which trace the history of the later Crusades and papal relations with the Levant from the accession of Innocent III (in 1198) to the reign of Pius V and the battle of Lepanto (1566-1571). From the mid-fourteenth century to the conclusion of his work, the author has drawn heavily upon unpublished materials, collected in the course of more than twenty "palaeographical journeys" to the Archivio Segreto Vaticano and the Archivi di Stato in Venice, Mantua, Modena, Milan, Siena, Florence, and the Archives of the Order of the Hospitallers at Malta. In this groundbreaking new study, Kate van Orden examines noble education in the arts to show how music contributed to cultural and social transformation in early modern French society. She constructs a fresh account of music's importance in promoting the absolutism that the French monarchy would fully embrace under Louis XIV, uncovering many hitherto unpublished ballets and royal ceremonial performances. The great pressure on French noblemen to take up the life of the warrior gave rise to bellicose art forms such as sword dances and equestrian ballets. Far from being construed as effeminizing, such

combinations of music and the martial arts were at once refined and masculine—a perfect way to display military prowess. The incursion of music into riding schools and infantry drills contributed materially to disciplinary order, enabling the larger and more effective armies of the seventeenth century. This book is a history of the development of these musical spheres and how they brought forth new cultural priorities of civility, military discipline, and political harmony. Music, Discipline, and Arms in Early Modern France effectively illustrates the seminal role music played in mediating between the cultural spheres of letters and arms.

A case study in how techniques of protest originate and evolve this book tells how the French perfected a repertoire of revolution over three centuries, and how students, exiles, and itinerant workers helped it spread across Europe.

A Widow's Vengeance After the Wars of Religion

Routledge

In 1543, the Ottoman fleet appeared off the coast of France to bombard and lay siege to the city of Nice. The operation, under the

command of Admiral Barbarossa, came in response to a request from Francois I of France for assistance from Sultan Suleyman the Magnificent in France's struggle against Charles V, the Habsburg Holy Roman Emperor and King of Spain. This military alliance between mutual 'infidels', the Christian French King and the Muslim Sultan, aroused intense condemnation on religious grounds from the Habsburgs and their supporters as an aberration from accepted diplomacy. Memories of the Crusades were, after all, still very much alive in Europe and an alliance with 'the Turk' seemed unthinkable to many. "Allies with the Infidel" places the events of 1543 and the

subsequent wintering of the Ottoman fleet in Toulon in the context of the power politics of the sixteenth century. Relying on contemporary Ottoman and French sources, it presents the realpolitik of diplomacy with 'infidels' in the early modern era. The result is essential reading for students and scholars of European history, Ottoman Studies, and of relations between the Christian and Islamic worlds. Music, Discipline, and Arms in Early Modern France BRILL
An award-winning historian's revisionary account of the early modern world, showing how apocalyptic ideas stimulated political, religious, and intellectual transformations "A masterful synthesis of

the prognostications of faith, knowledge, and politics on a global stage. Martin's book illuminates one of the enduring themes that shaped the medieval and early modern world."—Paula E. Findlen, Stanford University

In this revelatory immersion into the apocalyptic, messianic, and millenarian ideas and movements that created the modern world, John Jeffries Martin performs a kind of empathic time travel, entering into the psyche, spirituality, and temporalities of a cast of historical actors in profound moments of discovery. He argues that religious faith—Christian, Jewish, and Muslim—did not oppose but rather fostered the making of a modern scientific

spirit, buoyed along by a providential view of history and nature, and a deep conviction in the coming End of the World. Through thoughtful attention to the primary sources, Martin re-reads the Renaissance, excavating a religious foundation at the core of even the most radical empirical thinking. Familiar icons like Ibn Khaldūn, Columbus, Isaac Luria, and Francis Bacon emerge startlingly fresh and newly gleaned, agents of a history formerly untold and of a modern world made in the image of its imminent end.

between Catholics and Protestants in a period when vicious sectarian strife was the rule of the day. Tolerance here means more than mere coexistence but a daily interaction between people without regard for their faith.

The Impact of the European Reformation

University of Pennsylvania Press
Examining Catholic activism in the south-west of France during the middle decades of the sixteenth century,

this book argues - contrary to prevailing views - that the phenomenon was both widespread and militant even before the formation of the Catholic League in 1576. Whilst recent research has provided a far greater understanding of the Huguenot struggle for security and legitimacy, there has not been a correspondingly thorough investigation into the grass-roots Catholic reaction to this, and by dismissing episodes of pre-League Catholic militancy as limited and ephemeral, a distorted picture of French confessional conflict and rivalry is painted. Utilizing surviving material from the provincial archives at Bordeaux, Toulouse, Agen, and at the

Bibliothèque Nationale in Paris, this book provides ample evidence for placing the birth of Catholic activism in the period preceding the Wars of Religion, highlighting the confessional tensions that exploded throughout the 1540s and 1550s. As competing bands of religious enthusiasts, and municipal and court officials, fought first with words, then with weapons, for supremacy of the community in the towns of the south-west, a steady escalation of confrontation can be traced. Within this atmosphere of rising tension, it is shown how Catholic militancy mirrored the organizational and fund-raising capacity of their Protestant rivals,

and how the local military elite rose to support their co-religionists at the outbreak of formal hostilities in 1562. The ascendancy of Catholic militants in key urban centres by 1570 would deal a fatal blow to Protestant plans for supremacy of the south-west.

A Widow's Vengeance after the Wars of Religion is a dramatic account of the impact of the Wars of Religion on daily life. Based on neglected archival sources and an exceptional criminal

trial, it recovers the experiences of women, peasants, and foot soldiers, who are marginalized in most historical accounts.

Hero or Tyrant? Henry III, King of France, 1574-89 Manchester University Press

The complexity of the interplay and relationships over various borders in medieval Europe is here fully teased out. The processes by which ideas, objects, texts and political thought and experience moved across boundaries in the Middle Ages form the focus of this book, which also seeks to reassess the nature of the boundaries themselves; it thus appropriately reflects a major theme of Dr Malcolm Vale's work, which the essays collected here honour. They suggest ways of breaking down established historiographical paradigms of Europe as a set of distinct polities, achieving a more nuanced picture in which people and

objects were constantly moving, and challenging previous conceptions of units and borders. The first section examines the construction of boundaries and units in the later Middle Ages, via topics ranging from linguistic units to social stratifications, and geographically from the Netherlands and Scotland to Gascony and the Iberian peninsula; it reveals how much the relationship between exchange and boundaries was reciprocal. The second section considers the mechanisms by which it took place, from West Africa to Italy and Flanders, and discusses the actual exchange of people, texts, and unusual artefacts. Overall, the essays bear witness to

the constant interplay and interconnections throughout medieval Europe and beyond. All societies are constructed, based on specific rules, norms, and laws. Hence, all ethics and morality are predicated on perceived right or wrong behavior, and much of human culture

proves to be the result of a larger discourse on vices and virtues, transgression and ideals, right and wrong. The topics covered in this volume, addressing fundamental concerns of the premodern world, deal with allegedly criminal, or simply wrong behavior which demanded punishment. Sometimes this affected whole groups of people, such as the innocently persecuted Jews, sometimes individuals, such as violent and evil princes. The issue at stake here embraces all of society since it can only survive if a general framework is observed that is based in some way on justice and peace. But literature and the visual arts provide

many examples of open and public protests against wrongdoings, ill-conceived ideas and concepts, and stark crimes, such as theft, rape, and murder. In fact, poetic statements or paintings could carry significant potentials against those who deliberately transgressed moral and ethical norms, or who even targeted themselves.

Renaissance France at War

Oxford University Press
Holy War, Martyrdom, and Terror examines the ways that Christian theology has shaped centuries of conflict from the Jewish-Roman War of late antiquity through the First Crusade, the French Revolution, and up to the Iraq War. By isolating one factor

among the many forces that converge in war—the essential tenets of Christian theology—Philippe Buc locates continuities in major episodes of violence perpetrated over the course of two millennia. Even in secularized or explicitly non-Christian societies, such as the Soviet Union of the Stalinist purges, social and political projects are tied to religious violence, and religious conceptual structures have influenced the ways violence is imagined, inhibited, perceived, and perpetrated. The patterns that emerge from this sweeping history upend commonplace assumptions about historical violence, while contextualizing and explaining some of

its peculiarities. Buc addresses the culturally sanctioned logic that might lead a sane person to kill or die on principle, traces the circuitous reasoning that permits contradictory political actions, such as coercing freedom or pardoning war atrocities, and locates religious faith at the backbone of nationalist conflict. He reflects on the contemporary American ideology of war—one that wages violence in the name of abstract notions such as liberty and world peace and that he reveals to be deeply rooted in biblical notions. A work of extraordinary breadth, *Holy War, Martyrdom, and Terror* connects the ancient past to the troubled present, showing how religious

ideals of sacrifice and purification made violence meaningful throughout history. *The Papacy and the Levant, 1204-1571* DS Brewer

Recent decades have witnessed the fragmentation of Reformation studies, with high-level research confined within specific geographical, confessional or chronological boundaries. By bringing together scholars working on a wide variety of topics, this volume counteracts this centrifugal trend and provides a broad perspective on the impact of the European reformation. The essays present new research from historians of politics, of the church and of

belief. Their geographical scope ranges from Scotland and England via France and Germany to Transylvania and their chronological span from the 1520s to the 1690s Considering the impact of the Reformation on political culture and examining the relationship between rulers and ruled; the book also examines the church and its personnel, another sphere of life that was entirely transformed by the Reformation. Important aspects of knowledge and belief are discussed in terms of scientific knowledge and technological progress, juxtaposed with analyses of elite and popular belief, which demonstrates the limitations of Weber's notion of the

disenchantment of the world. Together they indicate the diverse directions in which Reformation scholarship is now moving, while reminding us of the need to understand particular developments within a broader European context; demonstrating that movements for religious reform left no sphere of European life untouched.

Based upon a wide range of historical and literary sources, *An Apprenticeship in Arms* is a scholarly study of the military experiences of peers and gentlemen from the British Isles who volunteered to fight in the religious and dynastic wars of

mainland Europe, as well as the ordinary men who were impressed to serve in the ranks from the time of the English intervention in the Dutch war of independence in 1585 to the death of the soldier-king William III in 1702.

This apprenticeship in arms exposed these men to the technological innovations of the military revolution, laid the foundations for a fledgling professional officer class based upon merit and established a fund of military expertise. This remilitarization of aristocratic culture and society was completed by 1640, and provided numerous experienced military officers for the various armies of the civil wars and,

subsequently, for the embryonic British army after William III invaded and conquered the British Isles and committed the Three Kingdoms to the armed struggle against Louis XIV during the Nine Years War. Conflicts between amateur aristocrats and so-called 'soldiers of fortune' led to continuing debates about the relative merits of standing armies and a select militia; the individual pursuit of honour and glory by such amateurs also obscured the more rational military and political objectives of the modern state, subverted military discipline, and delayed the process of the professionalization of the officer corps of the British army.

The Rise of Richelieu

Princeton University Press
 How did people learn their Bibles in the Middle Ages? Did church murals, biblical manuscripts, sermons or liturgical processions transmit the Bible in the same way? This book unveils the dynamics of biblical knowledge and dissemination in thirteenth- and fourteenth-century England. An extensive and interdisciplinary survey of biblical manuscripts and visual images, sermons and chants, reveals how the unique qualities of each medium became part of the way the Bible was known and recalled; how oral, textual, performative and visual means of transmission joined to present a surprisingly complex biblical

worldview. This study of liturgy and preaching, manuscript culture and talismanic use introduces the concept of biblical mediation, a new way to explore Scriptures and society. It challenges the lay-clerical divide by demonstrating that biblical exegesis was presented to the laity in non-textual means, while the 'naked text' of the Bible remained elusive even for the educated clergy.

Furies OUP Oxford
On 18 August 1572, Paris hosted the lavish wedding of Marguerite de Valois and Henri de Navarre, which was designed to seal the reconciliation of France's Catholics and Protestants. Only six days later, the execution of the Protestant leaders on

the orders of the king's council unleashed a vast massacre by Catholics of thousands of Protestants in Paris and elsewhere. Why was the celebration of concord followed so quickly by such unrestrained carnage? Arlette Jouanna's new reading of the most notorious massacre in early modern European history rejects most of the established accounts, especially those privileging conspiracy, in favour of an explanation based on ideas of reason of state. The Massacre stimulated reflection on royal power, the limits of authority and obedience, and the danger of religious division for France's political traditions. Based on extensive research and a careful examination of existing

interpretations, this
book is the most

authoritative analysis
of a shattering event.
