 Reflecting the growth and increasing global importance of the Spanish language, The Handbook of Hispanic Linguistics brings together a team of renowned Spanish linguistics scholars to explore both applied and theoretical work in this field. Features 41 newly-written essays contributed by leading language scholars that shed new light on the growth and significance of the Spanish language Combines current applied and theoretical research results in the field of Spanish linguistics Explores all facets relating to the origins, evolution, and geographical variations of the Spanish language Examines topics including second language learning, Spanish in the classroom, immigration, heritage languages, and bilingualism
Routledge Encyclopedia of Narrative Theory Springer
 Border clearance processes by customs and other agencies are among the most important and problematic links in the global supply chain. Delays and costs at the border undermine a country's

competitiveness, either by taxing imported inputs with deadweight inefficiencies or by adding costs and reducing the competitiveness of exports. This book provides a practical guide to assist policy makers, administrators, and border management professionals with information and advice on how to improve border management systems, procedures, and institutions.

The Library Journal Elsevier

The rapid growth of diversity within U.S. schooling and the heightened attention to the lack of equity in student achievement, school completion, and postsecondary attendance has made equity and diversity two of the principle issues in education, educational leadership, and educational leadership research. The Handbook of Research on Educational Leadership for Equity and Diversity is the first research-based handbook that comprehensively addresses the broad diversity in U.S. schools by race, ethnicity, culture, language, gender, disability, sexual identity, and class. The Handbook both highly values the critically important strengths and assets that diversity brings to the United States and its schools, yet at the same time candidly critiques the destructive deficit thinking, biases, and prejudices that undermine school success for many groups of students. Well-known chapter authors explore diversity and related inequities in schools and the achievement

problems these issues present to school leaders. Each chapter reviews theoretical and empirical evidence of these inequities and provides research-based recommendations for practice and for future research. Celebrating the broad diversity in U.S. schools, the Handbook of Research on Educational Leadership for Equity and Diversity critiques the inequities connected to that diversity, and provides evidence-based practices to promote student success for all children.
Natural Resources, Socio-Ecological Sensitivity and Climate Change in the Volta-Oti Basin, West Africa Springer Nature

This volume examines when and how Latinas run for political office at the national and state level. Contributors further this analysis by examining the ways Latinas are covered in the news, how they are compared to other political candidates, and how they act once in the legislature.

Index Medicus Springer Nature

This book constitutes the refereed post-conference proceedings of the 6th International Conference on Advancement of Science and Technology, ICAST 2018, which took place in Bahir Dar, Ethiopia, in October 2018. The 47 revised full papers were carefully reviewed and selected from 71 submissions. The papers present economic and technologic developments in modern

societies in five tracks: agro-processing industries for sustainable development, water resources development for the shared vision in blue Nile basin, IT and computer technology innovation, recent advances in electrical and computer engineering, progresses in product design and system optimization.

The vast majority of plastic products are made from petroleum-based synthetic polymers that do not degrade in a landfill or in a compost-like environment. Therefore, the disposal of these products poses a serious environmental problem. An environmentally-conscious alternative is to design/synthesize polymers that are biodegradable. Biodegradable polymers for industrial applications introduces the subject in part one by outlining the classification and development of biodegradable polymers with individual chapters on polyhydroxyalkanoates, polyesteramides and thermoplastic starch biodegradable polymers and others. The second part explores the materials available for the production of biodegradable polymers. Polymers derived from sugars, natural fibres, renewable forest resources, poly(lactic acid) and protein-nanoparticle composites will be looked at in detail in this section. Part three looks at the properties and mechanisms of degradation, prefacing the subject with a chapter on current standards. The final part explores opportunities for industrial applications, with chapters on packing, agriculture and biodegradable polycaprolactone foams in supercritical carbon dioxide. Biodegradable polymers for industrial applications explores the fundamental concepts concerning the development of biodegradable polymers, degradable polymers from sustainable sources, degradation and properties and industrial applications. It is an authoritative book that will be invaluable for academics, researchers and policy makers in the industry.

With Mande Music, Eric Charry offers the most comprehensive source available on one of Africa's richest and most sophisticated music cultures. Using resources as disparate as early Arabic travel accounts, oral histories, and archival research as well as his own extensive studies in Mali, Guinea, Senegal, and the Gambia, Charry traces this music culture from its origins in the thirteenth-century Mali empire to the recording studios of Paris and New York. He focuses on the four major spheres of Mande music—hunter's music, music of the jelis or griots, jembe and other drumming, and guitar-based modern music—exploring how each evolved, the types of instruments used, the major artists, and how each sphere relates to the others. With its maps, illustrations, and musical transcriptions as well as an exhaustive bibliography, discography, and videography, this book is essential reading for those seeking an in-depth look at one of the most exciting, innovative, and deep-rooted phenomena on the world music scene. A compact disc is available separately.

Archives Internationales de Photogrammétrie Et de Télédétection University of Chicago Press Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

In this book, Ana Y. Ramos-Zayas explores how Puerto Ricans in Chicago construct and perform nationalism. Contrary to characterizations of nationalism as a primarily unifying force, Ramos-Zayas finds that it actually provides the vocabulary to highlight distinctions along class, gender, racial, and generational lines among Puerto Ricans, as well as between Puerto Ricans and other Latino, black, and white populations. Drawing on extensive ethnographic research, Ramos-Zayas shows how the performance of Puerto Rican nationalism in Chicago serves as a critique of social

inequality, colonialism, and imperialism, allowing barrio residents and others to challenge the notion that upward social mobility is equally available to all Americans—or all Puerto Ricans. Paradoxically, however, these activists' efforts also promote upward social mobility, overturning previous notions that resentment and marginalization are the main results of nationalist strategies. Ramos-Zayas's groundbreaking work allows her here to offer one of the most original and complex analyses of contemporary nationalism and Latino identity in the United States.

Biodegradable polymers for industrial applications Routledge

A collection of miscellaneous international publications related to maternal and child welfare collected by Richard Bolt, the founder of the University of California, Berkeley, School of Public Health. Volumes are collated alphabetically by country of origin of each publication.

Monarchia Lusytana Natural Resources, Socio-Ecological Sensitivity and Climate Change in the Volta-Oti Basin, West Africa

This book presents the outcome of an interdisciplinary and international workshop supported by the Volkswagen Stiftung (funding line 'Knowledge for Tomorrow') on the topic of 'Natural Resources, Socio-Ecological Sensitivity and Climate Change in the Volta-Oti Basin, West Africa'. The conference was jointly organised by Goethe-University Frankfurt (Germany) and the University of Kara (Togo) held from March 6 to 8, 2019 in northern Togo. It aimed to strengthen capacities of junior scientists from the sub-region, exchange and mobilise theoretical and methodological background from various scientific fields (Botany, Construction, Geology, Geography, Infrastructure, Politics, Remote Sensing, Sociology and Urban Planning). One goal was to deliver reliable elements for ongoing and profound environmental analyses that lie outside the common questions of the academic and civil society stakeholders. Ecosystem fragmentation and deforestation in West Africa are mainly triggered by humans such as agriculture and small-scale forest disturbances for charcoal and firewood production. Increasing population pressure, declining of carrying capacity and demand for agricultural land caused the reduction of land conservation capacities, even in protected areas. The complexity of interactions between environmental and socio-ecological systems and subsequent effects (sensitivity) has raised ongoing international awareness in light of ongoing climate change. By the example of natural resources, land use and stakeholders' perceptions within the Volta-Oti Basin the book's proceedings present, discuss and distribute new findings that will sustainably stimulate the international debate. The workshop also intended to overcome national borders and language barriers between the Anglophone (Ghana) and the Francophone (Benin, Burkina Faso, Ivory Coast, Togo) research communities, and supported better West African cooperation and networking. The young as well as the established partners formed new collaborations, and the event at the University of Kara (Togo) was a truly unique opportunity for all involved, not only to discuss science, but also to assess applied and best future management practices for the Oti-Volta Basin in West Africa.

Proceedings of the first National Symposium on Sickle Cell Disease University of Chicago Press

"Latin American journalism is currently experiencing some important transformations, with potential changes to how news is produced, shared, financed and consumed. This book provides a comprehensive overview of current journalism in Latin America, contextualized by global literature and regional empirical evidence. It is an important addition to our understanding of digital journalism and a must-read for those interested in journalism in Latin America." Dr. Vanessa de Macedo Higgins Joyce, Texas State University, USA This book explores innovative approaches to digital and data journalism in Latin America, brought by both legacy media and newcomers to the industry, with the purpose of examining this changing media landscape. As part of the Global South, Latin America has shown significant influence in the promotion of data and digital technologies applied to journalism in recent years. In this region, news entrepreneurs are becoming an essential source of innovation in news production, circulation, and distribution. The book considers news media, particularly in Latin America, as an open set of practices intertwined in the evolution of technology. It discusses the transformation of the Latin American news media ecosystem and considers how it has shaped the industry despite local differences. The study fills a significant gap in academic scholarship by addressing the multiple external factors, mainly political and economic, which have contributed to the relative lack of studies on the patterns of journalism in this region. Ramón Salaverría is Associate Dean of Research at the School of Communication, University of Navarra, Spain, where he heads the Digital News Media Research Group. Author of

over 200 scholarly publications, his research focuses on digital journalism and media convergence, both in national and international comparative studies. Mathias-Felipe de-Lima-Santos is a researcher at the University of Navarra, Spain, under the JOLT project, a Marie Skłodowska-Curie European Training Network funded by the European Commission's Horizon 2020. Previously, he was a Visiting Researcher at the Queensland University of Technology, Australia. He researches changing journalistic practice with a particular focus on business models, data, and novel technologies.

This remarkable history tells the story of the independent city-republic of Basel in the nineteenth century, and of four major thinkers who shaped its intellectual history: the historian Jacob Burckhardt, the philologist and anthropologist Johann Jacob Bachofen, the theologian Franz Overbeck, and the philosopher Friedrich Nietzsche. "Remarkable and exceptionally readable . . . There is wit, wisdom and an immense erudition on every page."—Jonathan Steinberg, *Times Literary Supplement* "Gossman's book, a product of many years of active contemplation, is a tour de force. It is at once an intellectual history, a cultural history of Basel and Europe, and an important contribution to the study of nineteenth-century historiography. Written with a grace and elegance that many aspire to, few seldom achieve, this is model scholarship."—John R. Hinde, *American Historical Review*

Border Management Modernization

Against a background of calls to prioritise the improvement of financial inclusion in Africa, this book provides an analysis of current financial inclusion measures in Southern Africa. Evaluating the existing strengths and weaknesses of financial inclusion in Africa, it identifies opportunities to improve inclusive financial services and aid poverty reduction in the region. With a focus on South Africa, Namibia, Botswana, and Zimbabwe as case studies for assessing current financial inclusion in the context of particular challenges faced by unbanked and underbanked customers, who are easy targets for cybercriminals due to low levels of digital literacy, it looks into the regulation and promotion of financial inclusion in Southern Africa. The book explores financial inclusion in the context of digital transformation in the 21st century, examining the regulation and promotion of financial inclusion in the context of digital transformation, as well as the challenges related to financial inclusion. Suggesting improvements to aspects of company law, securities and financial markets in the Southern African Development Community region, the book offers a comprehensive study on the regulation and promotion of financial inclusion in the Southern African Development Community region. It will be essential reading for students and academics researching financial inclusion, international economic law and development.
