 The capabilities set out here maintain the indicative planned investment in Defence signaled by the Defence Capability Plan 2016. However this Plan goes further, prioritising new investments to better address New Zealand's strategic environment, and highlighting investments which will be required in the longer term. The Plan will be delivered in a fiscally responsible manner, with the indicative capabilities and costs outlined here being subject to robust scrutiny prior to Cabinet consideration of business cases, and funding being available through the Budget process.

It is primarily to corporate rescue procedures and reforms adopted at the domestic level that this book is devoted. Individual chapters 'each written by an expert or team of experts from the country under scrutiny' consider recent developments and prospec.

Corporate Rescue Bloomsbury Publishing
 This report evaluates the Observance of the Basel Core Principles for Effective Banking Supervision in India. It highlights that the supervision and regulation by the Reserve Bank of India remain strong and have improved in recent years. A key achievement is implementation of a risk-

based supervisory approach that uses a complex supervisory assessment framework to guide the intensity of supervisory actions and the allocation of supervisory resources. Also, most of the Basel III framework has been implemented and cooperation arrangements, both domestically and cross-border, are now firmly in place. The system-wide asset quality review and the strengthening of prudential regulations in 2015 testify to the authorities' commitment to transparency and a more accurate recognition of banking risks.

Is democracy driven by citizens or by the citizen elite? Acclaimed sociologist and author Dipankar Gupta argues that at every historical juncture when democracy made significant advances, it was the citizen elite, or the elite of calling, who led the charge, often going against the grain of popular demands and sentiments. At its best, democracy does not reflect reality as much as it shapes and changes it. This requires active intervention by the citizen elite, who are not concerned with short-term electoral calculations but have a vision for strengthening democracy. They are the ones who set the agenda that the masses follow, thereby taking the country forward on the path of true democracy. As India has not delivered meaningfully in terms of universal health, education and livelihood, it too needs a band of citizen elite to initiate change. Dipankar Gupta argues that this change cannot be contemplated through the short-term rationality of elections, and needs visionaries to push it through-change can only be effected by 'revolution from above'. Incisive and relevant, this book provides empirical evidence to show how urgent it is to take democracy forward, and explains how best to accomplish it in the light of international historical evidence.

These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

Increased global demand for land posits the need for well-designed country-level land policies to protect long-held rights, facilitate land access and address any constraints that land policy may pose for broader growth. While the implementation of land reforms can be a lengthy process, the need to swiftly identify key land policy challenges and devise responses that allow the monitoring of progress, in a way that minimizes conflicts and supports broader development goals, is clear. The Land Governance Assessment Framework (LGAF) makes a substantive contribution to the land sector by providing a quick and innovative tool to monitor land governance at the country level. The LGAF offers a comprehensive diagnostic tool that covers five main areas for policy intervention: Legal and institutional framework; Land use planning, management and taxation; Management of public land; Public provision of land information; and Dispute resolution and conflict management. The LGAF assesses these areas through a set of detailed indicators that are rated on a scale of pre-coded statements (from lack of good governance to good practice). While land governance can be highly technical in nature and tends to be addressed in a partial and sporadic manner, the LGAF posits a tool for a comprehensive assessment, taking into account the broad

range of issues that land governance encompasses, while enabling those unfamiliar with land to grasp its full complexity. The LGAF will make it possible for policymakers to make sense of the technical levels of the land sector, benchmark governance, identify areas that require further attention and monitor progress. It is intended to assist countries in prioritizing reforms in the land sector by providing a holistic diagnostic review that can inform policy dialogue in a clear and targeted manner. In addition to presenting the LGAF tool, this book includes detailed case studies on its implementation in five selected countries: Peru, the Kyrgyz Republic, Ethiopia, Indonesia and Tanzania.

Financial Soundness Indicators (FSIs) are measures that indicate the current financial health and soundness of a country's financial institutions, and their corporate and household counterparts. FSIs include both aggregated individual institution data and indicators that are representative of the markets in which the financial institutions operate. FSIs are calculated and disseminated for the purpose of supporting macroprudential analysis--the assessment and surveillance of the strengths and vulnerabilities of financial systems--with a view to strengthening financial stability and

limiting the likelihood of financial crises. Financial Soundness Indicators: Compilation Guide is intended to give guidance on the concepts, sources, and compilation and dissemination techniques underlying FSIs; to encourage the use and cross-country comparison of these data; and, thereby, to support national and international surveillance of financial systems.

Fifteen in a series of annual reports comparing business regulation in 190 economies, Doing Business 2018 measures aspects of regulation affecting 10 areas of everyday business activity: • Starting a business • Dealing with construction permits • Getting electricity • Registering property • Getting credit • Protecting minority investors • Paying taxes • Trading across borders • Enforcing contracts • Resolving insolvency These areas are included in the distance to frontier score and ease of doing business ranking. Doing Business also measures features of labor market regulation, which is not included in these two measures. The report updates all indicators as of June 1, 2017, ranks economies on their overall "ease of doing business†", and analyzes reforms to business regulation †" identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being

used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 137 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,182 articles in peer-reviewed academic journals since its inception. Data Notes; Distance to Frontier and Ease of Doing Business Ranking; and Summaries of Doing Business Reforms in 2016/17 can be downloaded separately from the Doing Business website.
