters

Penguin Provides the teachers with a ready-to-use classroom resource which covers many aspects of major national hazards and disasters. Through a series of exercises, students are stimulated to investigate the causes and effects of hazards and the way in which people can respond effectively to them. Well-know Australian case studies are used

to illustrate the impact of natural disasters. Each section also contains activities designed to arouse greater interest in the topic such as crossword puzzles, research activities, and role-play exercises.

Disaster risk reduction in school curricula: case studies from thirty countries Blake Education

Earthquakes and tsunamis are two powerful forces that change the Earth's surface. In this book, you will study how these natural disasters happen, the damage they create and what you can do to keep safe. You will also learn to identify some of the major faults in the world and the Mid-Atlantic Ridge. Start reading today!

Disasters Through Children's Literature

Nelson Thornes
Discussing international perspectives on teaching about hazards and disasters, this volume features examples from Germany, France, South Africa, New Zealand, Hong Kong and Nigeria.

What Was Hurricane Katrina? Springer Science & Business Media

Earth can be a dangerous place! Deadly earthquakes and volcanic explosions sometimes happen. This book reveals the truth about these spectacular and scary events. Non-fiction is an excellent way to foster an interest in new subjects. This set of ten WOW! Facts

presents a variety of unusual subjects such as hip hop stars, haunted houses, Formula 1, psychological experiments and lesser-known dinosaurs. And as enthusiasm grows for new interests, so doors are opened in terms of comprehension and reading ability too. Every book in this hi-lo set is aimed at readers of 10-14, but who have a reading age closer to 9-9.5.

Eight Days Multilingual Matters

Table of contents includes: Extreme weather - The story of Cyclone Tracy - The Huang He flood - El Nino brings drought - Handling natural disasters.

Natural Disasters That Shook the World | World

Disasters Book Grade 6 | Children's Science & Nature Books

Reading Essentials in Science
A moving fictional story about the effects of Hurricane Katrina on the people of New Orleans, as seen through the eyes of a ten-year-old boy. A must-have for introducing this historical event to children. Louis Daniel hates it when Mama treats him like a baby. But when Hurricane Katrina blows through the Gulf Coast, Louis feels like a little kid again. With no time to gather their belongings—except Louis's beloved horn—Daddy leads the family into an unfamiliar, watery world of floating debris, lurking critters, and desperate neighbors.

Taking shelter in the already-crowded Superdome, Louis and his parents wait...and wait. Conditions continue to worsen, and when Daddy fails to return from a scouting mission within the Dome, Louis knows he's no longer a baby. It's up to him to find his father—with the help of his prized cornet.

Award-winning author Myron Uhlberg highlights resilience and hope throughout this sensitively portrayed fictional story based on the real events of Hurricane Katrina. Colin Bootman's dramatic illustrations enhance the warmth and strength of the young narrator's family as they work through the tragedy.

Natural Disasters

Longman

Natural disasters enthrall with their potency, might, and devastation. Tap into students' inherent awe of storms, volcanic eruptions, hurricanes, earthquakes, tornadoes, floods, avalanches, landslides, and tsunamis to open their minds to the wonders and power of the natural world.

Using quality children's literature as a springboard to learning, this guide extends the understanding of science concepts through short activities, longer projects, and adventures. This participatory approach keeps the focus on the processes of science and promotes a personal response to learning. Students can use the literature and

activities not just to better understand the forces of nature, but to

grasp the implications of that potency on the lives of people near and far. Grades 3-6.
