This volume closely analyses women's role and experiences in migration (internal and international) and its interlinkages with the care economy in their functions as nurses and paid domestic workers as well as unpaid carers. Bringing together case studies from across India and other parts of the world, the essays in the volume capture the characteristics and specificities of

female migration in different settings -- be it for economic or associational reasons, or as left behind members. The book also looks at gender-specific discriminations and vulnerabilities along with the empowering aspects of migration. This volume will be of great interest to scholars and researchers of migration, gender studies, sociology, and social anthropology, as well as development studies, demography, and economics.

In the process, he proposes various alternative ways to attain these ideals in political life. His collection of essays reflects the continuing confrontation of three different theoretical visions--capitalism, socialism, and democracy--and assesses the relative merits of each as a means to achieving liberty and equality. Considering complex issues of democratic theory, Dahl ranges over such topics as the theory of democratic socialism, Marxism and free parties, democracy in the workplace, federalism in the democratic process, polyarchy, and pluralism.
