This is an African retelling of Euripides: an unnervingly topical story of a people and a beloved city destroyed by the brutality of war. The play was first performed in Lagos in 2003 under the distinguished director Chuck Mike, and subsequently toured the UK.

This penetrating sociological study of the causes, consequences, and historical meaning of the civil wars in mid- and late-nineteenth century Chile argues that they were abortive bourgeois revolutions fought out among rival segments of Chile's dominant class. Indeed, it concludes that, in general, not only class but also intraclass struggles can be decisive historically, especially at transitional moments. Originally published in 1984. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-

print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Since many policymakers aspire to pull their countries out of the middle-income trap and into the ranks of high-income countries, they must understand the factors that hinder or support the transition. This book defines the middle-income trap and examines the roles of manufacturing, finance, and trade openness in achieving sustainable development. The book also explores the role of government policy in fostering growth in the People's Republic of China. A common theme is that such policies may have unforeseen side effects that undermine their effectiveness, including how the hukou registration system and land-use policy control the pace of

urbanization.

The third novel in Cherryh's Foreigner space opera series, a groundbreaking tale of first contact and its consequences... Six months have passed since the reappearance of the starship Phoenix—the same ship which brought a colony of humans to the hostile environment of alien atevi nearly two hundred years ago.

During these six months, the atevi have reconfigured their fledgling space program in a bid to take their place in the heavens alongside humans. But the return of the Phoenix has added a frighteningly powerful third party to an already volatile situation, polarizing both human and atevi political factions, and making the possibility of all-out planetary war an even more likely threat. On the atevi mainland, human ambassador Bren Cameron, in a desperate attempt to maintain the peace, has arranged for one human representative from the Phoenix to take up residence with him in his apartments, and for another to be stationed on humanity's island enclave. Bren himself is unable to return home for fear of being

arrested or assassinated by the powerful arch conservative element who wish to bar the atevi from space. Responsible for a terrified, overwhelmed young man, and desperately trying to keep abreast of the atevi associations, how can Bren possibly find a way to save two species from a three-sided conflict that no one can win? The long-running Foreigner series can also be enjoyed by more casual genre readers in sub-trilogy installments. Inheritor is the 3rd Foreigner novel. IT is also the final book in the first subtrilogy.

 A rare and timely intervention from  
 Kingsley Chiedu Moghalu, Deputy  
 Governor of the Central Bank of Nigeria,  
 on development in Africa. To many, Africa  
 is the new frontier. As the West lies  
 battered by financial crisis, Africa is seen  
 as offering limitless opportunities for  
 wealth creation in the march of  
 globalization. But what is Africa to today's

Africans? Are its economies truly on the  
 rise? And what is its likely future? In this  
 pioneering book, leading international  
 strategist Kingsley Moghalu challenges  
 conventional wisdoms about Africa's quest  
 for growth. Drawing on philosophy,  
 economics and strategy, he ranges from  
 capitalism to technological innovation,  
 finance to foreign investment, and from  
 human capital to world trade to offer a  
 new vision of transformation. Ultimately  
 he demonstrates how Africa's progress in  
 the twenty-first century will require  
 nothing short of the reinvention of the  
 African mindset. 'Africans seriously  
 analyzing Africa's opportunities are all too  
 rare. Kingsley Moghalu writes with insight  
 and authority' Paul Collier 'Savvy . . .  
 distinguished' Mark Malloch-Brown 'Unique  
 in the depth of its insight, the ambition of  
 its scope, and the clarity of its argument.  
 Kingsley Moghalu brings a remarkable  
 intellect and his vast experience to this  
 tour de force on Africa's economic  
 transformation. This is a truly weighty  
 contribution to understanding Africa's  
 developmental dilemma and its quest for a  
 more prosperous future' Ngozi Okonjo-  
 Iweala 'Insightful and analytical . . . sheds

instructive light on Africa's position in the world. It is a testament to the palpable optimism that encompasses Africa while frankly addressing the myriad challenges that lie ahead for its economic transformation' Shashi Tharoor Kingsley Chiedu Moghalu is Deputy Governor of the Central Bank of Nigeria. He was the Founder and CEO of Sogato Strategies S.A., a global strategy and risk management consulting firm in Geneva, Switzerland. He has previously worked for the United Nations for 17 years in strategic planning, legal, development finance and executive management. His previous books include Global Justice and Rwanda's Genocide.

An introduction to decision making under uncertainty from a computational perspective, covering both theory and applications ranging from speech recognition to airborne collision avoidance. Many important problems involve decision making under uncertainty—that is, choosing actions based on often imperfect observations, with unknown outcomes. Designers of automated decision support systems must take into account the

various sources of uncertainty while balancing the multiple objectives of the system. This book provides an introduction to the challenges of decision making under uncertainty from a computational perspective. It presents both the theory behind decision making models and algorithms and a collection of example applications that range from speech recognition to aircraft collision avoidance. Focusing on two methods for designing decision agents, planning and reinforcement learning, the book covers probabilistic models, introducing Bayesian networks as a graphical model that captures probabilistic relationships between variables; utility theory as a framework for understanding optimal decision making under uncertainty; Markov decision processes as a method for modeling sequential problems; model uncertainty; state uncertainty; and cooperative decision making involving multiple interacting agents. A series of applications shows how the theoretical concepts can be applied to systems for attribute-based person search, speech applications, collision avoidance, and unmanned aircraft persistent surveillance.

Decision Making Under Uncertainty unifies research from different communities using consistent notation, and is accessible to students and researchers across engineering disciplines who have some prior exposure to probability theory and calculus. It can be used as a text for advanced undergraduate and graduate students in fields including computer science, aerospace and electrical engineering, and management science. It will also be a valuable professional reference for researchers in a variety of disciplines.

Stalked by a hitman for a heinous crime of which he was acquitted, a church pastor suffers waking nightmares about a dysfunctional divine family, a grim reaper which bears a striking resemblance to Johnny Cash, four riderless horses and a looming apocalypse. Meanwhile, society is in turmoil. Federal laws have disarmed honest citizens while freeing convicted murderers. Runaway taxation has driven the everyday economy underground.

Congressional assent to a United Nations treaty facilitates the deadliest terrorist attack since 9/11/01. As the Presidential election nears, an irresistible urge to be truthful seizes the incumbent and her Republican opponent. The incumbent's revelation about systemic voter fraud triggers reforms which result in a landslide victory for the third-party underdog. Ironically, not a single voter remembers selecting the spoiler at the ballot box. Predator and prey finally meet at a funeral, but the ceremony is hijacked by General George Patton. After performing a slapstick resurrection and setting humanity straight on a few things, Patton solves the political mystery by explaining the evolutionary leap which has begun to expand human consciousness. The newly aware congregants proceed to reinvent the United States of America envisioned by its founders.

This work meets a long-standing need in the helping professions by being the first and only comprehensive book on how counselors and psychotherapists can work with clients around values, goal-setting,

decision-making and action planning. Helping clients determine their priorities, set goals, make decisions, and take action to improve their lives are common tasks for virtually all helping professionals when engaging with clients. This is the process known as "values clarification" (or "Values Clarification"). While counselors and psychotherapists widely practice values clarification-some knowingly, others unaware-they typically do so with a limited understanding of its theory, methods and various applications. This book demonstrates, with great precision, case studies, and hundreds of clinical examples, how counselors and psychotherapists in many fields can ask good clarifying questions, conduct clarifying interviews, and employ dozens of values clarification strategies with individuals, couples, families, and groups. To illustrate how values clarification can be used to explore a myriad of counseling topics, the examples throughout the text are often grouped around more specific applications for marriage and family counseling, career counseling, substance abuse and recovery counseling, geriatric counseling, grief counseling, pastoral

counseling, financial counseling, school counseling, rehabilitation counseling, counselor/clinical education and supervision, health counseling, and personal growth. There are clear descriptions of what values clarification is and is not, theory and research, multicultural and diversity issues, and how counselors and therapists can handle value and moral conflicts with clients. Values clarification is compared and contrasted to other approaches to counseling and psychotherapy, including person-centered, cognitive-behavioral, reality therapy-choice theory, existential, individual psychology, solution-focused, narrative, motivational interviewing, acceptance and commitment therapy, appreciative inquiry, life coaching, and positive psychology.

The concept of »postmigration« has recently gained importance in the context of European societies' obsession with migration and integration along with emerging new forms of exclusion and nationalisms. This book introduces ongoing debates on the developing concept of »postmigration« and how it can be applied to arts and culture. While the concept has mainly gained traction in the cultural scene in Berlin, Germany, the contributions expand the field of study by attending to cultural expressions in literature, theatre, film, and art across various European societies, such as the United Kingdom, France, Finland, Denmark, and Germany. By doing so, the contributions highlight this concept's

potential and show how it can offer new perspectives on transformations caused by migration.

Language in Social Life is a major series which highlights the importance of language to an understanding of issues of social and professional concern. It will be of practical relevance to all those wanting to understand how the ways we communicate both influence and are influenced by the structures and forces of contemporary social institutions. In all modern societies individuals are subject to tests, whether to enter educational programs, to pass from one level to the

next or to grant certificates to practice. Yet, tests are powerful tools which are often introduced in undemocratic and unethical ways as disciplinary tools for carrying out various policy agendas. Tests can be detrimental to people's lives as they are capable of affecting and defining the knowledge and behaviour of those who are being tested. The Power of Tests applies a critical perspective of language tests by examining their uses and consequences in education and society and by viewing tests not as isolated events but rather as embedded in social, educational and political contexts. The book is divided into four parts: the first part establishes the power of tests through echoing the voices of test takers, describing the features of the power of tests, and the temptations that tests offer to bureaucrats who use them for power and control. The second part reports on studies that provide empirical evidence about intentions and effects of a number of large scale language tests. The third

part interprets the results by examining their consequences on education and society, arriving at a model of tests' use. The final section of the book offers strategies for controlling and minimising the misuses of tests by introducing the notion of Critical Language Testing which calls for the examination of the consequences and misuses of tests, monitoring of power and pointing to their unethical uses. It also provides a comprehensive discussion of the responsibilities of language testers, including a new Code of Ethics, as well as strategies for guarding and protecting the rights of test takers.
