RN Community Health Nursing Edition 8.0 Elsevier Health Sciences

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care *Child Health Nursing: Partnering with Children & Families* promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC),

and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Nursing Fundamentals F.A. Davis

Master the essentials of health promotion in community and public health nursing! Foundations for Population Health in Community/Public Health Nursing, 6th Edition provides clear, concise coverage of the nurse's role in preventing disease, promoting health, and providing health education in community settings. Case studies and critical thinking activities make it easier to apply concepts to community nursing practice. New to this edition are Healthy People 2030 guidelines and coverage of the latest issues, trends, and approaches. Written by well-known nursing educators Marcia Stanhope and Jeanette Lancaster, this streamlined text covers the fundamentals of designing effective nursing strategies for vulnerable and special populations. Focus on health promotion throughout the text emphasizes initiatives, strategies, and interventions that promote the health of the community. QSEN boxes illustrate how quality and safety goals, competencies, objectives, knowledge, skills, and attitudes can be applied in nursing practice in the community. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels, reinforcing the concept of prevention as it relates to community and public health care. Applying Content to Practice boxes highlight how chapter content is applied to nursing practice in the community. Practice Application scenarios present practice situations

with questions and answers to help you apply concepts to community practice. Genomics coverage provides a history of genetics and genomics and how they impact public/community health nursing care. Coverage of ongoing health care reform issues includes the impact of the Patient Protection and Affordable Care Act of 2010 (ACA) on public health nursing. Evidence-Based Practice boxes highlight current research findings, their application to practice, and how community/public health nurses can apply the study results. NEW! COVID-19 pandemic information has been added. NEW! Healthy People 2030 objectives are highlighted throughout the book, addressing the health priorities and emerging health issues expected in the next decade. NEW! Updated content and figures reflect the most current data, issues, trends, and practices. NEW! Expanded Check Your Practice boxes use Clinical Judgment (Next Generation NCLEX®) steps to guide your thinking about practice scenarios.
