Vintage Murakami Springer Science & Business Media

*Humans at the End of the Ice Age* chronicles and explores the significance of the variety of cultural responses to the global environmental changes at the last glacial-interglacial boundary. Contributions address the nature and consequences of the global climate changes accompanying the end of the Pleistocene epoch--detailing the nature, speed, and magnitude of the human adaptations that culminated in the development of food production in many parts of the world. The text is aided by vital maps, chronological tables, and charts.

Multiculturalism and Integration Princeton Architectural Press

David Bate examines automatism and the photographic image, the Surrealist passion for insanity, ambivalent use of Orientalism, use of Sadean philosophy and the effect of fascism of the Surrealists. The book is illustrated with a wide range of surrealist photographs.

Photography and Surrealism Routledge

The Cahiers du Cinéma has played a major role in establishing film theory and criticism as an essential part of the late 20th century culture. This volume contains articles from the 1950s.

**Statistics for Archaeologists** Routledge

Michel de Certeau considers the uses to which social representation and modes of social behavior are put by individuals and groups, describing the tactics available to the common man for reclaiming his own autonomy from the all-pervasive forces of commerce, politics, and culture. In exploring the public meaning of ingeniously defended private meanings, de Certeau draws on an immense theoretical literature in analytic philosophy, linguistics, sociology, semiology, and anthropology--to speak of an apposite use of imaginative literature.

**Hunters Between East and West** Springer

In the decade since its publication, the first edition of *Statistics for Archaeologists* has become a staple in the classroom. Taking a jargon-free approach, this teaching tool introduces the basic principles of statistics to archaeologists. The author covers the

necessary techniques for analyzing data collected in the field and laboratory as well as for evaluating the significance of the relationships between variables. In addition, chapters discuss the special concerns of working with samples. This well-illustrated guide features several practice problems making it an ideal text for students in archaeology and anthropology. Using feedback from students and teachers who have been using the first edition, as well as another ten years of personal experience with the text, the author has provided an updated and revised second edition with a number of important changes. New topics covered include: -Proportions and Densities -Error Ranges for Medians -Resampling Approaches -Residuals from Regression -Point Sampling - Multivariate Analysis -Similarity Measures -Multidimensional Scaling -Principal Components Analysis -Cluster Analysis Those already familiar with the clear and useful format of *Statistics for Archaeologists* will find this new edition a welcome update, and the new sections will make this seminal textbook an indispensable resource for a whole new group of students, professors, and practitioners.

*What Is Cinema?* Univ of California Press

This book presents new and innovative ideas on the didactics of translation and interpreting. They include assessment methods and criteria, assessment of competences, graduate employability, placements, skills labs, the perceived skills gap between training and profession, the teaching of terminology, and curriculum design.

Experimental Architecture Leuven University Press

There is a new and exciting revolution coming. It will dramatically change our landscape, our environment, our economy, and our lives. It will provide each and every one of us with a truly unique sense of independence. It will mark the end of oil-influenced politics, and the beginning of a bright new millennium - a time in which we all will have our own unlimited sources of nonpolluting energy. However, it will not come without a struggle, as history has already shown. The Coming Energy Revolution provides us with an intriguing and insightful look at the forces behind the free-energy movement. The Coming Energy Revolution introduces us to some of the inventors, both past and present, who have

insisted that we are surrounded by a sea of energy that we can tap once we have learned nature's secrets. Conventional science says that space is cold and still, and that what energy does exist cannot be put to useful work. The new-energy innovators say that conventional science is wrong, and that new-energy research is being suppressed by a combination of scientific inertia and corporate self-interest. But the suppression cannot last, as this book shows - there are simply too many inventors who are close to new-energy breakthroughs. The Coming Energy Revolution examines the technologies on which these inventors are working. There are magnets that can redirect the energy of space. There is a gentler form of nuclear energy that can take place on a table top. There is hydrogen, a clean, abundant fuel that can be produced wherever needed. There is a form of hydropower that does not rely on massive dams. And there are other forms of new energy. The Coming Energy Revolution looks at them all, and at the kinds of changes that will be needed to overcome the roadblocks between our old-energy present and our new-energy future.

*Humans at the End of the Ice Age* Univ of California Press

It is impossible fully to understand the American experience apart from Alexis de Tocqueville's *Democracy in America*. Moreover, it is impossible fully to appreciate Tocqueville by assuming that he brought to his visitation to America, or to the writing of his great work, a fixed philosophical doctrine. James T. Schleifer documents where, when, and under what influences Tocqueville wrote different sections of his work. In doing so, Schleifer discloses the mental processes through which Tocqueville passed in reflecting on his experiences in America and transforming these reflections into the most original and revealing book ever written about Americans. For the first time the evolution of a number of Tocqueville's central themes--democracy, individualism, centralization, despotism--emerges into clear relief. As Russell B. Nye has observed, "Schleifer's study is a model of intellectual history, an account of the intertwining of a man, a set of ideas, and the final product, a book." The Liberty Fund second edition includes a new preface by the author and an epilogue, "The Problem of the Two Democracies." James T. Schleifer is Professor

of History and Director of the Gill Library at the College of New Rochelle

*Machinic Assemblages of Desire* Da Capo Press

Revised edition of 'Curtains', published 1961.

*Neolithic corporate identities* Texas Tech University Press

The phenomenal life of Ukrainian peasant Nestor Makhno (1888-1934) provides the framework for this breakneck account of the downfall of the tsarist empire and the civil war that convulsed and bloodied Russia between 1917 and 1921. Makhno and his people were fighting for a society "without masters or slaves, with neither rich nor poor." They acted towards that idea by establishing "free soviets." Unlike the soviets drained of all significance by the dictatorship of a one-party State, the "free soviets" became the grassroots organs of a direct democracy - a living embodiment of the free society - until they were betrayed, and smashed, by the Red Army. Delving into a vast array of documentation to which few other historians have had access, this study illuminates a revolution that started out with the rosiest of prospects but ended up utterly confounded. More than just the incredible exploits of a guerilla revolutionary par excellence, Skirda weaves the tale of a people, and the organizations and practices of anarchism, literally fighting for their lives.

*The Routledge Companion to the History of Retailing* ANU E Press

An epitome of the Synthetic philosophy is an unchanged, high-quality reprint of the original edition of 1889. Hansebooks is editor of the literature on different topic areas such as research and science, travel and expeditions, cooking and nutrition, medicine, and other genres. As a publisher we focus on the preservation of historical literature. Many works of historical writers and scientists are available today as antiques only. Hansebooks newly publishes these books and contributes to the preservation of literature which has become rare and historical knowledge for the future.

**Kingdom Cons** Enslow Publishing, LLC

Contains thirteen national reports and the general report on Money Laundering and Banking Secrecy. The reports were written for the XIVth Congress of the International Academy of Comparative Law which was held in 1994 in Athens, Greece. As narcotics trafficking exploded in the 1980s, it was realized that money laundering had become a threat to the entire integrity of the financial system. The international trend to regard money

laundering as a serious threat to the stability of democracy and the rule of law found expression in the adoption of the 1988 United Nations Drugs Convention. Gradually, the international community diverged from its traditional, narrow approach whereby only the laundering of drug proceeds was considered a threat. In order to combat money laundering efficiently, it soon became clear that criminal law was not sufficient and that it was necessary for banks and other financial institutions to co-operate with law enforcement agencies. The banking community is now obliged to report suspicious transactions, which they often regard as going beyond their role as bankers. The issue of bank secrecy has played an important role in the discussion between law enforcement agencies and the banking community. Both the Council of Europe Convention on Laundering Search, Seizure and Confiscation of the Proceeds from Crime and the UN Drugs Convention require that bank secrecy should not be an obstacle to international co-operation. At the national level the seizure of bank records should not be hindered by bank secrecy.

*History Of Roman Literature, From Its Earliest Period To The Augustan Age* Harvard University Press

A master architect of the twentieth century unfolds his revolutionary idea for a city of the future, a ... solution to the ills of urbanization whereby man can attain dignity in his home, his work, his community. [The book] not only presents [the author's] ... plans for his model community, Broadacre City, but also provides a[n] ... overview of the architect's opinions on crucial contemporary problems such as overcentralization, dehumanized values, and the waning sovereignty of the individual. This volume includes the great model of Broadacre City itself ... -Back cover.

**Toward a New Poetics** Avery

The first book-length critical and historical account of an ultramodern architectural movement of the 1960s that advocated "living equipment" instead of buildings. In the 1960s, the architects of Britain's Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes. In drawings inspired by pop art and psychedelia, architecture floated away, tethered by wires, gantries, tubes, and trucks. In Archigram: Architecture without Architecture, Simon Sadler argues that Archigram's sense of fun takes its place beside the other cultural agitants of the 1960s, originating attitudes and techniques that became standard

for architects rethinking social space and building technology. The Archigram style was assembled from the Apollo missions, constructivism, biology, manufacturing, electronics, and popular culture, inspiring an architectural movement—High Tech—and influencing the postmodern and deconstructivist trends of the late twentieth century. Although most Archigram projects were at the limits of possibility and remained unbuilt, the six architects at the center of the movement, Warren Chalk, Peter Cook, Dennis Crompton, David Greene, Ron Herron, and Michael Webb, became a focal point for the architectural avant-garde, because they redefined the purpose of architecture. Countering the habitual building practice of setting walls and spaces in place, Archigram architects wanted to provide the equipment for amplified living, and they welcomed any cultural rearrangements that would ensue. Archigram: Architecture without Architecture—the first full-length critical and historical account of the Archigram phenomenon—traces Archigram from its rediscovery of early modernist verve through its courting of students, to its ascent to international notoriety for advocating the "disappearance of architecture."

*Stirling and Gowan* Univ of California Press

These two volumes have been classics of film studies for as long as they've been available and are considered the gold standard in the field of film criticism.

**The Practice of Everyday Life** Praeger

A quiet revolution is taking place in avant-garde French poetry and prose. In this collection of twelve interviews with some of France's most important poets and writers, Serge Gavronsky introduces American readers to these exciting new developments. As Gavronsky explains, a neolyricism is now replacing the formalism of the 1960s, '70s, and '80s. In his substantial introduction, Gavronsky notes how the ideological definition of writing (écriture) has given way to more open forms of writing. Human experiences of the most ordinary kinds are finding a place in the text. These interviews offer a view of the poets' and writers' creative processes and range over such topics as current literary theory, the impact of American poetry in France, and the place of feminism in contemporary French writing. Each interview is accompanied by samples of the writer's work in French and in Gavronsky's English translations. Toward a New Poetics provides a highly informative cultural and critical perspective on

contemporary writing in France, introducing us to works which are now transforming the idea of literature itself.

The Nineteenth Century Hansebooks

Sandy Hook Elementary School...Columbine High School...San Bernardino Social Services Center...Aurora Movie Theater. There are more school shootings and public massacres than anyone wants to believe. What motivates the people behind these horrific crimes? This book addresses the needs of high school psychology students, detailing the accounts of the shooting sprees. This timely text follows with details of the individuals responsible for the acts and describes how mental health professionals seek to break the physical and psychological motivations of the mass murderers.

*Sunflower* Univ of California Press

A ground-breaking study of the roles played by foreign languages in film and television and their relationship to translation. The book covers areas such as subtitling and the homogenising use of English, and asks what are the devices used to represent foreign languages on screen?

*An Epitome of the Synthetic Philosophy* Paul Mellon Centre for Studies

The publication in 1988 of Salman Rushdie's novel *The Satanic*

Verses triggered a furor that pitted much of the Islamic world against the West over issues of blasphemy and freedom of expression. The controversy soon took on the aspect of a confrontation of civilizations, provoking powerful emotions on a global level. It involved censorship, protests, riots, a break in diplomatic relations, culminating in the notorious Iranian edict calling for the death of the novelist. In *The Rushdie Affair*, Daniel Pipes explains why the publication of *The Satanic Verses* became a cataclysmic event with far-reaching political and social consequences. Pipes looks at the Rushdie affair in both its political and cultural aspects and shows in considerable detail what the fundamentalists perceived as so offensive in *The Satanic Verses* as against what Rushdie's novel actually said. Pipes explains how the book created a new crisis between Iran and the West at the time--disrupting international diplomacy, billions of dollars in trade, and prospects for the release of Western hostages in Lebanon. Pipes maps out the long-term implications of the crisis. If the Ayatollah so easily intimidated the West, can others do the same? Can millions of fundamentalist Muslims now living in the United States and Europe possibly be assimilated into a culture so alien to them? Insightful and brilliantly written, this volume

provides a full understanding of one of the most significant events in recent years. Koenraad Elst's postscript reviews the enduring impact of the Rushdie affair.

**Translation and Meaning** New York Review of Books

Vintage Readers are a perfect introduction to some of the greatest modern writers presented in attractive, accessible paperback editions. "Murakami's bold willingness to go straight over the top is a signal indication of his genius. . . . A world-class writer who has both eyes open and takes big risks." —The Washington Post Book World Not since Yukio Mishima and Yasunari Kawabata has a Japanese writer won the international acclaim enjoyed by Haruki Murakami. His genre-busting novels, short stories and reportage, which have been translated into 35 languages, meld the surreal and the hard-boiled, deadpan comedy and delicate introspection. Vintage Murakami includes the opening chapter of the international bestseller *Norwegian Wood*; "Lieutenant Mamiya's Long Story: Parts I and II" from his monumental novel *The Wind-Up Bird Chronicle*; "Shizuko Akashi" from *Underground*, his non-fiction book on the Toyko subway attack of 1995; and the short stories "Barn Burning," "Honey Pie." Also included, for the first time in book form, the short story, "Ice Man."
