Worldwide, postal and delivery economics is the subject of considerable interest. The postal industry's business model is in drastic need of change. Notably, the European Commission and member states are still wrestling with the problems of implementing liberalization of entry into postal markets, addressing digital competition, and maintaining the universal service obligation. In the United States, the Postal Accountability and Enhancement Act of 2006 has, perhaps, exacerbated some of the problems faced by the United States Postal Service (USPS). Currently, the USPS has serious financial problems because of difficulties it faces in making changes and the failure of the Act to address problems that have been long-standing. Electronic competition is severe and affects post offices (POs) worldwide, which have been slow to address the threat. This book addresses this new reality and includes discussion of how POs may attempt to reinvent themselves. Parcels and packets will play a major role in developing new business models for postal operators. This book is of use not only to students and researchers interested in the field, but also to postal operators, consulting firms, utilities, regulatory commissions, Federal Government Departments and agencies of the European Union and other countries.

Public Buildings and Grounds ... Sterling Publishing Company
In organizations, accounting produces organizational knowledge that affects decision-making and managerial action. Companies placing importance on shareholder value sometimes tend to elevate accounting to a higher truth criterion for justifying managerial actions. Yet, the nature of accounting renders it

difficult to argue that accounting information necessarily produce a better basis for decision-making than arguments which are not based on accounting. This is because, as previous research has also argued, accounting counts some things but omits many others, while managers are accountable for much more than what accounting actually counts. Using a theoretical apparatus from Deleuze and Guattari, this book illustrates that accounting-based actions such as making management decisions, maintaining organisational responsibility and hierarchical control are manifestations of the ways in which accounting is composed. This concise introduction will be invaluable for researchers and advanced students of management accounting exploring responsibility accounting and accountability.

2018 CFR Annual Print Title 10, Energy, Parts 500-End Claitor's Law Publishing

Major home remodeling isn't for the faint of heart; there is huge potential for design problems, cost overruns, or just unsatisfactory workmanship. Here, a professional construction manager who masterminded the redesign at New York's famed Avery Fisher Hall as well as a massive institute-wide renovation of St. Luke's Hospital, offers an indispensable guide for homeowners who need to manage a large-scale renovation. There's advice on how to articulate your thoughts clearly to designers, architects, and contractors; tips on negotiating contracts; suggestions for protecting yourself from legal and financial threats; and help understanding warranty claims. Each step--from initial planning through the completed project--is covered in layman's terms, and sample contracts, floor plans, cost estimating worksheets and other forms are provided.

This guide describes the Meritorious Budget Awards Program recognizing excellence in school system budgeting awarded by the Association of School Business Officials. The award is designed to help school business administrators achieve a high standard of excellence in budget presentations. Chapters provide the expectations and relevant criteria used by the award

committee reviewing budget presentations, and they include a checklist and numerous exhibits from past presentations. (TEJ)
