Beyond Survival IDRC

The World malaria report 2014 summarizes information received from 97 malaria endemic countries and other sources and updates the analyses presented in 2013. It assesses global and regional malaria trends highlights progress made towards global targets and describes opportunities and challenges in controlling and eliminating the disease. Most of the data presented in this report are for 2013.

WHO Expert Committee on Drug Dependence CRC Press

A very high portion of the seafood we eat comes from abroad, mainly from China and Southeast Asia, and most of the active

ingredients in medicines we take originate in other countries. Many low- and middle-income countries have lower labor costs and fewer and less stringent environmental regulations than the United States, making them attractive places to produce food and chemical ingredients for export. *Safe Foods and Medical Products Through Stronger Regulatory Systems Abroad* explains that the diversity and scale of imports makes it impractical for U.S. Food and Drug Administration (FDA) border inspections to be sufficient to ensure product purity and safety, and incidents such as American deaths due to adulterated heparin imported from China propelled the problem into public awareness. The Institute of Medicine Committee on Strengthening Core Elements of Regulatory Systems in Developing Countries took up the vital

task of helping the FDA to cope with the reality that so much of the food, drugs, biologics, and medical products consumed in the United States originate in countries with less-robust regulatory systems. *Ensuring Safe Foods and Medical Products Through Stronger Regulatory Systems Abroad* describes the ways the United States can help strengthen regulatory systems in low and middle income countries and promote cross-border partnerships - including government, industry, and academia - to foster regulatory science and build a core of regulatory professionals. This report also emphasizes an array of practical approaches to ensure sound regulatory practices in today's interconnected world. **Ensuring Safe Foods and Medical Products Through Stronger Regulatory Systems Abroad** Springer

[Basic Emergency Care: Approach to the Acutely Ill and Injured](#) World Health Organization

This book provides vivid examples of school mental health innovations from 18 countries, addressing mental health promotion, prevention and interventions. These initiatives and innovations enable readers from different regions and disciplines to apply strategies to help students achieve and maintain mental health, enhance their learning outcomes and access services, worldwide.

[Neuro-ophthalmic Disorders](#) Elsevier Health Sciences

The Multi-Country Study, which began in 1997, aims to: Obtain reliable estimates of the prevalence of violence against women in different countries throughout the world, in a consistent, standardized manner which will allow for inter-country comparisons; Document the association between domestic violence against women and a range of health outcomes; Identify risk and protective factors for domestic violence against women, and compare them between settings; Explore and compare the coping strategies used by women experiencing domestic violence; Use the findings nationally and internationally to advocate for an increased response to domestic and sexual violence against women.

[Rapid On-site Evaluation \(ROSE\)](#) LULU Now in its fifth edition, the Textbook of Diabetes has established itself as the modern, well-illustrated, international guide to diabetes. Sensibly organized and easy to navigate, with exceptional illustrations, the Textbook hosts an unrivalled blend of clinical and scientific content. Highly-experienced editors from across the globe assemble an outstanding set of international contributors who provide insight on new developments in diabetes care and information on the latest treatment modalities used around the world. The fifth edition features an array of brand new chapters, on topics including: Ischaemic Heart Disease Glucagon in Islet Regulation Microbiome and Diabetes Diabetes and Non-Alcoholic Fatty Liver Disease Diabetes and Cancer End of Life Care in Diabetes as well as a new section on Psychosocial aspects of diabetes. In addition, all existing chapters are fully revised with the very latest developments, including the most recent guidelines from the ADA, EASD, DUK and NICE. Includes free access to the Wiley Digital Edition providing search across the book, the full reference list with web links,

illustrations and photographs, and post-publication updates Via the companion website, readers can access a host of additional online materials such as: 200 interactive MCQ's to allow readers to self-assess their clinical knowledge every figure from the book, available to download into presentations fully searchable chapter pdfs Once again, Textbook of Diabetes provides endocrinologists and diabetologists with a fresh, comprehensive and multi-media clinical resource to consult time and time again.

[A Brief History of Wound Healing](#) WHO ABC of Wound Healing, Second Edition ABC of Wound Healing is a practical, highly illustrated guide to assessment, diagnosis and management of all common types of acute and chronic wounds. This concise yet comprehensive reference covers all essential aspects of wound healing care, including epidemiology, pathophysiology, assessment, treatment, long-term management, and prevention This revised second edition contains several new chapters on lymphoedema, nutrition, skin care, continence, and scarring. Updated and expanded chapters cover a wider range of devices and therapies, and discuss additional factors that impact wound healing processes, offering new clinical photographs as a visual guide. Applying a multidisciplinary approach to the provision of wound care, ABC of Wound Healing: Covers common wounds including traumatic wounds, surgical wounds, diabetic foot ulcers, pressure injuries, and venous and arterial leg ulcers Emphasises the importance of reaching a diagnosis, the fundamental step in managing any wound Provides up-to-date information on physical, chemical, biological and emerging therapies for patients with various types of wounds Contains hundreds of full-colour illustrations and clinical photographs of wounds and treatments ABC of Wound Healing, Second Edition, remains a must-have guide for junior doctors, specialist registrars in medicine and surgery, specialist nurses, general practitioners and medical students.

[World Malaria Report 2014](#) Routledge Healthcare Kaizen focuses on the principles and methods of daily continuous improvement, or Kaizen, for healthcare professionals and organizations. Kaizen is a Japanese word that means "change for the better," as popularized by Masaaki Imai in his 1986 book Kaizen: The Key to Japan's Competitive Success and through the books of Norman Bodek, both o
The Selection and Use of Essential Medicines World Health Organization

Infections that occur in the wound created by an invasive surgical procedure are generally referred to as surgical site infections (SSIs). SSIs are one of the most important causes of healthcare-associated infections (HCAIs). A prevalence survey undertaken in 2006 suggested that approximately 8% of patients in hospital in the UK have an HCAI. SSIs accounted for 14% of these infections and nearly 5% of patients who had undergone a surgical procedure were found to have developed an SSI. However, prevalence studies tend to underestimate SSI because many of these infections occur after the patient has been discharged from hospital. SSIs are associated with considerable morbidity and it has been reported that over one-third of postoperative deaths are related, at least in part, to SSI. However, it is important to recognise that SSIs can range from a relatively trivial wound discharge with no other complications to a life-threatening condition. Other clinical outcomes of SSIs include poor scars that are cosmetically unacceptable, such as those that are spreading, hypertrophic or keloid, persistent pain and itching, restriction of movement, particularly when over joints, and a significant impact on emotional wellbeing. SSI can double the length of time a patient stays in hospital and thereby increase the costs of health care. Additional costs attributable to SSI of between £814 and £6626 have been reported depending on the type of surgery and the severity of the infection. The main additional costs are related to re-operation, extra nursing care and interventions, and drug treatment costs. The indirect costs, due to loss of productivity, patient dissatisfaction and litigation, and reduced quality of life, have been studied less extensively.

"The report, "'I Had a Dream to Finish School': Barriers to Secondary Education in Tanzania," examines obstacles, including some rooted in outmoded government policies, that prevent more than 1.5 million adolescents from attending secondary school and cause many students to drop out because of poor quality education. The problems include a lack of secondary schools in rural areas, an exam that limits access to secondary school, and a discriminatory government policy to expel pregnant or married girls"-- Publisher's description.

Rethinking Case Study Research World Health Organization

In June 2016, the Norwegian Programme for Capacity Development in Higher

Education and Research for Development (Norhed) hosted a conference on the theme of 'knowledge for development' in an attempt to shift the focus of the programme towards its academic content. This book follows up on that event. The conference highlighted the usefulness of presenting the value of Norhed's different projects to the world, showing how they improve knowledge and expand access to it through co-operation. A wish for more meta-knowledge was also expressed and this gives rise to the following questions: - Is this way of co-operating contributing to the growth of independent post-colonial knowledge production in the South, based on analyses of local data and experiences in ways that are relevant to our shared future? - Does the growth of academic independence, as well as greater equality, and the ability to develop theories different to those imposed by the better-off parts of the world, give rise to deeper understandings and better explanations? - Does it, at least, spread the ability to translate existing methodologies in ways that add meaning to observations of local context and data, and thus enhance the relevance and influence of the academic profession locally and internationally? This book, in its varied contributions, does not provide definite answers to these questions but it does show that Norhed is a step in the right direction. Norhed is an attempt to fund collaboration within and between higher education institutions. We know that both the uniqueness of this programme, and ideas of how to better utilise the learning and experience emerging from it, call for more elaboration and broader dissemination before we can offer further guidance on how to do things better. This book is a first attempt.

Evaluation of PEPFAR's Contribution (2012-2017) to Rwanda's Human Resources for Health Program Springer Nature

Population and Health in Developing Countries: Population, health and survival at INDEPTH sites African Minds

Revision spine surgery requires a unique skill set different from performing a primary operation. Understanding when a simple revision is sufficient, when a more complex approach is needed, or when a non-surgical option should be considered is critical to good patient care and outcomes. In this first book to focus exclusively on the complex topic of *The Diabetic Foot* National Academies Press

This highly acclaimed book deals with all

the key kidney, ureter and bladder problems likely to be encountered by the non-specialist paediatrician and paediatric nephrologist. The book adopts an evidence-based, problem solving approach and focuses on presenting clinical symptoms rather than being disease oriented. Emphasis is placed on differential diagnosis, evaluation and treatment. Where no evidence is available or where controversy exists, a clear opinion on the most appropriate treatment is provided. For this completely revised and updated edition over half of the text is revised. New chapters have been added on psychosocial care principles, drug prescribing in children and paediatric nephrology in the third world. Certain chapters have been condensed for clarity and other chapters have been combined to facilitate practical use. This edition is based around practical guidelines and contributions have been collected from international experts in the field. The chapters contain key point boxes highlighting the important take-home messages. The well-structured text is ideal for trainee and non-specialist paediatricians, for paediatric nephrologists and for nephrologists and urologists with an interest in children. This book is undoubtedly regarded as "the" paediatric nephrology textbook to be held of the shelves of all General Paediatric departmental libraries.

Textbook of Diabetes World Health Organization

Developed by WHO and the International Committee of the Red Cross, in collaboration with the International Federation for Emergency Medicine, "Basic Emergency Care (BEC): Approach to the acutely ill and injured" is an open-access training course for frontline healthcare providers who manage acute illness and injury with limited resources. BEC teaches a systematic approach to the initial assessment and management of time-sensitive conditions where early intervention saves lives. It includes modules on: the ABCDE and SAMPLE history approach, trauma, difficulty in breathing, shock, and altered mental status. The practical skills section covers the essential time-sensitive interventions for these key acute presentations. The BEC package includes a Participant Workbook and electronic slide decks for each module. BEC integrates the guidance from WHO Emergency Triage, Assessment and Treatment (ETAT) for children, WHO Pocket Book of Hospital Care for Children, WHO Integrated Management of Pregnancy and Childbirth and the Integrated Management of

Adult/Adolescent Illness (IMAI).

Healthcare Kaizen Global Equity Initiative, Harvard University

This book discusses in detail the major advances in the field of neuro-ophthalmology. Based on the latest research from across the globe, it highlights recent developments in all areas of neuro-ophthalmology, including optic neuritis and the associated demyelinating diseases - especially the changing paradigms in the diagnosis and management of multiple sclerosis and neuromyelitis optica. It also covers the various types of hereditary optic neuropathies as well as nystagmus and its management. In order to provide comprehensive information in a single volume, it addresses topics of interest in pediatric neuro-ophthalmology, such as pediatric optic neuritis and cortical visual impairment, innovations in the management of ocular motility disorders and other disorders of the optic nerve and central nervous system, including ischemic neuropathies and idiopathic intracranial hypertension. This book provides a one-stop source of information on all key topics of neuro-ophthalmology, enabling trainee fellows and practitioners to keep abreast of the current thoughts in this field. As part of the series "Current Practices in Ophthalmology" this volume is intended for residents and fellows-in-training, as well as generalist and specialist ophthalmologists alike.

Clinical Paediatric Nephrology Cambridge University Press

The premier reference in obstetrics for more than a century - now even more relevant to today's practice Williams Obstetrics is the most detailed, comprehensive, and rigorously referenced text on the subject. Written by an author team from the world-renowned Parkland Hospital, the hallmarks of this classic are its thoroughness, scientific basis, and practical applicability for the obstetrician at the bedside. This edition of Williams Obstetrics continues to emphasize the scientific-based underpinnings and evidence-based practices of the specialty. This is accomplished by using incorporating more than 3,000 new literature citations and guidelines from the most trusted professional and academic organizations. One of the important features of the twenty-fourth edition is a greater focus on the fetus as a patient and an expanded discussion of fetal diagnosis and therapy. This is complemented by more than 100 new sonographic and MR images of common fetal abnormalities. A new reorganization of the text enables the book to highlight more effectively the

myriad disorders that may complicate pregnancy. Williams Obstetrics provides a convenient, clinically relevant text of value to the busy practitioner. The book summarizes important new data that has influenced evidence-based management to improve pregnancy outcomes. Much of this data is conveniently distilled into newly created tables and diagnostic and treatment algorithms. During discussion, numerous sources are cited to provide evidence-based options for patient management. Additionally, nearly 900 images complement the text, many of which are new or enhanced. These include sonograms, MR images, photographs, diagrams, and graphs. This edition of Williams Obstetrics continues to provide clinicians with everything they need to know about the practice of obstetrics with a level of authority and quality of presentation not found in any other resource.

WHO Multi-country Study on Women{146}s Health and Domestic Violence Against Women McGraw Hill Professional

Violence Against Children adopts in its title the exhortation of Nobel Laureate Amartya Sen, "Making Human Rights Real," which also represents the leitmotif of the book. It examines the prevalence of violence against children in Africa, the Asia Pacific Region, Europe, Latin America and the Caribbean, and in the United States, and

explores major ways of its prevention. Making human rights real engenders the challenge of helping all children to be free from violence and to lead a life replete with genuine nurture and the elimination of all violence. Only in this manner will the goal of the United Nations 2030 Agenda for Sustainable Development —target 16.2—be achieved and the child as a rights-bearing individual realized in her/his fullness. The specially commissioned chapters that make up the volume have been written by renowned scholars, researchers and advocates. They coalesce to provide an overview of the challenges facing children exposed to violence worldwide, and they advance discussions of the measures which are available and necessary for the prevention of violence against children. The book is intended for policy-makers, researchers and students of the social sciences and human rights who are interested in ending all the widespread maltreatment of children in our societies and our time.

Education Material for Teachers of Midwifery World Health Organization
 'Beyond Survival' breaks new ground in the ongoing debate about health finance and financial protection from the costs of health care. The evidence and discussion support the need to consider financial protection, in addition to health status, as a policy objective when setting priorities for health systems. This book reviews the

Latin American experience with health reform in the last 20 years and the fundamentals of health system financing, using new evidence to show the magnitude and mechanisms that determine the impoverishing effects of health events (diseases, accidents, and those of the life cycle). It provides options for policy makers on how to protect, and help household to protect themselves, against this impoverishment. The authors use empirical evidence from six case studies commissioned for this report, on Argentina, Chile, Colombia, Ecuador, Honduras, and Mexico. This book provides policy makers with a solid conceptual basis for decisions on the contents of mandatory health insurance benefit packages, choices of financing mechanisms, and the roles of public policy in this field. 'Beyond Survival' provides an in-depth analysis of, and organizational alternatives for, risk pooling and health insurance for financial protection. It analyzes the urgent need to extend risk pooling to the informal sector, the challenges for current social insurance arrangements, and options for policy makers to effectively extend risk pooling to the informal sector.
