Digital Humanities is a transformational endeavor that not only changes the perception, storage, and interpretation of information but also of research processes and questions. It also prompts new ways of interdisciplinary communication between humanities scholars and computer scientists. This volume offers a unique perspective on digital methods for and in the humanities. It comprises case studies from various fields to illustrate the challenge of matching existing textual research practices and digital tools. Problems and solutions with and for training tools as well as the adjustment of research practices are presented and discussed with an interdisciplinary focus.

Berger, an eminent religious sociologist and Protestant believer, attempts to square his own rational side with his religious impulses, bringing a lifetime of professional and personal reflection to bear on the nature of faith, its modern pluralistic context, and its social and individual consequences. A timely guide to the problems of faith for believers and skeptics alike.

In its brief but vigorous history, gerontology has spawned a broadening range of specializations. One of the newest of such specializations is narrative gerontology, so named for its emphasis on the biographical, or inside, dimensions of the experience of aging. Telling stories about our world, our relationships, and ourselves is fundamental to how we make meaning. Everything from our history to our religion and our memories to our emotions is linked to the tales we tell ourselves, and others, about where we have come from and where we are going. They are central to who we are. The biographical side of human life is every bit as critical to fathom as the biological side, if we seek a more balanced, positive, and optimistic perspective on what aging is about; if we would honor the dignity and complexity, the humanity and uniqueness of the lives of older persons, no matter what their health or economic standing. In

this respect, a narrative approach is particularly suited to the exploration of such topics as meaning, spirituality, and wisdom, and the connections they share. This volume reflects a selection of new directions and insights, and constitutes a general broadening and deepening of narrative gerontology, exploring its implications for theory and research in the field of aging, and for the quality of life of older adults themselves. Such deepening indicates a greater refinement of thought, method, and intervention. The evolution of narrative gerontology is also evidenced by a significant increase in the number of faculty and graduate students engaged in research in this area, as well as by increasing collaboration among researchers, practitioners, and administrators in applying narrative insights to contexts such as long term care - indeed, healthcare in general. These initiatives have given rise to the phrase, "narrative care as core care".

"When essential oils are put in a lamp, inhaled, applied to the skin, placed in bathwater, or even taken orally, a person can feel relaxed, energized, or uplifted. In this beautifully illustrated book, a holistic practitioner describes the history and physiological basis of aromatherapy, tells how to extract and store the oils, and gives detailed information on 27 of the most important essential oils, including their dosages and beneficial effects."--Library Journal.

Ethics in Nursing Practice Sterling Publishing Company, Inc.

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Dieses Buch bietet, erstmals in englischer Sprache, eine Zusammenschau der modernen Forschung zu Simplicios' Leben und drei seiner fünf Kommentare: Zu Epictetus' *Encheiridion*, zu Aristoteles' *De anima* und zu Aristoteles' *Kategorien*. Der biografische Teil bringt die historische Rolle dieses neoplatonischen Philosophen ans Licht. Geboren in Kilikien, Kleinasien, studierte er in Alexandria und Athen und beendete offenbar sein Leben in Syrien an der Grenze zwischen dem byzantinischen und sassanidischen Reich. Er war ein Vermittler zwischen der griechisch-romischen und der syrischen Philosophie,

die die arabische Philosophie zu Beginn nahen sollte. Der zweite Teil des Buches, der sich mit Fragen der Lehre und der Autorschaft befasst, widmet sich auch dem zugrunde liegenden pädagogischen Curriculum und den Methoden, die neoplatonischen Kommentaren eigen sind, die moderne Interpretation in Studien über Simplicius und andere Neoplatonisten nur zu gerne übersehen.

**Mechanical and Metal Trades Handbook** Burns & Oates

Karl Popper (1902-1994) is one of the great thinkers of the modern age. He developed his key idea, the "open society" already at age 17. Popper at the time believed passionately in Newton's theory of gravitation, by which the science of the day explained the motion of all bodies on earth and in the heavens. But during the great eclipse of 1919 observations were made that confirmed for the first time Einstein's theory of relativity. The *London Times* wrote: "Scientific Revolution; New Theory of the Universe; Newton's Conception Overthrown." If this is so, concluded Popper, and if a genius like Newton can prove to have been wrong and his knowledge, after two hundred years, can be replaced by a better knowledge, then perhaps there are no such things as truths "true once and for all". It was at this point that he developed his brilliant key idea: "Scientific knowledge is not knowledge; it is only conjectural knowledge." Every scientific theory must count as "true" only for so long as it cannot be refuted by some counter-example or replaced by a better theory. And just for this reason modern society must always be open to critiques and new theories. This applies also, indeed quite especially, to politics. Instead of calling, like Plato, for an ideal state, or pursuing, like Marx and Hegel, "totalitarian" philosophical-historical goals, the scientific method of trial and error must also be applied to politics. Was Popper right? Is all our knowledge merely conjectural knowledge resting on trial and error? And did Plato, Hegel and Marx really pave the way for totalitarianism? Is what we need to improve society really rather the method of "hard science"? Can we solve our problems using Popper's "piecemeal social technology"? Popper gives clear and unmistakable answers. The book appears as part of the popular series "Great Thinkers in 60 Minutes".

Libraries have quietly changed over the last 20 years. They have adapted early and consciously to the changes of digitalization, they have recognized the changed need of their users for collaborative work and derived new spatial concepts from this. Transparency and access to information, knowledge and encounters are the prerequisites for holistic social development. It is the challenge of the 21st century as the information age. This book presents the latest developments in library architecture as well as the way scientists and architects are meeting this challenge. With essays by Achim Bonte, Catherine Lau, Max Dudler, Georg Gewers, Henning Larsen Architects, MSAO Architects, Claudia Lux, Marco Muscogiuri, Schmidt Hammer

Lassen Architects, Snøhetta, Sauerbruch Hutton, gmp Architects followed by a conversion with Oliver Jahn and Dante Bonuccelli. KNOWLEDGE TALK's, curated and organized by the editor Architect Ines Miersch-Süß, take place in occasion of the Book Publishing. September 2022 um 19:00 Uhr im Lingnerschloss in Dresden statt! Im 5. und letzten Knowledge Talk der Reihe verbinden wir das Thema Zugang mit dem brennenden Fragen zur Nachhaltigkeit. Der Sächsische Staatsminister Wolfram Günther, die Generaldirektorin Katrin Stump der SLUB und Jette Hopp von Snøhetta diskutierten zusammen zu den Themen Nachhaltigkeit und Open Access. Das Programm finden Sie hier: <https://msaofuturefoundation.com/architecture-for-this-century/> *Prüfungsbuch Lernfeld Hauswirtschaft* Frederick Ungar Barbara Gordon's groundbreaking memoir tells the extraordinary story of a woman who has it all, or thinks she does-a career as an Emmy-award-winning documentary producer, a man she loves, a world of friends, and a beautiful apartment in Manhattan. But beneath the façade, Barbara's life is spinning out of control. In spite of the pills prescribed by her doctor, a nameless terror disrupting her daily life intensifies until she is besieged by crippling anxiety attacks. A formerly strong, independent, successful woman, Barbara's life becomes a nightmare of paralysis and fear. When Barbara finds herself unable to leave her apartment or walk the streets of New York alone, she decides to take charge of her life. She doesn't want pills, she wants answers. Instead of ending her fears, quitting the medicine leads to the unraveling of what she thought was her perfect life, and Barbara becomes a casualty of a flawed and inept mental health system. Barbara had often spoken for the voiceless in her films, but she suddenly finds herself powerless, without a voice of her own. Though she feels frightened and misunderstood, the tenderness and love of another young patient, Jim, helps Barbara rediscover her voice and her identity. In the years since her memoir was first published, thousands of readers all over the world have read her book, followed her descent into hell, traveled with her along the bumpy road to recovery, and celebrated as she creates a new life. *I'm Dancing As Fast As I Can* is a strikingly honest look at a life gone off the rails. Throughout her journey, Gordon's hope and

strength make her an incredible heroine worth rooting for.

#### **Teaching English with Video** New Victoria Pub

From the celebrated author of *Rubyfruit Jungle* and *Bingo* comes a stirring novel of the Civil War, a tale of true love and mistaken identity. Brimming with colorful characters and vivid settings, *High Hearts* is Rita Mae Brown at her most ambitious and entertaining. April 12, 1861. Bright, gutsy and young, Geneva Chatfield marries Nash Hart in Albemarle County, Virginia, the same day Fort Sumter's guns fire the start of the Civil War. Five days later she loses him as Nash joins the Confederate Army. Geneva, who is known as the best rider since Light Horse Harry Lee, cuts her hair, dons a uniform, enlists as "Jimmy Chatfield," then rides off to be with her beloved Nash. But sensitive Nash recoils in horror from the violence of war, while Geneva is invigorated by the chase and the fight. Can she be all the man her husband isn't? She'll sure as hell try. But there is a complication, and his name is Major "Mars" Vickers. This macho major, to his own shock and amazement, finds himself inexplicably attracted to the young soldier named "Jimmy." And this is only the beginning of a novel that moves with sureness and grace from the ferocity of battle to the struggle on the homefront, and brings passion and sly humor to a story of dawning love. *High Hearts* is a penetrating, delightful and sweeping tale that gives fresh life to a fascinating time.

#### *Hers was the Sky* transcript Verlag

The ubiquitousness of data and the emergence of data-driven machine learning approaches provide new means of creating insights. However, coping with the great volume, velocity, and variety of data requires improved data analysis methods. This dissertation contributes a nascent design theory, named the Division-of-Labor framework, for developing complex machine learning systems that can not only address the challenges of big data but also leverage their characteristics to perform more sophisticated analyses. I evaluate the proposed design principles in three practical settings, in which I apply the principles to design machine learning systems that (i) support treatment decision making for cancer patients, (ii) provide consumers with recommendations on two-sided platforms, and (iii) address a trade-off between efficiency and comfort in the context of autonomous vehicles. The evaluations partially validate the proposed theory, but also show that some principles require further attention in order to be practicable.

#### *Popper in 60 Minutes* Random House Australia

The International Council of Nurses is an internationally recognised body that considers nursing issues in detail before putting forward best practice. This publication from the ICN draws upon everyday ethical dilemmas in nursing practice and responds to the realities of nursing and health care in a changing society. It includes the ICN's reviewed Guidelines for Nursing Research and promotes international standards for individual nurses, regulatory bodies and National Boards. This new edition provides the background theory necessary to understand ethical decision making, focusing on the individual nurse's responsibilities - promoting health, preventing illness, restoring health and alleviating suffering - and looking at the wider issues in relation to patients, colleagues and society as a whole.

#### **Digital Methods in the Humanities** Chronicle Books (CA)

As a powerful tool in the production of knowledge, comparing plays a crucial part in the sciences and the humanities. This volume explores the relationship between comparing and narrating in epistemic practices and clarifies the ways in which narratives enable or impede practices of comparing. It takes into account related activities, such as measuring and classifying, modeling, establishing norms and categories, as well as organizing and popularizing knowledge, to analyze the

ambivalent relationship between narratives, scientific explanation, and understanding. The contributions bring out the epistemic role of narratives, and elucidate how narratives are connected to comparisons and scientific explanations.

### **Computers, Language Learning and Language Teaching** Springer

The book offers a comprehensive approach to the assessment and treatment of disturbances in facial expression, oral movement, swallowing, breathing, voice and speech production caused by developmental and acquired neurological conditions. The principles outlined are used in patients with different etiologies (e.g. stroke, tumors, traumas). F.O.T. T., developed by Kay Coombes, is a hands-on approach based on an understanding of neurological functions and the way we learn from experience. The approach aims to give the patient experience of physiological posture and movement using facial-oral functions in normal activities of daily living (ADL). Rather than mere "exercises", F.O.T.T involves meaningful activities aiming to promote participation, according to ICF criteria. Four main areas are covered: nutrition, oral hygiene, nonverbal communication and speech. Each chapter summarises the problems of severely ill patients and shows the clinical reasoning behind the solutions offered. Separate chapters discuss tracheostomy management and the training of the carers involved, including relatives. The chapter authors are experienced specialists (physio-, occupational- and speech-language therapists and physicians), whose contributions aim to provide interdisciplinary perspectives and translate latest

research into clinical practice.

Planen Sie einen Arbeitsaufenthalt oder ein Praktikum im englischsprachigen Ausland? Möchten Sie intensiver mit Ihren englischsprachigen Patienten oder Kollegen kommunizieren? Möchten Sie für sich die reiche Schatzkiste englischsprachiger Pflegefachliteratur bergen ... und nebenbei Ihre englische Grammatik und Aussprache verbessern? Dann bietet Ihnen das englischsprachige Buch der erfahrenen Fachsprachenlehrerin und Kursleiterin Yvonne Ford eine Fülle von Informationen, Tipps und Übungen, um Ihren englischen Wortschatz zu verbessern und zu erweitern.

*The Gift and the Common Good* Springer Nature

Hanna and Andreas will do anything to leave oppressive East Germany behind. There's one escape route open to them, but can they survive it? Hanna and Andreas have always been friends. When they're expelled from school for activism directly challenging the socialist state in East Germany, they end up doing factory work. But what kind of life do they have to look forward to without education or opportunity? Especially when they aren't allowed a voice? The choice to risk imprisonment or death by escaping to the democratic West seems like a risk worth taking. They set out to swim twenty-five hours across the choppy waters of the Baltic Sea. Linke's storytelling achieves a delicate balance between heightened moments of danger--searchlights, jellyfish, a Russian helicopter, a violent summer storm--and the monotony, ineffable fatigue, physical pain, cramping, fear, and hope that fill the rest of the journey. A memorable tale of two people risking all for a chance at freedom.
