 'The Gum Family Finds Home' is a delightful Australian story about home and

family and a celebration of the stunning Australian landscape and its flora and fauna. Join the Gum family of koalas, who hitch up their caravan and set off in search of the perfect home. Together with the Gum family, children will explore the sheer variety and imposing grandeur of the Australian geological landscape, from Uluru to King's Canyon, from gorges and limestone pillars to precariously placed boulders and sweeping plains. Searching for that perfect home, they learn the heart-warming truth that the best home is the one you create for yourself among family and friends. Parents, friends, carers and teachers will enjoy the age-old premise that 'home is where your heart is' and smile as children try to figure out where the Gums will decide to live. At the back of the book, travel the country again through photographs of locations from the

story and learn fascinating facts about their formation and history.

Alexander's Outing Picture Puffin

Considering Animals draws on the expertise of scholars trained in the biological sciences, humanities, and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals. Taking their cue from the specific "animal moments" that punctuate these interactions, the essays engage with contemporary issues and debates central to human-animal studies: the representation of animals, the practical and ethical issues inseparable from human interactions with other species, and, perhaps most challengingly, the compelling evidence that animals are themselves considering beings. Case studies focus on issues such as animal emotion and human "sentimentality"; the representation of animals in contemporary art and in recent films such as *March of the Penguins*, *Happy Feet*, and *Grizzly Man*; animals' experiences in catastrophic events such as Hurricane Katrina and the SARS outbreak; and the danger of overvaluing the role humans play in the earth's ecosystems. From Marc Bekoff's moving preface through to the last essay, *Considering Animals* foregrounds the frequent, sometimes uncanny, exchanges with other species that disturb our self-contained existences and bring into focus our troubled relationships with them.

Written in an accessible and jargon-free style, this collection demonstrates that, in the face of species extinction and environmental destruction, the roles and fates of animals are too important to be left to any one academic discipline.
