Fraud committed against the elderly has reached epidemic proportions, and the problem will only worsen as a large segment of the American population approaches retirement age. This book explores the disturbing rise in these offenses--crimes aimed at a vulnerable segment of society that is often unable to overcome the consequences--with an eye towards helping seniors protect themselves. This handbook first defines fraud, then discusses why the elderly are targeted, the growing scope of the problem, and why these crimes often go unreported or unsolved. The second section clearly explains 28 of the most common types of fraud--including home improvement scams, health frauds, identity theft and magazine sales--in a manner that allows readers to recognize and avoid the predatory actions of others (whether strangers, friends, or even family members). The third section provides a list of resources and actions to take and for those who believe themselves to be the victim of fraud. The book also contains a list of related acronyms, an index and a bibliography.

Child identity theft is the fastest growing type of identity theft, a crime that affects some 10 million people annually. Each year more than 500,000 children are affected by identity theft – half of them under age six. Countless other cases go unreported because the thief is a relative or parent of the victim. This devastating crime can wreak havoc on a child's future opportunities; it can be difficult to prove, and even harder to undo the damage that has been done. Child Identity Theft speaks to parents everywhere, the majority of whom have no idea that their children's identities have become such prime targets for thieves and criminals. Here, a veteran law enforcement professional and expert in child identity theft offers parents, educators, law enforcement officials, and others who care for or work with children an inside look at the ways in which children are vulnerable to identity thieves. Chappell presents the vital information in a question and answer format, offering not just information about how child identity theft happens, but also how to prevent it from happening, and what to do if it does. Among other things, Child Identity Theft explains: how a loophole in the national credit reporting system allows criminals to target innocent children for their creditworthiness; the variety of forms that child identity theft can take; the hidden techniques that thieves use to gain children's identities and personal information; which children are at a higher risk for identity theft; and how an increasing number of child identity thefts are perpetrated by parents and relatives. This book reveals the reality of child identity theft and the steps we all should take to protect our children and ourselves. How many victimized children are out there out there waiting to be discovered? Has your child been victimized? One hopes not, but if so, this book will give you the tools to find out and get help.

In this powerful and "engrossing" memoir, identity theft expert Axton Betz-Hamilton tells the shocking story of how her family was destroyed by the actions of an anonymous criminal (The New York Times). When Axton Betz-Hamilton was 11 years old, her parents both had their identities stolen. This was before the age of the Internet—authorities and banks were clueless and reluctant to help Axton's parents. Convinced that the thief had to be someone they knew, Axton and her parents completely cut off the outside world. As a result, Axton spent her formative years crippled by anxiety, quarantined behind the closed curtains in her childhood home. Years later, Axton discovered that she, too, had fallen prey to the identity thief. The Less People Know About Us is a cautionary tale, but not one without hope as Axton looks back on the dysfunctional childhood that led to her desire to help this from happening to others.
