Brand new book for the AZ-900 Azure Exam. All original material not found anywhere else. This book is designed for candidates looking to demonstrate foundational-level knowledge of cloud services and how those services are provided with Microsoft Azure. The AZ-900 exam is intended for

candidates with non-technical backgrounds, such as those involved in selling or purchasing cloud based solutions and services, or who have some involvement with cloud based solutions and services, as well as those with a technical background who have a need to validate their foundational-level knowledge around cloud services. Technical IT experience is not required, however, some general IT knowledge or experience would be beneficial. If you're not sure if you are ready to take the AZ-900 exam, book can test your knowledge. If you find something that you don't know, you can study a bit more on that area. Microsoft Azure is still the fastest growing large cloud platform. The opportunities for jobs in cloud computing are still out there, and finding good qualified people is the #1 problem that businesses have. If you're looking to change your career, this would be a good entry point into cloud computing.

Learn how to code while you write programs that effortlessly perform useful feats of automation! The second edition of this international fan favorite includes a brand-new chapter on input validation, Gmail and Google Sheets automations, tips for updating CSV files, and more. If you've ever spent hours renaming files or updating spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? Automate the Boring Stuff with Python, 2nd Edition teaches even the technically uninclined how to write programs that do in minutes what would take hours to do by hand—no prior coding experience required! This new, fully revised edition of Al Sweigart's bestselling Pythonic classic, Automate the Boring Stuff with Python, covers all the basics of Python 3 while exploring its rich library of modules for performing specific tasks, like scraping data off the Web, filling out forms, renaming files, organizing folders, sending email responses, and merging, splitting, or encrypting PDFs. There's also a brand-new chapter on input validation, tutorials on automating Gmail and Google Sheets, tips on automatically updating CSV files, and other recent feats of automations that improve your efficiency. Detailed, step-by-step instructions walk you through each program, allowing you to create useful tools as you build out your programming skills, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Boring tasks no longer have to take to get through—and neither does learning Python!

I Passed Azure Fundamentals AZ900 testimonials: 1- "This person successfully passed the AZ-900 exam last Friday. Despite facing questions they were unfamiliar with and feeling the exam was comprehensive, they managed to clear it. Their preparation involved resources from Microsoft Learn, Scott Duffy's Udemy course, and John Savill's crash course on YouTube." 2- "The exam turned out to be more challenging than anticipated. Upon passing, instead of elation, they were taken aback by the intricacy of the questions. Their six-day study regimen covered vast material, yet they felt only 20% of it appeared in the exam. The questions blended familiar and unfamiliar content, designed to be particularly challenging. They believe the rigorous format ensures only those truly knowledgeable can succeed. Fundamentals AZ900 Practice Exam - Question 22: Question: For an organization with numerous servers in an on-premises environment and considering migrating some of these servers to Azure with a pay-as-you-go subscription, which expenditure model is appropriate? Options: A. Capital Expenditure (CapEx) B. Operating Expenditure (OpEx) C. Public Cloud D. Azure Reservations Correct Answer: B. Operating Expenditure (OpEx) Explanation: When moving to a pay-as-you-go subscription model in Azure, the expenditure model transitions to Operating Expenditure (OpEx). In the OpEx model, costs are incurred for services as they are used, which is characteristic of cloud services and pay-as-you-go plans. This approach contrasts with the Capital Expenditure (CapEx) model, which involves upfront investment in physical infrastructure and is more typical of on-premises environments. The shift to OpEx allows for greater flexibility and scalability, as costs are based on actual usage rather than upfront investments. Public cloud is a deployment model, not an expenditure model. Azure Reservations can provide cost savings in Azure, but they are a method of payment within the OpEx model, rather than a separate expenditure model. Capital Expenditures or CapEx is defined as funds used allocated by organizations to obtain, upgrade, and maintain physical assets that are paid upfront, such as data centers. These expenditures are generally nonrecurring and result in the acquisition of permanent assets. The Azure Reservations service is an example of a CapEx model. Operating Expenditures or OpEx is defined as funds that are used by organizations for

their day-to-day operations. Think of OpEx as your electricity and water bill. The more you use, the higher the charges. Azure on-demand or pay-as-you-go pricing is an example of an OpEx model. Hence, this correct answer is: Operating expenditure.

**Exam AZ-900: Microsoft Certified Azure Fundamentals 57 Test Prep Questions** Ger Arevalo I have published this book with an agile release in mind. I want to get this out to market to get feedback. I don't know if these flash cards will help my fellow AZ-900 exam takers, but if it does sell, I will be constantly updating it with the latest info and terms from Microsoft. The first iteration will focus on the most valuable terms(MVP in agile terms). This book is optimized for mobile apps and devices. Every turn of the page will give you 1 side of a flash card. Another turn gives you the other

side of the card. I suggest going through the flash cards several times from beginning to end. This will test your ability to define the key terms from the definition. This digital flash card book is designed to be an ancillary to the classes, labs, and hands on practice that you have diligently worked on in preparing to obtain your AZ-900: Microsoft Certified Azure Fundamentals certification. Majority of the terms are taken directly from the Microsoft Learn website. It is meant as one of the end steps in your preparation for the AZ-900 exam. This book is short, but It will give you a good gauge of your readiness. Before we get started, we all have doubts when preparing to take an exam. What is your reason and purpose for taking this exam? Remember your reason and purpose when you have some doubts. Obstacle is the way. Control your mind, attitude, and you can control the situation. Persistence leads to confidence. Confidence erases doubts.
