Education Through Work Dissertations-G  
 Food Fiction is all you need to get healthy,  
 regain your shape and have the energy  
 your body is dying for. You too can benefit  
 from all the small strategies that have  
 helped thousands of our clients at Free  
 Form Fitness personal training centers to  
 regaining their health.  
*Ubiquitous Computing in Education* Pfeiffer

Digital technology has radically altered the  
 way in which we live and work, but has not  
 had a substantial impact on education.  
 Ubiquitous Computing in Education  
 explores the educational potential of  
 ubiquitous computing initiatives that make  
 digital tools available to students and  
 teachers. Combining theory, research, and  
 practice, this volume paints a broad  
 picture of the field of ubiquitous  
 computing in education, which focuses on  
 the availability of digital tools for teachers  
 and students to use anywhere and

anytime to support teaching and learning.  
 The book illustrates how to use theory and  
 research to enhance technology  
 integration, teaching practices, and  
 student achievement. The significance of  
 ubiquitous computing for teaching and  
 learning is highlighted, as the text  
 discusses why it is important, what it looks  
 like, what the research tells us about it,  
 and how ubiquitous computing can work in  
 different types of learning environments  
 today and in years to come. This book is of  
 interest to researchers and graduate

students in educational technology, as well as teachers, administrators, policymakers, and industry leaders who can use the text to make essential decisions related to their respective roles in education.

This volume constitutes the refereed proceedings of the 6th International Conference on Cross-Cultural Design, CCD 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCI International 2014, held in Heraklion, Crete, Greece, jointly with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCI 2014 conferences was carefully reviewed and selected from numerous submissions. The papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. They thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The 76 papers included in this volume deal with the following topics: cross-cultural product

and service design; cross-cultural issues in interaction; social aspects and implications of cross-cultural design; cross-cultural issues in e-commerce, marketing and branding; cross-cultural design for knowledge sharing and learning; cross-cultural design for the smart city and cross-cultural design for creativity.

**PROPHECIES for the End of the World**  
Springer

Smart trainers know that games and activities can involve adults in learning like no other instructional method and no one knows more about games than Sivasailam "Thiagi" Thiagarajan. In this must-have resource, Thiagi shows you how to customize more than thirty different kinds of games -- games that fit the circumstances perfectly and that can be designed in mere minutes.

This journal subline serves as a forum for stimulating and disseminating innovative research ideas, theories, emerging technologies, empirical investigations, state-of-the-art methods, and tools in all different genres of edutainment, such as game-based learning and serious games, interactive storytelling, virtual learning environments, VR-based education, and related fields. It covers aspects from educational and game theories, human-computer interaction, computer graphics, artificial intelligence, and systems design. This volume contains a selection of 12 outstanding contributions from Edutainment 2010, the 5th Int. Conference on E-Learning and Games, held in China in August 2009. The main focus of these papers is on e-learning system and applications, game techniques for learning, and virtual reality techniques for

entertainment. In addition, 10 regular papers are included, which focus on virtual reality and game systems for learning and animation and interaction for entertainment.

**Transactions on Edutainment IV** Edwin Mellen Press

Extremely accurate prophecies about the end of the world by Our Saints. In this edition, you will find a (back-)translation of some of the prophecies and the instructions of famous Orthodox Saints and hermits. You will have the opportunity to read the words of people who have long since left this world. The words they have left, as prophecies and instructions to us poor and fools are greatly valuable in strengthening our faith and instruction and

confirmation of the authenticity and truthfulness of the Orthodox Christianity as a true path to God. Some of the translations of the texts contain specific prophecies related with the lands of Serbia, Russia and Greece. However, many of them apply to all of us, modern Orthodox Christians, as well as to all people on earth. Their words are a warning of a bleak future that awaits us and our descendants.

*Digital Forensics and Cyber Crime* Springer  
This book contains a selection of thoroughly refereed and revised papers from the Fourth International ICST Conference on Digital Forensics and Cyber Crime, ICDF2C 2012, held in October 2012

in Lafayette, Indiana, USA. The 20 papers in this volume are grouped in the following topical sections: cloud investigation; malware; behavioral; law; mobile device forensics; and cybercrime investigations.
