“A haunting story of fragile female identity, sexually gained, violently lost” by the New York Times–bestselling author of *The Sexual Life of Catherine M.* (The New York Times Book Review). Catherine Millet’s erotic memoir *The Sexual Life of Catherine M.* was a landmark book—a portrait of a sexual life lived without boundaries and without a safety net. Described as “eloquent, graphic—and sometimes even poignant” by Newsweek, and as “[perhaps] one of the most erotic books ever written” by Playboy, it drew international attention for its audacity and the apparently superhuman sangfroid required of Millet and her partner, Jacques Henric, with whom she had an extremely public and active open relationship. Now, Millet’s follow-up answers the first book’s implicit question: How did you avoid jealousy? “I had love at home,” Millet explains, “I sought only

pleasure in the world outside.” But one day, she discovered a letter in their apartment that made it clear that Jacques was seriously involved with someone else. Jealousy details the crisis provoked by this discovery and Millet’s attempts to reconcile her need for freedom and sexual liberation with the very real heartache caused by Jacques’s infidelity. Jealousy delves into the world of emotion as evocatively as *The Sexual Life of Catherine M.* delves into the realm of the senses. Here is the paradoxical confession of a libertine who discovers that love, in any of its forms, can have a dark side. “An honest, brutal piece of confession and self-analysis.” —The Guardian

Though it’s only about the size of Texas, France presents an astonishing variety of landscapes to the aerial observer—each of which reveals itself in the pages of this breathtaking photographic journey. In 200 full-color photographs, Yann Arthus-Bertrand captures all the undulating curves and harmonious lines of this vibrant, verdant, sometimes rough but always generous land. Here is a France of green fields and red brick roofs, dotted with steeples and church towers, worn by the sea along its handsome coasts and rife with rolling hills. Here are the great French landmarks—the Pont du Gard, Notre Dame, Loire Valley castles, and Bordeaux vineyards, to name just a few, with accompanying text by journalist Patrick Poivre d’Arvor that makes each one come alive as if seen for the first time.

This volume comprises contributions originally presented at the 15th European Symposium on Languages for Special Purposes held at the University of Bergamo on 29 August - 2 September 2005. The volume is divided into four parts: Approaches to Terminological Theories; Terms in Discourse; Knowledge Elicitation, Ordering and Management; Term extraction and terminographical work. The research presented in the various contributions to this volume clearly indicates that terminology as an inter- and transdisciplinary field of knowledge is firmly developing its theoretical foundations and practical applications in accordance with and within the framework

of its overall goal: to ensure and to augment the quality of communication with professional content.

The delightful third book in the multimillion-copy internationally bestselling series Being up against the clock was a real problem for so many people, thought Hector. What could he possibly do to help them? First he tackled happiness. Then he took on love. And now Hector, our endearing young French psychiatrist, confronts the persistent march of time. His patients lament that there is not enough time in the day. Or they feel that life is passing them by. And in one case, a young boy turns the problem on its head: He's impatient to grow up! Hector himself is increasingly aware of time: He doesn't feel quite so young anymore, and the clock is ticking on his relationship with his beloved Clara. So as time flies, so does our wise and winsome hero in his latest adventure, traveling around the world to understand the past, the future, and how best to enjoy the present. **Cambridge School Dictionary** Teneues Publishing Company LP

This volume, which was originally published in Terminology 15:1 (2009), presents and reflects on experiences dealing with terminology training, from a theoretical, practical and professional perspective. Terminology is part of the programmes of several (post)graduate courses, such as Translating and Interpreting, Applied Languages, Information Science and other disciplines. Especially terminology practice has changed drastically over the years and training in terminology must adapt to this new reality. Drawing on years of experience in teaching this subject at various academic levels and in diverse ways, we explore what to teach about terminology, how to teach it, how it is learned, what experiences are put into practice with what result, and how to connect the knowledge taught at universities and other institutions to the practical skills that are required from professionals in different areas, e.g. translators, information scientists, knowledge engineers, with respect to their knowledge of terminology.

When Leon and Solange entered the church everyone was struck by the difference in height between them. Even though he was wearing heel inserts. However after their first child is born, Leon shrinks by 15 inches. This happens again after their second child is born, until Leon is little more than a Tom Thumb."

The aim of the present volume is to provide a present-day take on variation in terminology by looking forward and examining what leading scholars in the field are working on and where they are taking research in the field today. This reader is built around three themes arranged according to complementary points of view to stimulate thought on the subject of variation as it is approached today. The first theme, "The social dimension of variation", includes three contributions dealing with variation across different categories of speakers. This reflects not only the expert/layperson dichotomy but also other more original polarities as the emotional dimension and the issue of diastatic variation across LSPs. The second part of this reader puts forward different tools and methods to identify, describe and manage term variation. The third theme of this reader questions semantics of term variation through the topics of concept saturation, multidimensionality and metaphor. Variation, through this picture of current studies, proves to be the touchstone for the understanding of the major issues of terminology research today. The included papers draw on research in terminology carried out in different language communities - Spanish, French, Portuguese, Italian and Dutch in particular - thereby opening up a window on much of the research carried out in these cultural areas.
