CRC Press
 London's Urban Landscape is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape. Edited by Christopher Tilley, the volume is inspired by phenomenological thinking and presents fine-grained ethnographies of the practices of everyday life in London. In doing so, it charts a unique perspective on the city

that integrates ethnographies of daily life with an analysis of material culture. The first part of the volume considers the residential sphere of urban life, discussing in detailed case studies ordinary residential streets, housing estates, suburbia and London's mobile 'linear village' of houseboats. The second part analyses the public sphere, including ethnographies of markets, a park, the social rhythms of a taxi rank, and graffiti and street art. London's

Urban Landscape returns us to the everyday lives of people and the manner in which they understand their lives. The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places, and the paths of movement between them. What stories do door bells and house facades tell us about contemporary life in a Victorian terrace? How do antiques acquire value and significance in a market? How does living

in a concrete megastructure relate to the lives of the people who dwell there? These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life.

The Ecology of Mycobacteria Cornell University Press
The ultimate must-read handbook for the modern mother: a practical, and positive tool to help free women from the debilitating notion of

being the "perfect mom," filled with funny and all too relatable true-life stories and realistic suggestions to stop the burnout cycle, and protect our kids from the damage burnout can cause. Moms, do you feel tired? Overwhelmed? Have you continually put off the things you need to do for you? Do you feel like it's all worth it because your kids are happy? Are you "over" being a mother? If you answered yes to these questions, you're not alone. Parents today want to create the ideal

childhood for their children. Women strive to be the picture-perfect Pinterest mother that looks amazing, hosts the best birthday parties in town, posts the most "liked" photos, and serves delicious, nutritious home-cooked meals in her neat, organized home after ferrying the kids to school and a host of extracurricular activities on time. This drive, while noble, can also be destructive, causing stress and anxiety that leads to "mommy burnout." Psychologist

and family counselor Dr. Sheryl Ziegler is well-versed in the stress that moms face, and the burden of guilt they carry because they often feel like they aren't doing enough for their kids' happiness. A mother of three herself, Dr. Z—as she's affectionately known by her many patients—recognizes and understands that modern moms are all too often plagued by exhaustion, failure, isolation, self-doubt, and a general lack of self-love, and their families are also feeling

the effects, too. Over the last nineteen years working with families and children, Dr. Z has devised a prescriptive program for addressing "mommy burnout"—teaching moms that they can learn to re-energize themselves and still feel good about their families and their lives. In this warm and empathetic guide, she examines this modern epidemic among mothers who put their children's happiness above their own, and offers empowering, proven solutions for

alleviating this condition, saving marriages and keeping kids happy in the process.

Max Linder Macmillan

The authors provide some excellent tools for teaching a venipuncture class though small, is complete in its coverage of topics related to phlebotomy. The unit on blood collection and venipuncture equipment is very thorough. . .

Respiratory Care, review of the 1st Edition. Perfect for intensive one- or two-day phlebotomy courses! This user-friendly text

concentrates on the crucial skills of blood specimen collection. . . making it a cost-effective, compact learning tool for cross training and continuing education.

HarperCollins

Barbara Spackman here examines the ways in which decadent writers adopted the language of physiological illness and alteration as a figure for psychic otherness. By means of an ideological and rhetorical analysis of scientific as well as

literary texts, she shows how the rhetoric of sickness provided the male decadent writer with an alibi for the occupation and appropriation of the female body.

F A Davis Company

A patient's personal view of long term care. Seen through the eyes of a patient totally paralyzed with Guillain-Barré syndrome, this moving book takes you through the psychological and

physical pain of an eleven month hospital stay. BED NUMBER TEN reads like a compelling novel, but is entirely factual. You will meet: The ICU staff who learned to communicate with the paralyzed woman - and those who did not bother. The physicians whose visits left her baffled about her own case. The staff and physicians who spoke to her and others who did not recognize her presence. The nurse who tucked Sue tightly under the covers, unaware that she was soaking with

perspiration. The nurse who took the time to feed her drop by drop, as she slowly learned how to swallow again. The physical therapist who could read her eyes and spurred her on to move again as if the battle were his own. In these pages, which reveal the caring, the heroism, and the insensitivity sometimes found in the health care fields, you may even meet people you know.

Springer Science & Business Media

Winner of the National Book Critics Circle Award for Nonfiction, this brilliantly reported and beautifully crafted book explores the clash between a medical center in California and a Laotian refugee family over their care of a child.

Dictionnaire général de la langue française: G-Z UCL Press

- The ultimate Madonna book before she became a pop icon- Updated from the 1979 edition to include recently-discovered and never-before published photos

of a then-unknown Madonna
Martin H. M. Schreiber rose to international prominence when his shots of a nude, pre-fame Madonna appeared in the September 1985 issue of Playboy magazine. While he is proud of the shots, Schreiber regrets not having had the chance to do a one-on-one shoot with Madonna. "I was taking pictures from behind my students, it wasn't as if I had a private session and could get her to do what I wanted her to do." It was February 1979

when a quiet, shy young woman walked into Martin's studio to serve as a model for his photography class. The 'dancer', as she modestly described herself, was Madonna Ciccone. She arrived in New York in 1978 having bought a one-way ticket from Michigan, with only \$35 in her pocket. Life modeling for art classes was a way of making a living. Little did Martin know at the time that this more or less chance encounter would lead to one of the most memorable photo shoots

of all time. After the huge success of Martin H.M. Schreiber's Madonna Nudes in the 1990s the new edition Madonna Nudes + features many recently discovered and never published photos of Madonna besides a selection of the best images published in Madonna Nudes 1979 edition. Survival Creole Antique Collector's Club Detailed information dealing with the ecology of mycobacteria is derived from a variety of different scientific fields such as

botany, biochemistry, genetics, immunology, microbiology and epidemiology. This is the first attempt to evaluate this information from an ecological point of view and to develop a strategy for the prevention of tuberculosis and other mycobacterioses based on the ecological behavior of mycobacteria, especially the potentially pathogenic species capable of either growth in the environment or provoking disease. Regarding the interests of the developing countries,

special attention is paid to the ecology of Mycobacterium leprae and to the supporting effect of accompanying mycobacteria in its pathogenicity. On a more positive side, environmental mycobacteria play an important role in the ecology of moorland dragonflies. Such a book is needed for specialists working in the field of

mycobacterial research, clinical laboratories, the public health service, food hygiene, the water industry and in general ecology.
