In 1990, the Congress changed the law governing the use of appropriation accounts because it determined that controls over them were not working. 1 In particular, the Congress found that the Department of Defense (DOD) may have spent hundreds of

millions of dollars for purposes that the Congress had not approved. The 1990 law was intended to improve congressional control by providing that, 5 years after the expiration of the period of availability of a fixed-term appropriation, the appropriation account be closed and all remaining balances canceled. After closing, the appropriation account could no longer be used for obligations or expenditures for any purpose. Because agencies need to keep accurate records, they may, in limited circumstances, adjust accounting records pertaining to closed accounts to correct unrecorded or improperly charged disbursements. To

justify such an adjustment, an agency must have sufficient documentation for each proposed adjustment to show that the (1) disbursement was made when the appropriation account to be charged was available to cover the disbursement, (2) agency either did not record the disbursement when it was made or charged it to the wrong appropriation account at that time, and (3) proposed adjustment will result in the disbursement being charged to the proper appropriation account.

The magic of brands is as old as Coke and as young as Tango. But getting beneath the packaging to understand a brand's winning technique is tough. Why do Kellogg's or Barbie still remain the consumer's friend? Why should a computer name or a sporting logo win favour with consumers worldwide? The World's Greatest Brands asks such key questions of over 350 of the world's leading brands. Explanations of a brand's history, its management and exploitation will appeal to the expert and the consumer. The Second Automobile Revolution

Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems. The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades. Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition,

circuits, and relays. Through a practical and informal approach featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing

procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, *The Hack Mechanic Guide to European Automotive Electrical Systems* will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not intended for hybrid or electric vehicles.

 Each "Missing In Action (M.I.A.) Angel" assignment is to be with someone who is willing to give their life in combat to protect or save others. Some just need that additional bit of help to survive, while others need the presence of an "M.I.A. Angel" as they approach death. It's not easy being an "M.I.A. Angel" although it is many times rewarding. The downside is that sometimes there is nothing that can be done to help, other than the assignment knowing that an angel is with them when they die.
