The Position of the German Language in  
the World focuses on the global position  
of German and the factors which work  
towards sustaining its use and utility for  
international communication. From the  
perspective of the global language  
constellation, the detailed data analysis  
of this substantial research project  
depicts German as an example of a  
second-rank language. The book also  
provides a model for analysis and  
description of international languages

other than English. It offers a framework for strengthening the position of languages such as Arabic, Chinese, French, Portuguese, Spanish and others and for countering exaggerated claims about the global monopoly position of English. This comprehensive handbook of the state of the German language in the world was originally published in 2015 by Walter de Gruyter in German and has been critically acclaimed. Suitable for scholars and researchers of the German language, the handbook shows in detail how intricately and thoroughly German and other second-rank languages are tied up with a great number of societies and how these statistics support or weaken the languages' functions and maintenance. The extraordinary, unknown story of two giants of American history—Henry Ford and Thomas Edison—and their attempt to create an electric-powered city of tomorrow on the Tennessee River During the roaring twenties, two of the most revered and influential men in American business proposed to transform one of the country's poorest regions into a dream technological metropolis, a shining paradise of small farms, giant factories, and sparkling laboratories. Henry Ford and Thomas Edison's "Detroit of the South" would be ten times the size of Manhattan, powered by renewable energy, and free of air pollution. And it would reshape American society, introducing mass commuting by car, use a new kind of currency called "energy dollars," and have the added

benefit (from Ford and Edison's view) of crippling the growth of socialism. The whole audacious scheme almost came off, with Southerners rallying to support what became known as the Ford Plan. But while some saw it as a way to conjure the future and reinvent the South, others saw it as one of the biggest land swindles of all time. They were all true. *Electric City* is a rich chronicle of the time and the social backdrop, and offers a fresh look at the lives of the two men who almost saw the project to fruition, the forces that came to oppose them, and what rose in its stead: a new kind of public corporation called the Tennessee Valley Authority, one of the greatest achievements of the New Deal. This is a history for a wide audience, including readers interested in

American history, technology, politics, and the future.

The area of 19th-century German travel writing on Ireland has received widespread scholarly attention over the years in treatises in both English and German. This book is conceived of more as a reader for the general public than as an academic treatise, presents a surprisingly extensive body of comments drawn from German and Austrian sources from between 1783 and 1865.

"The stories are skillfully told and entirely entertaining . . . An expert, mostly feel-good book about modern medicine" from the award-winning author (Kirkus Reviews, starred review).  
 Behind every landmark drug is a story. It

could be an oddball researcher's genius insight, a catalyzing moment in geopolitical history, a new breakthrough technology, or an unexpected but welcome side effect discovered during clinical trials. Piece together these stories, as Thomas Hager does in this remarkable, century-spanning history, and you can trace the evolution of our culture and the practice of medicine. Beginning with opium, the "joy plant," which has been used for 10,000 years, Hager tells a captivating story of medicine. His subjects include the largely forgotten female pioneer who introduced smallpox inoculation to Britain, the infamous knockout drops, the first antibiotic, which saved countless lives, the first antipsychotic, which helped empty public mental

hospitals, Viagra, statins, and the new frontier of monoclonal antibodies. This is a deep, wide-ranging, and wildly entertaining book. "[An] absorbing new book." —The New York Times Book Review "[A] well-written and engaging chronicle." —The Wall Street Journal "Lucidly informative and compulsively readable." —Publishers Weekly "Entertaining [and] insightful." —Booklist "Well-written, well-researched and fascinating to read Ten Drugs provides an insightful look at how drugs have shaped modern medical practices. Towards the end of the book Hager writes that he 'came away surprised by some of the things he had learned.' I had the very same reaction." —Penny Le Couteur, coauthor of Napoleon's Buttons: How 17 Molecules Changed

This book should, of course, say something about Bavaria, about the people and the customs, about the specialties served in restaurants and, above all, about Bavarian home cooking, to make it possible for you to prepare at home what you liked here. This desire awakens mostly when holiday memories are rekindled. Since the simple ingredients of Bavarian cooking are available in every country of the temperate zone, it should certainly not be difficult to recreate your particular favorite dish. This is a collection of old family recipes, updated by the addition of new data for cooking times and temperatures.

A celebration of winter birds in Sweden by world-famous artist, author and ornithologist, Lars Jonsson. In this stunning book, Lars Jonsson celebrates and explores the beauty of the birds that surround him during the Swedish winter months. Inspired by the desolate, wintry landscapes, the dazzling light and the stark contrast of colours he observes against the snow, Jonsson has created an unparalleled collection of art. Jonsson illustrates each bird in his classic style, and his text provides information on their behaviour and insights into how to identify them as he shares personal observations as both an artist and ornithologist. This unique combination offers an intimate and compelling opportunity to better understand the

method behind one of the world's preeminent bird artists.

Am Ende des 19. und am Anfang des 20. Jahrhunderts war Albanien ein Land, das es zu entdecken galt. Das ewig unruhige Balkanland gehörte noch zu dem in Zerfall begriffenen, großen Osmanischen Reich und war für europäische Reisende nicht einfach zugänglich. Dennoch strömten viele europäische Forscher und Reisende nach Albanien, um den letzten weißen Fleck auf der Karte Europas zu erkunden. Unter ihnen spielte der österreichische Ingenieur Karl Steinmetz eine besondere Rolle. Im Gegensatz zu den meisten Entdeckern und Reisenden war er auf seine Expeditionen gut vorbereitet. Er lernte albanisch,

scheinbar gut, und war dadurch in die Lage versetzt, selbstständig kreuz und quer durch die bis dahin schwer zugänglichen Berge zu reisen und mit den angeblich so schießwütigen Einheimischen umzugehen. Diese Ausgabe umfasst die drei Reiseschilderungen des abenteuerlustigen Karl Steinmetz aus den Jahre 1903, 1904 und 1905.

Using a technique, which he has since patented, Ramirez projects films onto a circular, slightly convex, wooden panel, which he has gilded by hand in an

elaborate process, leaf by leaf and layer by layer. This creates a unique projection surface, which determines the form of the projected images. In this debut artist book, an entire lifetime of dreaming in light is condensed to display a process unique to the California-born artist, whom Wim Wenders considers 'a true 21st century Renaissance artist.'

In der Sendung "Wir in Bayern" schwingt Michaela Hager regelmäßig im Bayerischen Fernsehen den Kochlöffel. Mit ihrem lockeren, bodenständigen Charme und ihrer unverfälschten, gestandenen bayerischen Küche kochte sie sich schnell in die Herzen der Zuschauer. Michaelas Küche ist sinnlich und verführerisch, sie vermittelt Genuss

auf höchstem Niveau und ein Lebensgefühl, das Bayern in der ganzen Welt berühmt gemacht hat: gemütlich, urig und gesellig. Schon im Alter von vier Jahren gab es für sie keinen Zweifel mehr, dass sie Köchin werden wollte. Mit ihrem Mann Andreas gründete sie vor 20 Jahren das legendäre Feinschmeckerlokal "Tölzer Schießstätte am Buchberg". In ihrem ersten Kochbuch erklärt sie nun leicht nachvollziehbar, wie Schwammerlsuppe und Tafelspitz gelingen, wie Ochsenbraten saftig geschmort wird und die gefüllte Schweinsbrust eine resche Kruste bekommt. Mit ihrer ehrlich empfundenen Nähe zum Althergebrachten, zu Traditionen und Brauchtum führt uns Michaela Hager zurück zu den bodenständigen Genüssen.

Kolo Moser war einer der bedeutendsten Universalkünstler im Wien der Jahrhundertwende: er zählt zu den führenden Vertretern des Jugendstils. Sein Werk umfasst Malerei, Grafik und Kunsthandwerk sowie u. a. Mode- und Möbelentwürfe und Designs für Beleuchtungskörper, Bühnendekorationen, Glasfenster, Buchillustrationen und sogar Banknoten. Als Schrittmacher der Kunst seiner Zeit war er Gründungsmitglied der Wiener Secession und etablierte 1903 die Wiener Werkstätte, gemeinsam mit dem Architekten Josef Hoffmann und dem Industriellen Fritz Waerndorfer. Das Ziel dieser Produktionsgemeinschaft bildender Künstler war die Realisierung

des Gesamtkunstwerks auf handwerklich höchstem Niveau. Rund 400 Objekte, systematisch präsentiert und durch Essays erläutert, eröffnen einen neuen Blick auf sein beeindruckendes Lebenswerk.

*Say Nothing* Legare Street Press  
First published in 2000, this volume responds to the rise and spread of advertising throughout Europe and the world in the past one and a half centuries which is breathtaking in its scope and influence, now part of the way we think and live. Historians are only just beginning to understand this process, replacing outmoded theories of manipulation which focused on the advertiser with more sophisticated cultural explanations that centre on the way consumers filter and select

messages creating new worlds of perception. The authors of this work find the origins and trace the development of this new world or perception in the modern city: London and Paris, the forerunners, and the cities and larger towns of France, Germany, Belgium and the Netherlands, where advertising created new urban perceptions, leading to new avenues of consumption and altered lifestyles. Advertising is viewed in this work as a new way of perceiving and organising the world of the city-dweller, a visual culture, a way of attaching meaning to things and to words, or rearranging the mental map of modern life.
