Dominoes: Two: Green Planet Pack Penguin UK
Winner of the 2020 PEN/Faulkner Award for Fiction, this intoxicating story of a teenage girl who trades her a middle-class upbringing for a quest for meaning in 1980s Mexico is “a surreal, captivating tale about the power of a youthful imagination, the lure of teenage transgression, and its inevitable disappointments” (Los Angeles Review of Books). One autumn afternoon in Mexico City, seventeen-year-old Luisa does not return home from school. Instead, she boards a bus to the Pacific coast with Tomás, a boy she barely knows. He seems to represent everything her life is lacking—recklessness, impulse, independence. Tomás may also help Luisa fulfill an unusual obsession: she wants to track down a traveling troupe of Ukrainian dwarfs. According to newspaper reports, the dwarfs recently escaped a Soviet circus touring Mexico. The imagined fates of these performers fill Luisa’s surreal dreams as she settles in a beach community in Oaxaca. Surrounded by hippies, nudists, beachcombers, and eccentric storytellers, Luisa searches for someone, anyone, who will “promise, no matter what, to remain a mystery.” It is a quest more easily envisioned than accomplished. As she wanders the shoreline and visits the local bar, Luisa begins to disappear dangerously into the lives of strangers on Zipolite, the “Beach of the Dead.” Meanwhile, her father has set out to find his missing daughter. A mesmeric portrait of transgression and disenchantment unfolds. Set to a pulsing soundtrack of Joy Division, Nick Cave, and Siouxsie and the Banshees, *Sea Monsters* is a brilliantly playful and supple novel about the moments and mysteries that shape us. “Aridjis is deft at conjuring the teenage swooniness that apprehends meaning below every surface. Like Sebald’s or Cusk’s, her haunted writing patrols its own omissions . . . The figure of the shipwreck looms large for Aridjis. It becomes a useful lens through which to see this book, which is self-contained, inscrutable, and weirdly captivating, like a salvaged object that wants to return to the sea.” —Katy Waldman, *The New Yorker*

A first novel.

Five Tales (new) Oxford

A Kirkus Reviews Best Book of the Year The witty and exuberant New York Times bestselling author and record-setting Jeopardy! champion Ken Jennings relays the history of humor in “lively, insightful, and crawling with goofy factlings,” (Maria Semple, author of *Where’d You Go Bernadette*)—from fart jokes on clay Sumerian tablets to the latest Twitter gags and Facebook memes. Where once society’s most coveted trait might have been strength or intelligence or honor, today, in a clear sign of evolution sliding off the trails, it is being funny. Yes, funniness. Consider: Super Bowl commercials don’t try to sell you anymore; they try to make you laugh. Airline safety tutorials—those terrifying laminated cards about the possibilities of fire, explosion, depressurization, and drowning—have been replaced by joke-filled videos with multimillion-dollar budgets and dance routines. Thanks to social media, we now have a whole Twitterverse of amateur comedians riffing around the world at all hours of the day—and many of them even get popular enough online to go pro and take over TV. In his “smartly structured, soundly argued, and yes—pretty darn funny” (Booklist, starred review) *Planet Funny*, Ken Jennings explores this brave new comedic world and what it means—or doesn’t—to be funny in it now. Tracing the evolution of humor from the caveman days to the bawdy middle-class antics of Chaucer to Monty Python’s game-changing silliness to the fast-paced meta-humor of *The Simpsons*, Jennings explains how we built our humor-saturated modern age, where lots of us get our news from comedy shows and a comic figure can even be elected President of the United States purely on showmanship. “Fascinating, entertaining and—I’m being dead serious here—important” (A.J. Jacobs, author of *The Year of Living Biblically*), *Planet Funny* is a full taxonomy of what spawned and defines the modern sense of humor.

Scientific endeavor is strongly discouraged, while remnant technology is locked away—hidden by a Church determined to prevent a new Armageddon. This is the world to which Benzamir Michael Mahmood must return. A descendant of the tribes who fled the planet during those ages old wars, he comes in pursuit of enemies from the far reaches of space. The technology he brings is wondrous beyond the imaginings of those he will meet, but can its potency match that of the Church's most closely guarded treasure? Exo OUP Oxford

The classic book on systems thinking—with more than half a million copies sold worldwide! "This is a fabulous book... This book opened my mind and reshaped the way I think about investing."—Forbes "Thinking in Systems is required reading for anyone hoping to run a successful company, community, or country. Learning how to think in systems is now part of change-

agent literacy. And this is the best book of its kind."—Hunter Lovins In the years following her role as the lead author of the international bestseller, *Limits to Growth*—the first book to show the consequences of unchecked growth on a finite planet—Donella Meadows remained a pioneer of environmental and social analysis until her untimely death in 2001. *Thinking in Systems* is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global. Edited by the Sustainability Institute's Diana Wright, this essential primer brings systems thinking out of the realm of computers and equations and into the tangible world, showing readers how to develop the systems-thinking skills that thought leaders across the globe consider critical for 21st-century life. Some of the biggest problems facing the world—war, hunger, poverty, and environmental degradation—are essentially system failures. They cannot be solved by fixing one piece in isolation from the others, because even seemingly minor details have enormous power to undermine the best efforts of too-narrow thinking. While readers will learn the conceptual tools and methods of systems thinking, the heart of the book is grander than methodology. Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas. She reminds readers to pay attention to what is important, not just what is quantifiable, to stay humble, and to stay a learner. In a world growing ever more complicated, crowded, and interdependent, *Thinking in Systems* helps readers avoid confusion and helplessness, the first step toward finding proactive and effective solutions.
