Moshe Shokeid narrates his experiences as a member of AD KAN (NO MORE), a protest movement of Israeli academics at Tel Aviv University, who fought against the Israeli occupation of Palestinian territories, founded during the first Palestinian Intifada (1987-1993). However, since the assassination of Prime Minister Rabin and the later obliteration of the Oslo accord, public manifestations of dissent on Israeli campuses have been

remarkably mute. This chronicle of AD KAN is explored in view of the ongoing theoretical discourse on the role of the intellectual in society and is compared with other account of academic involvement in different countries during periods of acute political conflict.

This sixth edition uses a slightly changed title, Text and Math into LaTeX, to emphasize the importance of text in mathematical/scientific composition. Sections that contained commands no longer much

needed (such as `\includeonly`) and the introductory sections to PDF (now ubiquitous) have been omitted. Many sections are now enhanced with discussion of new and useful packages. An occasional encouragement for the reader to consult ChatGPT for confirmation on various points illustrates the positive relationship between ChatGPT and LaTeX. The new Chapter 17 describes recent developments that enhance, or replace, BibTeX; the new Appendix C, introduces the reader to ChatGPT.
