Handbook of Laboratory Health and Safety Measures Springer Science & Business Media
"On a niqué l'économie mondiale, mais on s'est bien amusé" Un ancien de Boo.com Ills ne se sont pas contentés de spéculer sur des actions, mais sur les entreprises elles-mêmes, ces " start-up " créées à tour de bras dans l'espoir de plus-values financières. Entrepreneurs en herbe, grands industriels, investisseurs, ils étaient prêts à tout pour en être... Ce livre raconte le dévoiement d'une innovation majeure, l'Internet, par les marchés financiers. Aujourd'hui, les langues se délient, les anecdotes les plus stupéfiantes foisonnent pour expliquer de l'intérieur comment un secteur d'activité naissant a pu drainer tant de financements, comment des entreprises nées des projets les plus incongrus ont pu se développer à des vitesses jamais atteintes dans le monde des affaires, comment certaines se sont introduites en Bourse avant d'avoir atteint une année d'existence. Avec l'Internet, la Bourse a perdu ses repères. En orchestrant la grande vogue de la " nouvelle économie ", les marchés se sont déconnectés de la réalité économique et ont plongé dans l'instabilité. Ils n'en sont toujours pas sortis. Aujourd'hui, il est couramment admis que la nouvelle économie était un mirage. La thèse défendue ici est un peu différente : elle l'est devenue lorsque s'y sont engouffrés ceux qu'on a appelés les " friconautes ", pour qui seule comptait la perspective de l'argent facile.

Grande distribution, commerce traditionnel : quelle concurrence ? Springer Nature
Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

Rebalancing Society McGill-Queen's Press - MQUP

The first edition of The Paris System for Reporting Urinary Cytology introduced a completely new paradigm for detecting bladder cancer by urine cytology. This system concentrated on defining morphological characteristics of the most clinically significant form of bladder cancer, High Grade Urothelial Carcinoma. This new approach has been widely accepted throughout the world, and has become part of the daily practice of cytology. Considering that the first edition of The Paris System (TPS) introduced a new model of urinary cytodiagnosis, verification and expansion of initial material and data were anticipated. Based on evolving knowledge and readership requests, the group of

highly experienced authors have created a new edition of TPS. This second edition includes areas and issues not originally covered. A new chapter on urine cytology of the upper tract, a rarely addressed topic, has been introduced. Furthermore, the issue of cellular degeneration is discussed in the criteria of all diagnostic categories. Examples of standardized reports are included in each chapter. Most importantly, a separate chapter presents data defining the risk of malignancy (ROM) for each diagnostic category to inform clinical management. New high quality images augment those of the first edition to better illustrate diagnostic clues and potential pitfalls. In addition to chapters on diagnostic criteria, current concepts of pathogenesis of bladder cancer, specimen adequacy and preparation, and ancillary tests are covered in separate chapters. A bonus to the volume is a comprehensive history of urine as the earliest diagnostic sample of human disease, richly illustrated with artworks from major museums. Written by internationally recognized authorities, this comprehensive and evidence-based guide to urine cytology is supported by the newest data confirming the original concept and significance of diagnostic criteria defining High Grade Urothelial Carcinoma. TPS is an essential tool for anyone who is practicing urinary cytology, including cytotechnologists, pathologists-in-training and practicing pathologists. This book should find a place in every cytology laboratory throughout the world. The Concept has been endorsed by the American Society of Cytopathology, and the International Academy of Cytology.

In this historical volume Salvatore Califano traces the developments of ideas and theories in physical and theoretical chemistry throughout the 20th century. This seldom-told narrative provides details of topics from thermodynamics to atomic structure, radioactivity and quantum chemistry. Califano's expertise as a physical chemist allows him to judge the historical developments from the point of view of modern chemistry. This detailed and unique historical narrative is fascinating for chemists working in the fields of physical chemistry and is also a useful resource for science historians who will enjoy access to material not previously dealt with in a coherent way.

Economie et politique Cengage Learning

For the past twenty years feminist grass-root movements, professionals, and researchers have shown how the social construction of gender relations interacts with all forms of imperialism to mould the dominant ideologies of development. Based on a constant dialogue between theory and practice, research and action, their analyses of society and international development begin with women's experience and aim at policies and actions directed toward social change and the empowerment of women.

This publication presents fascinating new findings on ancient Romano-Egyptian funerary portraits preserved in international collections. Once interred with mummified remains, nearly a thousand funerary portraits from Roman Egypt survive today in museums around the world, bringing viewers face-to-face with people who lived two thousand years ago. Until recently, few of these paintings had undergone in-depth study to determine by whom they were made and how. An international collaboration known as APPEAR (Ancient Panel Paintings: Examination, Analysis, and Research) was launched in 2013 to promote the study of these objects and to gather scientific and historical findings into a shared database. The first phase of the project was marked with a two-day conference at the Getty Villa. Conservators, scientists, and curators presented new research on topics such as provenance and collecting, comparisons of works across institutions, and scientific studies of pigments, binders, and supports. The papers and posters from the conference are collected in this publication, which offers the most up-to-date information available about these fascinating remnants of the ancient world. The free online edition of this open-access publication is available at www.getty.edu/publications/mummyportraits/ and includes zoomable illustrations and graphs. Also available are free PDF, EPUB, and Kindle/MOBI downloads of the book.

L'Economie de la Réunion Springer Science & Business Media

This handbook provides a resource for those already familiar with some kinds of micro-particles who wish to learn more about others, or for those just starting out in the study of microremains who wish to have a broad understanding about microscopic archaeology. Topics covered in this handbook include diatom microfossils, starch granules, pollen grains, phytoliths, natural fibers, volcanic glass, minerals, insect remains, and feathers. Archaeological investigations increasingly rely on specialist identification of microscopic remnants found in sites. These micro-particles can provide information about the site environment and human activities that may not be apparent from artifacts and materials preserved on the macro-scale, and have given us new, and often high-profile, information about our past. The investigation of this "invisible archaeology" - that is, invisible to the naked eye - is still somewhat new, and generally each kind of micro-particle is studied individually. Researchers become experts in a narrow range of micro-particle types, but may be less familiar with, or even completely unaware of, the multitude of other forms that are frequently encountered in archaeological samples. This handbook's accessible approach is suitable for those at the beginner level.

This in-depth preparation for both AP economics exams provides a detailed review of all test topics. Includes two full-length practice tests--one in Microeconomics and one in Macroeconomics--with all test questions answered and explained.

Revue internationale de la documentation Getty Publications

During the past two decades, many books, governmental reports and regulations on safety measures against chemicals, fire, microbiological and radioactive hazards in laboratories have been

published from various countries. These topics have also been briefly discussed in books on laboratory planning and management. The application of various scientific instruments based on different ionizing and non-ionizing radiations have brought new safety problems to the laboratory workers of today, irrespective of their scientific disciplines, be they medicine, natural or life sciences. However, no comprehensive laboratory handbook dealing with all these hazards, some of which are recently introduced, had so far been available in a single volume. Therefore, it was thought worthwhile to publish this Handbook on safety and health measures for laboratories, with contributions from several experts on these subjects. As this second edition of the Handbook, like the first edition, is a multi-author volume, some duplication in content among chapters is unavoidable in order to maintain the context of a chapter as well as make each chapter complete. An attempt has also been made to maintain the central theme, which is how to work in a laboratory with maximum possible environmental safety.

Revue générale des sciences pures et appliquées et bulletin de l'Association française pour l'avancement des sciences Springer Nature

Enough of the imbalance that is causing the degradation of our environment, the demise of our democracies, and the denigration of ourselves. Enough of the pendulum politics of left and right and paralysis in the political center. We require an unprecedented form of radical renewal. In this book Henry Mintzberg offers a new understanding of the root of our current crisis and a strategy for restoring the balance so vital to the survival of our progeny and our planet. With the collapse of the communist regimes of Eastern Europe, Western pundits declared that capitalism had triumphed. They were wrong—balance triumphed. A healthy society balances a public sector of respected governments, a private sector of responsible businesses, and a plural sector of robust communities. Communism collapsed under the weight of its overbearing public sector. Now the “liberal democracies” are threatened—socially, politically, even economically—by the unchecked excesses of the private sector. Radical renewal will have to begin in the plural sector, which alone has the inclination and the independence to challenge unacceptable practices and develop better ones. Too many governments have been co-opted by the private sector. And corporate social responsibility can't compensate for the corporate social irresponsibility we see around us “They” won't do it. We shall have to do it, each of us and all of us, not as passive “human resources,” but as resourceful human beings. Tom Paine wrote in 1776, “We have it in our power to begin the world over again.” He was right then. Can we be right again now? Can we afford not to be?

In addressing the pervasive problem of hunger in the developing world, reliable information on food insecurity is essential for effectively targeting assistance, developing interventions, and evaluating progress. Yet arriving at an accurate and comparable measure of food insecurity remains a challenge. This report introduces new estimates of food insecurity based on food acquisition data collected as part of national household expenditure surveys (HESs). The report explores the extent and location of food insecurity, the scientific merit of estimates derived from HES food data, the differences between HES-based estimates and those reported by the Food and Agriculture Organization of the United Nations (FAO), and—ultimately—how HES data can be used to improve the accuracy of the FAO estimates currently used to monitor progress toward reducing hunger

Discover what it takes to create a sustainable competitive advantage in management and business today with this straightforward, powerful strategic management resource. *COMPETING FOR ADVANTAGE, 3E* focuses specifically on the issues most important to today's current or future practitioner. The book details the processes and tools you need to better understand and effectively contribute to your organization's strategic management process. Applied examples illustrate the latest thinking, practices, and research in strategic management today with in-depth discussions that examine critical topics such as innovation, professional service and crisis management. Access to relevant cases, a focus on the emerging issues such as ethics, and an emphasis on technology throughout prepare you for success in the fast-paced, ever-changing global economy in which today's firms compete. Take your students to a new level of understanding strategic management concepts and practices with *COMPETING FOR ADVANTAGE, 3E*. Straightforward, focused, and concise, this edition presents the latest strategic management research and practices, now with more in-depth discussions of the most current strategic topics in business today. Detailed real-life examples and instant access to relevant cases keep the book focused on issues most important to current or future practitioners. Crafted to meet the special needs to MBA and executive MBA students, the book details the processes and tools used in strategic analysis to create a sustainable competitive advantage. Full chapters on strategic leadership, corporate governance, and a new chapter on real options examine issues most critical in today's business environment. Comprehensive new instructor support with electric solutions help you effectively prepare a powerful course that addressed traditional and relevant emerging topics that are shaping strategic management today. Résumé en français : « Le Droit c'est l'instrument de réalisation d'un choix économique qui

prolonge, lui-même, un choix politique fondamental » écrivait le Professeur Jean-Marc MOUSSERON. Cet ouvrage propose une analyse des différentes lois depuis 1945 qui constituent le droit économique. L'auteur soutient que le droit économique sert des choix politiques comme la relance du pouvoir d'achat ou la lutte contre l'inflation qui vont impacter la concurrence entre la grande distribution et le commerce traditionnel. Selon l'auteur, les pouvoirs publics protègent, soit la grande distribution au profit de la concurrence mais au détriment du commerce traditionnel, soit le commerce traditionnel mais au détriment de la concurrence. L'auteur propose que l'intérêt du consommateur en tant qu'acteur de la concurrence soit remis au centre du droit économique. Les étudiants et professionnels y trouveront notamment des explications sur la négociation commerciale et plus généralement une étude sur le prix à travers le droit de la distribution, de la consommation et de la concurrence. Titre et résumé en anglais: *Beyond french retail and competition law, the author demonstrates that laws serve political choices like the increase of the purchase power or the reduction of consumer price. She thinks that the French government either protects the competition of grocery retailers to the detriment of traditional retailers or protects the small traditional retailers to the detriment of the competition. Students or professional will find in this book the main topic of the French retail, competition and consumer law. Discipline: Droit privé - Droit économique Mots clés : Grande distribution, commerce traditionnel, refus de vente, convention unique, CGV, CGA, négociation commerciale, coopération commerciale, services, réduction de prix, seuil de revente à perte, NIP, puissance d'achat, concurrence, concentration, pouvoir de marché, consommateur, linéaire, category management, infrastructure essentielle, barrières à l'entrée, information, prix.
