Rent Cambridge University Press

You can choose several data access frameworks when building Java enterprise applications that work with relational databases. But what about big data? This hands-on introduction shows you how Spring Data makes it relatively easy to build applications across a wide range of new data access technologies such as NoSQL and Hadoop. Through several sample projects, you'll learn how Spring Data provides a consistent programming model that retains NoSQL-specific features and capabilities, and helps you develop Hadoop applications across a wide range of use-cases such as data analysis, event stream processing, and workflow. You'll also discover the features Spring Data adds to Spring's existing JPA and JDBC support for writing RDBMS-based data access layers. Learn about Spring's template helper classes to simplify the use of database-specific functionality Explore Spring Data's repository abstraction and advanced query functionality Use Spring Data with Redis (key/value store), HBase (column-family), MongoDB (document database), and Neo4j (graph database) Discover the GemFire distributed data grid solution Export Spring Data JPA-managed entities to the Web as RESTful web services Simplify the development of HBase applications, using a lightweight object-mapping framework Build example big-data pipelines with Spring Batch and Spring Integration

**Western Union and the Creation of the American Corporate Order, 1845-1893** Cambridge University Press

Haydn's Creation is one of the great masterpieces of the classical period. In this absorbing and original account the author places the work within the oratorio tradition, contrasting the theological and literary character of the English libretto with the Viennese milieu of the first performances. The complete text is provided in both English and German versions as a reference point for discussion of the design of the work and the musical treatment of the words. A more detailed musical chapter examines the work through the movement types it employs - arias and ensembles, recitative and choruses - distinguishing the Handelian model from Haydn's own classical idiom. Nicholas Temperley also discusses the changing performance traditions of this work, surveys the critical reception throughout its history and quotes from the most significant critical literature of the nineteenth and twentieth centuries.

The Creation, Hal Leonard Corporation

Chilly Gonzales is one of the most exciting, original, hard-to-pin-down musicians of our time. Filling halls worldwide at the piano in his slippers and a bathrobe—in any one night he can be dissecting the musicology of an Oasis hit, giving a sublime solo recital, and displaying his lyrical dexterity as a rapper. In his book about Enya, he asks: Does music have to be smart or does it just have to go to the heart? In dazzling, erudite prose Gonzales delves beyond her innumerable gold discs and millions of fans to excavate his own enthusiasm for Enya's singular music as well as the mysterious musician herself, and along the way uncovers new truths about the nature of music, fame, success and the artistic endeavour.

**Dinosaurs Before Dark** Random House Books for Young Readers

Despite the rise of computer gaming, millions of adults still play face to face role playing games, which rely in part on social interaction to create stories. This work explores tabletop role playing game (TRPG) as a genre separate from computer role playing games. The relationship of TRPGs to other games is examined, as well as the interaction among the tabletop module, computer game, and novel versions of Dungeons & Dragons. Given particular attention are the narrative and linguistic structures of the gaming session, and the ways that players and gamemasters work together to construct narratives. The text also explores wider cultural influences that surround tabletop gamers.

*The Invention of Tradition* Canon Press & Book Service

Explains how companies must pinpoint business strategies to a few critically important choices, identifying common blunders while outlining simple exercises and questions that can guide day-to-day and long-term decisions.

[Cauchy and the Creation of Complex Function Theory](#) Harvard Business Press

(Applause Libretto Library). Finally, an authorized libretto to this modern day classic! Rent won the 1996 Pulitzer Prize for Drama, as well as four Tony Awards, including Best Musical, Best Book, and Best Score for Jonathan Larson. The story of Mark, Roger, Maureen, Tom Collins, Angel, Mimi, JoAnne, and their friends on the Lower East Side of New York City will live on, along with the affirmation that there is "no day but today." Includes 16 color photographs of productions of Rent from around the world, plus an introduction ("Rent Is Real") by Victoria Leacock Hoffman.

*Economic Origins of Dictatorship and Democracy* Hal Leonard Corporation

A Choral Worship Cantata in SATB voicing composed by Franz Joseph Haydn, edited by Robert Shaw and Alice Parker.

**The Creation of Eve and Renaissance Naturalism** Cambridge University Press

A persuasive and passionate plea from two mental health professionals to ease use of the Diagnostic Statistical Manual of Mental Disorders under their belief that it is leading to an over-diagnosed society. For many health professionals, the Diagnostic Statistical Manual of Mental Disorders (DSM) is an indispensable resource. As the standard reference book for psychiatrists and psychotherapist everywhere, the DSM has had an inestimable influence on the way medical professionals diagnosis mental disorders in their patients. But with a push to label clients with pathological disorders in order to get reimbursed by insurance companies, the purpose of the DSM is no longer serving as a reference book. Instead, it is acting as a list of things that can qualify a patient's diagnosis. In Making Us Crazy, Stuart Kirk and Herb Kutchins evaluate how the DSM has become the influence behind diagnoses that assassinate character and slander the opposition, often for political or monetary gain. By examining how the reference book serves as a source to label every phobia and quirk that arises in a patient, Kirk and Kutchins question the overuse of the DSM by today's mental health professionals.

[Co-Creation in Theory and Practice](#) Cambridge University Press

A reconstruction of the creation of game theory in the twentieth century by John von Neumann and Oskar Morgenstern.

**Spring Data** B&H Publishing Group

Forty-seven vocal works from the 12th to the 17th centuries, including songs by Henry IV and Henry VIII as well as Thomas Tallis, William Byrd, Thomas Ravenscroft, Thomas Morley, and Thomas Weelkes.

*The Music of the Lord of the Rings Films* Cambridge University Press

An innovative look at the changing symbolic value of Chairman Mao badges, from the Cultural Revolution to the present day. Biography of a Chairman Mao Badge is a work of cultural history that contributes to our understanding not only of Chinese society but, more generally, of strategies people employ in responding to and transforming the meaning of propaganda campaigns and symbols.

*An English Medieval and Renaissance Song Book* Cambridge University Press

This work chronicles the rise of Western Union Telegraph from its origins in the helter-skelter ferment of antebellum capitalism to its apogee as the first corporation to monopolize an industry on a national scale. The battles that raged over Western Union's monopoly on nineteenth-century American telecommunications - in Congress, in courts, and in the press - illuminate the fierce tensions over the rising power of corporations after the Civil War and the reshaping of American political economy. The telegraph debate reveals that what we understand as the normative relationship

between private capital and public interest is the product of a historical process that was neither inevitable nor uncontested. Western Union's monopoly was not the result of market logic or a managerial revolution, but the conscious creation of entrepreneurs protecting their investments. In the process, these entrepreneurs elevated economic liberalism above traditional republican principles of public interest and helped create a new corporate order.

*The creation* Cambridge University Press

Creation in Six Days offers an exegetical, literary, and theological defense of the traditional interpretation of the Genesis account of six-day creation. Jordan's account is primarily designed to answer any approach to the text of Genesis, such as the increasingly popular Framework Hypothesis, that pits the text's literary features against its historical and narrative sense. Beyond his exegetical critique of several prominent positions, Jordan offers a constructive reading of the early parts of Genesis and also seeks to uncover the assumptions which attract people to the Framework Interpretation and similar views. The explanation, he says, lies in the acceptance of many of the questionable assumptions of modern science on the part of most Christians today, coupled with the pervasiveness of a gnostic or nonhistorical attitude toward the Christian faith.

*A Matter of Days* Edinburgh University Press

Eight-year-old Jack and his younger sister Annie find a magic treehouse, which whisks them back to an ancient time zone where they see live dinosaurs.

*Creation of the Ius Commune* Rutgers University Press

This book explores examples of this process of invention and addresses the complex interaction of past and present in a fascinating study of ritual and symbolism.

[Making Us Crazy](#) Courier Corporation

This book discusses in detail how medieval scholars reacted to the casuistic discussions in the inherited Roman texts, particularly the Digest of Justinian. It shows how they developed medieval Roman law into a system of rules that formed a universal common law for Western Europe. Because there has been little research published in English beyond grand narratives on the history of law in Europe, this book fills an important gap in the literature. With a focus on how the medieval Roman lawyers systematized the Roman sources through detailed discussions of specific areas of law.

**Sunday in the Park with George** "O'Reilly Media, Inc."

This book examines the dynamics of the semi-conductor industry in East Asia.

*ENYA* Harvard Business Press

"Haydn: The Creation" presents a thorough treatment of the genesis, structure, and performance implications of this perennial favorite. This volume draws upon recent research on the oratorio and on "The Creation" in particular. Incorporating the author's own research over the last 15 years, this volume traces the two-hundred-year history of the piece, analyzes its style, and brings together in a single source the relevant criticism and significant observations of the other specialists in this field, making it the definitive volume on this work for decades to come. Bruce MacIntyre is Associate Professor of Music at Brooklyn College and CUNY Graduate Center where he teaches general courses in musicology as well as specialized courses on late eighteenth-century music, the mass and oratorio, and the music of Haydn.

**Evangelical Lutheran Worship** "O'Reilly Media, Inc."

It is time to take heart and rework the scorecard. --

[Visualizing Blackness and the Creation of the African American Literary Tradition](#) Cambridge University Press

Creatio ex nihilo is a foundational doctrine in the Abrahamic faiths. It states that God created the world freely out of nothing - from no pre-existent matter, space or time. This teaching is central to classical accounts of divine action, free will, grace, theodicy, religious language, intercessory prayer and questions of divine temporality and, as such, the foundation of a scriptural God but also the transcendent Creator of all that is. This edited collection explores how we might now recover a place for this doctrine, and, with it, a consistent defence of the God of Abraham in philosophical, scientific and theological terms. The contributions span the religious traditions of Judaism, Christianity and Islam, and cover a wide range of sources, including historical, philosophical, scientific and theological. As such, the book develops these perspectives to reveal the relevance of this idea within the modern world.
