Books

This book offers up a deep understanding of concepts and practices behind the composition of heterogeneous components. After the analysis of existing computation and execution models used for the specification and validation of different sub-systems, the book introduces a systematic approach to build an execution model for systems composed of heterogeneous components. Mixed continuous/discrete and hardware/software systems are used to illustrate these concepts. The benefit of reading this book is to arrive at a clear vision of the theory and practice of specification and validation of complex modern systems. Numerous examples give designers highly applicable solutions.

 Learn the ins-and-outs of
 the law—for restaurant
 owners, catering services,
 pubs, bars, and more! The
 Law (In Plain English)® for
 Restaurants is a
 comprehensive guide to
 working in the food and
 beverage industry. It

looks at the business of running a restaurant, catering service, brewpub, wine tasting room, or bar, and clarifies the laws affecting those types of business. This title is a down-to-earth guide to the critical legal information that owners and managers of food and beverage businesses—and those who dream of owning or managing such a business—need to know. This book is as useful for those whose new business is still in the planning stages as it is for established food and beverage businesses. Topics include how to protect your trade secrets—including your recipes, tax rules for tips, the pros and cons of different types of business entities, borrowing money, going public, franchises, multilevel marketing opportunities, trademarks, leases, copyrights, patents, hiring and firing, writing a business plan, advertising, use of social media, insurance, collections, product liability and liability for the actions of customers who have had too much to drink, retirement plans, warranties and estate planning, ways to reduce income tax legally, as well

as how to find the right lawyer and accountant for your business. While this book is not intended to replace the reader's lawyer, it offers a clear, concise, and "plain English" overview of many of the legal issues relevant to those in the food and beverage industry.

In this thesis, interval type-2 fuzzy sets (IT2FSs) and interval neutrosophic sets (INSs) have been considered for all the proposed concepts. Fusion of information is an essential task to get the optimized solution for any real world problem. In this task, aggregation operators are playing an important role in all the fields. Since most of the realistic problems have uncertainty in nature, one can use the logic of fuzzy and neutrosophic theory.

For the entire proposed concepts interval based logic has been used as it handles more uncertainty.

Research Methodology for Engineers

Vikas Publishing House
Researchers in the field of engineering or physical sciences resort to experimental methods and/or simulation approaches as a part of their work. This book provides the relevant concepts and methods in a cohesive manner.

Organized into eighteen chapters, the book covers the basic concepts of research and the research process, and guides researchers to develop adequate skills and capabilities to prepare papers for publication in refereed journals, to write synopses of their research work and to face the oral examination and defend their theses confidently.

Maintenance of dependents, is a pious duty of human beings but in certain circumstances it is also a statutory liability with a corresponding right vested in the dependent, to legally enforce this duty through court of law. Entitlement to maintenance is a complex right in India. In certain relationships, the right

and corresponding liability is rigid but in other circumstances it is dependent upon the various other factors. The matter is further made complex by various personal laws in respect of citizens belonging to different religions and also a variety of forums. This book of about 800 pages attempts to assimilate all the aspects of this branch of family law, as far as possible. *Letters for All Occasions* BPB Publications
