Ten years after the worldwide bestseller Good to Great, Jim Collins returns with another groundbreaking work, this time to ask: why do some companies thrive in uncertainty, even chaos, and others do not? Based on nine years of research, buttressed by rigorous analysis and infused with engaging stories, Collins and his colleague Morten Hansen

enumerate the principles for building a truly great enterprise in unpredictable, tumultuous and fast-moving times. This book is classic Collins: contrarian, data-driven and uplifting.

Together with his grandpa, a young boy finds a way to save his favorite tree in this heartwarming Christmas tale Alec loves to climb trees—the little apple

trees, the wide willow trees, even the tall locust trees. But his favorite is the great spruce, with its sturdy trunk and branches that stretch up to the sky. Alec's grandpa planted it as a sapling years and years before Alec was born, and every Christmas, Alec and his grandpa decorate the tree together, weaving tinsel and lights through its branches, making it shine bright. But one day, a few curious men from the nearby city take notice of Alec's glistening great spruce, and ask to take it away for their Christmas celebration. Though it's a huge honor, Alec's heartbroken at the idea of losing his friend. With great courage and creativity, Alec comes up with a plan to save his favorite tree in this joyful holiday tale.

The untold story of climate migration-- the personal stories of those experiencing displacement, the portraits of communities being torn apart by disaster, and the implications for all of us as we confront a changing future. When the subject of migration that will be caused by global climate change comes up in the media or in conversation, we often think of international refugees-- those from foreign countries who will emigrate to the United States to escape disasters like rising shorelines and famine. What many people don't realize though, is that climate migration is

happening now--and within the borders of the United States. A human-centered narrative with national scope, *The Great Displacement* is the first book to report on climate migration in the US. From half-drowned Louisiana to fire-scorched California, from the dried-up cotton fields of Arizona to the soaked watersheds of inland North Carolina, people are moving. In the last decade alone, the federal government has sponsored the relocation of tens of thousands of families away from flood zones, and tens of thousands more have moved of their own accord in the aftermath of natural disasters. Insurance and mortgage markets are already shifting to reflect mounting climate risk, pushing more people away from their homes. Rising seas have already begun to sink eastern

coastal cities, while extreme heat, unprecedented drought, and unstoppable wildfires plague the west. Over the next fifty years, millions of Americans will be caught up in this churn of displacement created by climate change, forced inland and northward in what will be the largest national migration we've yet to experience. The Great Displacement compassionately tells the stories of those who are already experiencing life on the move, while detailing just how radically climate change will transform our lives--forcing us out of the country's hardest-hit areas, uprooting countless communities, and prompting a massive migration that will fundamentally reshape the United States.

A Nobel Prize-winning economist tells the remarkable story of how the world has grown healthier, wealthier, but also more unequal over the past two and half centuries. The world is a better place than it used to be. People are healthier, wealthier, and live longer. Yet the escapes from destitution by so many has left gaping inequalities between people and nations. In *The Great Escape*, Nobel Prize-winning economist Angus Deaton—one of the foremost experts on economic development and on poverty—tells the remarkable story of how, beginning 250 years ago, some

parts of the world experienced sustained progress, opening up gaps and setting the stage for today's disproportionately unequal world. Deaton takes an in-depth look at the historical and ongoing patterns behind the health and wealth of nations, and addresses what needs to be done to help those left behind. Deaton describes vast innovations and wrenching setbacks: the successes of antibiotics, pest control, vaccinations, and clean water on the one hand, and disastrous famines and the HIV/AIDS epidemic on the other. He examines the United States, a nation that has prospered but is today experiencing slower growth and increasing inequality. He also considers how economic growth in India and China has improved the lives of more than a billion people.

Deaton argues that international aid has been ineffective and even harmful. He suggests alternative efforts—including reforming incentives to drug companies and lifting trade restrictions—that will allow the developing world to bring about its own Great Escape.

Demonstrating how changes in health and living standards have transformed our lives, *The Great Escape* is a powerful guide to addressing the well-being of all nations.

The Big Book of Hugs W. W. Norton & Company

The book opens with the question: "How are you feeling today?" And this leads on to a spread by spread presentation of a wide range of feelings, including: *Happy * Sad * Excited * Bored * Interested * Angry * Upset * Calm * Silly * Lonely *

Scared * Safe * Embarrassed * Shy * Confident * Worried * Jealous * Satisfied
The final spread is about Feeling Better because sharing and talking about feelings helps us to feel better. The approach and design follows *The Great Big Book of Families*, with lots of different children in lots of different situations, brief text captions and questions and plenty of humour to make sure the book is fun. Mary Hoffman and Ros Asquith look at feelings in family life, at school and everywhere with the same warmth, wit and sensitivity that they brought to their award-winning *The Great Big Book of Families*.

What is a family? Once, it was said to be a father, mother, boy, girl, cat and dog living in a house with a garden. But as

times have changed, families have changed too, and now there are almost as many kinds of families as colours of the rainbow - from a mum and dad or single parent to two mums or two dads, from a mixed-race family to children with different mums and dads, to families with a disabled member. Mary Hoffman takes a look through children's eyes at the wide varieties of family life: from homes, food, ways of celebrating, schools and holidays to getting around, jobs and housework, from extended families, languages and hobbies to pets and family trees - and she concludes that, for most people, their own family is the best one of all! With Ros Asquith's delightful pictures, this book takes a fresh, optimistic look at families of today.

Today the classics of the western canon, written by the proverbial "dead white men," are cannon fodder in the culture wars. But in the 1950s and 1960s, they were a pop culture phenomenon. The Great Books of Western Civilization, fifty-four volumes chosen by intellectuals at the University of Chicago, began as an educational movement, and evolved into a successful marketing idea. Why did a million American households buy books by Hippocrates and Nicomachus from door-to-door salesmen? And how and why did the great books fall out of fashion? In *A Great Idea at the Time* Alex Beam explores the Great Books mania, in an entertaining and strangely poignant portrait of American popular culture on the threshold of the television

age. Populated with memorable characters, *A Great Idea at the Time* will leave readers asking themselves: Have I read Lucretius's *De Rerum Natura* lately? If not, why not?

Ubiquitous at boutiques and cafés, on

Etsy and Pinterest, in stationery and home decor, the art of chalk lettering is hotter than ever. Valerie McKeehan, an Etsy standout whose work has been featured in magazines and websites from *Good Housekeeping* to *RealSimple.com*, teaches us everything we need to know to create gorgeous hand-drawn chalk designs. The book is also a practice space, with three foldout “chalkboards”—the inside cover and foldout back cover are lined with blackboard paper. In over 60 lessons, learn the ABCs of lettering (literally) and basic styles: serif, sans serif, and script. Next, how to lay out a design, combine various styles into one cohesive piece, add shadows and dimension. Master more advanced letter styles, from faceted to ribbon to “vintage circus.”

Use banners, borders, flourishes. And finally, 12 projects to show off your newfound skills: including a Winter Wonderland Snow Globe; a smartphone-themed birthday card to text friends and family; a one-of-a-kind party invitation to create, photograph, and mail; and a bake sale sign guaranteed to put everyone who sees it in the mood for a cupcake!

As any reader of Jo Walton's *Among Others* might guess, Walton is both an inveterate reader of SF and fantasy, and a chronic re-reader of books. In 2008, then-new science-fiction mega-site Tor.com asked Walton to blog regularly about her re-reading—about all kinds of older fantasy and SF, ranging from

acknowledged classics, to guilty pleasures, to forgotten oddities and gems. These posts have consistently been among the most popular features of Tor.com. Now this volume presents a selection of the best of them, ranging from short essays to long reassessments of some of the field's most ambitious series. Among Walton's many subjects here are the Zones of Thought novels of Vernor Vinge; the question of what genre readers mean by "mainstream"; the underappreciated SF adventures of C. J. Cherryh; the field's many approaches to time travel; the masterful science fiction of Samuel R. Delany; Salman Rushdie's *Midnight's Children*; the early Hainish novels of Ursula K. Le Guin; and a Robert A. Heinlein novel you have most certainly never read. Over 130 essays in

all, What Makes This Book So Great is an immensely readable, engaging collection of provocative, opinionated thoughts about past and present-day fantasy and science fiction, from one of our best writers. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
