Durch das Bachelor-Studium hat sich das Studieren verändert.

Häufige Prüfungen und überfrachtete Studienpläne setzen

Studierende unter Druck, die Prüfungsangst nimmt zu. Die

Autoren leiten eine Beratungsstelle des Studentenwerks, sie

kennen diese Nöte. In ihrem Ratgeber zeigen sie auf einfühlsame

und humorvolle Weise, wie sich Studierende physisch und

psychisch stärken können: durch Bewegung,

Entspannungstechniken und Genuss. Sie vermitteln Strategien für

effektives Lernen, für das Stressmanagement sowie Hilfen zur

Bewältigung der Prüfungsangst.

Lexicography, together with grammatical studies and textual criticism, forms the basis of biblical exegesis. Recent decades have seen much progress in this field, yet increasing specialization also tends to have the paradoxical effect of turning exegesis into an independent discipline, while leaving lexicography to the experts. The present volume seeks to renew and intensify the exchange between the study of words and the study of texts.

Portals to the Past and to the Future Springer Science & Business Media

Genome Editing Techniques are seen to be at the frontier of current research in the field of emerging biotechnologies. The latest revolutionary development, the so-called CRISPR technology, represents a paradigmatic example of the ambiguity of such techniques and has resulted in an international interdisciplinary debate on whether or not it is necessary to ban the application of this technique by means of a moratorium on its use for human germline modifications, particularly in human embryos in the reproduction process. However, given that other germline engineering techniques like mitochondrial (mt) DNA transfer techniques are already permitted and applied, the question arises what lies at the root of the apparent social unease about the modification of the human germline by Genome Editing Techniques like CRISPR. Against this background, the book seeks to make a substantial contribution to the current debate about a responsible and participatory framework for research on emerging biotechnologies by analysing underlying perceptions, attitudes, arguments and the reasoning on Genome Editing Techniques.

Curriculums for STEM education programs have been successfully implemented into numerous school systems for many years. Recently, the integration of arts education into such programs has proven to be significantly beneficial to students, resulting in a new method of teaching including science, technology, engineering, art, and mathematics. Cases on STEAM Education in Practice is an essential research publication for the latest scholarly information on curriculum development, instructional design, and educational benefits of STEAM learning initiatives. Featuring coverage on a range of topics including fine arts, differentiated instruction, and student engagement, this book is ideally designed for academicians, researchers, and professionals seeking current research on the implementation of STEAM education.

A man goes in search of the Roman poet Ovid, banished to the end of the world. He finds that Ovid's personality and stories have undergone a sea-change, and have fragmented themselves into lots of clues - people, bizarre events, odd stretches of landscape, and a story emerges.

Archaeobotany in Hungary Independently Published

"Thanks to extensive archaeobotanical investigations, it can be now considered as a fact that the Carpathian Basin is one of the longest inhabited regions of Europe. Plant cultivation has a history of eight thousand years, the cultivation of vegetables has been pursued for four thousand years and fruit cultivation has been going on for two thousand years. Cultivated plants arrived in the Carpathian Basin with the first Neolithic agrarian culture. This long-awaited volume presents Hungarian seed and fruit remains with respect to the assumptions that might be drawn regarding plant cultivation. The seed remains also shed light on weed history and the environmental changes taking place in Hungary in the last eight thousand years. The second half of the book is an inventory of all the seed, fruit and food remains that have been unearthed from 350 Hungarian excavation sites in the past 130 years, making the volume an indispensable treasure trove of research data for the interdisciplinary areas of archaeology."--

Representations of gender in learning materials convey an implicit message to students about attitudes towards culturally appropriate gender roles for women and men. This collection takes a linguistic approach to exploring theories about gender

representation within the sphere of education and textbooks, and their effects on readers and students within an international context. In the opening section, contributors discuss theories of representation and effect, challenging the conventional Althusserian model of interpellation, and acknowledging the challenges of applying Western feminist models within an international context. Following chapters provide detailed analyses focusing on a number of different countries: Australia, Japan, Brazil, Finland, Russia, Hong Kong, Nigeria, Germany, Qatar, Tanzania, and Poland. Through linguistic analysis of vocabulary associated with women and men, content analysis of what women and men say in textbooks, and discourse analysis of the types of linguistic moves associated with women and men, contributors evaluate the extent to which gendered representations in textbooks perpetuate stereotypical gender roles, what the impact may be on learners, and the ways that both teachers and learners interact and engage with these texts.
