The Gambit Book of Instructive Chess Puzzles Chess for Schools

After you have learned the rules of chess and developed some tactical abilities, how do you go from there? You are now ready to tackle basic issues of strategy, but what is the best way to improve and win more games? Of course, you have to train. But chess training only makes sense if it fits your level of play and if it is structured in an accessible way. Experienced chess trainer Yaroslav Srokovski has developed a practical, well-structured, compact first course in positional understanding. You will learn two fundamental skills: how to assess a position on the board and how to decide which long-term objectives you should aim for in what sort of positions. In 12 chapters Srokovski teaches you things like: how to handle your pawns, what weak squares and strong squares are, bad pieces and good pieces, why it is important if your king is in the middle or not, why and how to get an open line, the problem of knight against bishop, what piece

coordination means and why everyone talks about the bishop pair. This course, which includes many exercises, is tried and tested and ideally suited to bring post-beginners at their next level.

500 Easy Checkmates in One Move for Kids, Part 1 Usborne Books

Chess puzzle books are undoubtedly popular – and with good reason. Solving chess puzzles helps to sharpen a player's tactical and combinational skills. This ability is absolutely fundamental for chess development. You won't get better at tennis until you can consistently hit the ball with accuracy and you won't get better at chess until you improve your ability to calculate. It is that simple and there are no shortcuts. Many puzzle books take a far too simplistic approach and offer endless positions where the solution is nearly always along the lines of: queen takes something check, king takes queen, check, check and a pretty mate. Aesthetically pleasing perhaps but of minimal use for actual improvement as the patterns are so familiar. Practical Chess Puzzles avoids this pitfall. The positions chosen are far more like those that actually appear on the board during the vast majority of games. Furthermore, at all stages, the puzzles are ranked, enabling the student to gauge progress and identify and correct weaknesses. * 600 puzzles featuring instructive, typically "game-like" positions * Model games featuring important instructional points * A ranking system to assess progress.

The Foolish King Montréal, Québec : Chess'n Math Association

When I decided to make a chess puzzle book I had many ideas in mind: The puzzles should be challenging but not so difficult that a chessboard is needed they can be solved on the train, plane or wherever you happen to be when you have a few minutes to spare. The positions should be educational with some instructive point to the solution. I have generally stuck to that, but I also selected many puzzles just because they were fun. The positions are all from fairly recent games, so that the reader will not have seen them before in older puzzle books. John Shaw is a chess grandmaster who has been Scottish Chess Champion three times.

This is a book for those who know the rules of chess and are keen to start winning games. The quickest way to improve your chess is to learn tactics. But not just knowing the themes - you need to get used to using them in real positions. Master tactician John Nunn has thoughtfully crafted a course that gives you the basic nuggets of knowledge and immediately invites you to start finding tactical ideas for yourself. Chess Tactics Workbook for Kids is the first in a new series of books that help players gain chess skills by tackling hundreds of carefully chosen exercises. The themes are similar to those in Gambit's best-selling 'Chess for Kids' series, but the focus is on getting vital hands-on experience. Many positions build on ones given earlier, showing how advanced ideas are normally made up of simpler ones that we can all grasp. Each chapter introduces a basic theme and features dozens of exercises, with solutions that highlight the key points. In each chapter there are tips on what to look out for to help spot tactical ideas. As the chapters progress, we increasingly see how tactical ideas are combined together, with ideas from previous sections repeatedly appearing as part of a deadly one-two punch. The book ends with a series of six test papers where you are given no clues about the themes involved. Dr John Nunn is one of the best-respected figures in world chess. He was among the world's leading grandmasters for nearly twenty years and won four gold medals in chess Olympiads. In 2004, 2007 and 2010, Nunn was crowned World Chess Solving Champion, ahead of many former champions.

Chess Training for Post-beginners David Fickling Books

"The easiest, quickest and most effective way to improve your overall game is to increase your tactical vision. Many good positions are lost because a key moment is passed by and a player misses the opportunity to win by a beautiful combination. This book is designed simply to help you improve your play by seeing tactics better." - Martyn Kravtsiv Written along similar lines to Gambit's earlier Ultimate Chess Puzzle Book, this new work presents 600 puzzles, mostly from the last two years, that are chosen for instructive value and maximum training benefit. To ensure that few will be familiar to readers, Kravtsiv has deliberately chosen positions from obscure games or from analysis. If you find the right answers, it will be because you worked them out yourself! The solutions feature plenty of verbal explanations of the key points, and cover most of the logical but incorrect answers. The book is completed with a set of 'no clues' tests, and an index of themes that will be useful to coaches and those looking to focus on specific aspects of tactics - or just seeking extra clues! Martyn Kravtsiv is an experienced grandmaster from Lviv, Ukraine. His tournament results include tied first places at Cappelle in 2012 and the 2015 Ukrainian Championship, as well as being blitz champion of the 2008 World Mind Sports Games (at age 17).

He represented his country at the 2017 World Team Championship and was a coach for the team that won silver medals at the 2016 Olympiad.
