Mini Down Under traces the history of one of New Zealand's - and the world's - best-loved cars. More versions of the Mini were available in New Zealand than anywhere else, and the launching of the iconic car in February 1960 was a larger-than-life event. In this lively and personal story, the author tracks the Mini's life in New Zealand, the connection between Kiwi racing driver Bruce McLaren and the birth of the Mini Cooper, the heady days of

competition success in the Antipodes, the local assembly and marketing of the classic original car and the eventual development into the latest generation Mini for a new century.

Climb inside these stunning muscle car drop-tops, straight from the classic era of American high-performance cars! Today's rarest, priciest, and most highly sought-after muscle cars are also the least practical. These are the striking convertibles of the 1960s and 1970s that were optioned out for drag racing. Wide-Open Muscle showcases these rare cars and proves that sometimes it pays to throw practicality out the window in order to make something purely cool and fun to drive. At the peak of drag racing popularity, it was common knowledge that racers needed the lightest, most rigid-framed cars available. Convertibles represent the exact opposite of that description, so it's amazing that these drop tops ever emerged amid the circle of full-throttle dragsters. While typical convertible drivers cruised around

listening to the latest Lovin' Spoonful release in the eight-track tape deck, these muscle-car convertibles were equipped for rock 'n' roll speed. These topless muscle cars are so rare because few people had the dedication (or money) to buy a vehicle this impractical. They're valuable because they represent the absolute extreme of the entire muscle-car genre. All the cars in Wide-Open Muscle are shot in similar fashion, studio-style with a black background using a process known as light painting. It is the ultimate portrayal of the ultimate muscle cars.

WALNECK'S CLASSIC CYCLE TRADER, SEPTEMBER 2004 Harley-Davidson

What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas? The Gendered Motorcycle answers

such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender. Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts.
