Information, Systems and Information Systems making sense of the field Peter Checkland and Sue Holwell Lancaster University, UK Science-based technology helps to shape our lives, and no technology is more powerful in this respect than that associated with information. But the emerging linked fields of information systems and information technology are still in a very confused state. There is a torrent of technical developments but the concepts which bring structure to the field and make sense of it lag behind. This book seeks to dispel that confusion, and aims to make sense of IS and IT as a whole. Conventional theory bears

little relation to the experience most people have with computer-based systems in organizations. Based on real-world experiences in both the private and public sectors, this book from Peter Checkland and Sue Holwell tackles the subject afresh.

Information, Systems and Information Systems provides a practice-based approach to the thinking needed to underpin provision of information support in organizations. Starting from fundamentals, the book develops a coherent account of the field. The book is thus a work of conceptual cleansing. It presents a well-argued and tested account of IS and IT which is both holistic and coherent. The sense-making models which emerge can encompass any particular assumptions about the nature of organizational reality and management, whether 'hard' functionalist or 'soft' interpretive ones, though the authors' sympathies are with the latter.

[The Iran-Iraq War](#) Vigeo Press

The Iran-Iraq War is one of the largest, yet least documented conflicts in the history of the Middle East. Drawing from an extensive cache of captured Iraqi government records, this book is the first comprehensive military and strategic account of the war through the lens of the Iraqi regime and its senior military commanders. It explores the rationale and decision-making processes that drove the Iraqis as they grappled with challenges that, at times, threatened their existence. Beginning with the bizarre lack of planning by the Iraqis in their invasion of Iran, the authors reveal Saddam's desperate attempts to improve the competence of an officer corps that he had purged to safeguard its loyalty to his tyranny, and then to weather the storm of

suicidal attacks by Iranian religious revolutionaries. This is a unique and important contribution to our understanding of the history of war and the contemporary Middle East.

This Training and Readiness (T&R) Manual establishes training standards, regulations and policies regarding the training of Marines in the Personnel and Administration occupational field. The T&R Program is the Corps' primary tool for planning, conducting and evaluating training and assessing training readiness. Subject matter experts (SEMs) from the operating forces developed core capability Mission Essential Task Lists (METLs) for ground communities derived from the Marine Corps Task List (MCTL). This T&R Manual is built around these METLs and other related Marine Corps Tasks (MCT). All events contained in the manual relate directly to these METLs and MCTs. This comprehensive T&R Program will help to ensure the Marine Corps continues to improve its combat readiness by training more efficiently and effectively. Ultimately, this will enhance the Marine Corps' ability to accomplish real-world missions.
