Sound Perception and the Well-Being of Vulnerable Groups Frontiers Media SA
Producto de la ejecución del proyecto de investigación "Actividad física y parques en Bucaramanga, caracterización y factores relacionados con su uso", se presenta este libro dirigido a la comunidad en general y en especial a la bumanguesa, con el fin de proporcionar información de calidad, actualizada y útil, en términos sencillos, que contribuya al conocimiento de los parques de la ciudad, su importancia dentro del ecosistema urbano y la calidad de vida de todos los habitantes de la ciudad.

Human dimensions of animal translocations Springer Nature
Livestock production systems are generally considered to have various negative environmental impacts, including nutrient leaching, and a significant contribution to global warming. In this respect, the reduction of gas or

ammonia emissions can be achieved through improved efficiency in the choice of feedstuffs. The use of alternative feeds or additives can contribute to a more energy-efficient ration with lower emissions. Such strategies can contribute to improved animal production and health status. Studies have reported that feed additives such as nitrogen-containing compounds, probiotics, prebiotics, and plant extracts significantly reduce ruminant methane. Moreover, research suggested that fruit pomaces could be a low-cost fibre source in poultry nutrition, and that the inclusion of orange pulp in pigs' diets can reduce the potential ammonia and methane emissions. To properly evaluate the most adequate reuse strategy it is necessary a specific life cycle assessment for each co-product.

Bucaramanga al parque Frontiers Media SA

This book offers the first comprehensive overview of alternative approaches to architectural practice. At a time when many

commentators are noting that alternative and richer approaches to architectural practice are required if the profession is to flourish, this book provides multiple examples from across the globe of how this has been achieved and how it might be achieved in the future. Particularly pertinent in the current economic climate, this book offers the reader new approaches to architectural practice in a changing world. It makes essential reading for any architect, aspiring or practicing.

 Este livro, fruto de um intenso trabalho de pesquisa de Fabiana O. Koga, traz uma contribuição original e ímpar para o estudo das altas habilidades/superdotação, ao evidenciar o talento musical, pouco valorizado no cenário educacional atual, tendo em vista que a educação musical não encontra espaço na maioria dos currículos escolares. Ao percorrer os capítulos desta obra, é possível compreender a história do ensino da música, o conceito de talento e talento musical bem como o cenário das pesquisas nacionais e internacionais sobre este tema. A autora ainda destaca o importante papel da escola na identificação de estudantes com talento musical, para que seja oferecido o enriquecimento ou o encaminhamento para projetos e instituições que fomentem o pleno desenvolvimento destes potenciais. Deste modo, poderão ser oportunizadas condições para que eles possam seguir no caminho da profissionalização e da construção de uma

identidade. Assim, a construção do Protocolo para Screening de Habilidades Musicais (PSHM), nas modalidades impressa e virtual contribuirá sobremaneira, pois dará visibilidade àqueles estudantes que demonstrem talento musical conferindo urgência à reflexão sobre as políticas públicas para a educação musical e a educação especial e permitindo a estes indivíduos a oportunidade de darem os primeiros passos rumos à sua autorrealização. *Miscellania Frontiers Media SA*
 Completamente revisada e atualizada, a 2a edição de Dependência química: prevenção, tratamento e políticas públicas mostra que discussões e reflexões sobre os diversos tipos de drogas são cada vez mais necessárias, tendo por base um conhecimento científico sólido. Esta é uma fonte indispensável para quem estuda ou trabalha com a área da saúde, e foi desenvolvida por mais de 100 profissionais e pesquisadores, em conformidade com o DSM-5. *Walking Sound Perception and the Well-Being of Vulnerable Groups*

 Partout dans le monde, les innovations pédagogiques se concrétisent dans l'action quotidienne au sein d'une classe. Réussissent-elles à produire des effets visibles dans un système scolaire où persistent les pratiques conservatrices ? Comment agissent-elles sur l'évolution de nos méthodologies d'enseignement ? De quelle manière les pratiques de classe dépendent-elles du contexte dans lequel elles se déroulent étant donné que nous travaillons en diversité culturelle ? Qu'est-ce qui influence le choix des contenus des cours et donne une cohérence à l'enseignement ?

Comment développer la capacité de l'apprenant à établir une relation entre sa culture d'origine et la culture francophone ? Et quel est le rôle du professeur en tant que médiateur culturel ? Les textes rassemblés dans ce volume, après le Congrès mondial de 2016, explorent ces différentes questions qui sont fondamentales pour une classe de français active et ouverte.

Catalog IUL Press

This book constitutes the revised and selected papers from the 5th International Workshop on Engineering Multi-Agent Systems held in Sao Paulo, Brazil, in May 2018, in conjunction with AAMAS 2018. The 11 full papers presented in this volume were carefully reviewed and selected from 18 submissions. The book contains also the best paper of the workshop that has been published previously in another LNCS volume. The EMAS workshop focusses on the cross-fertilisation of ideas and experiences in the various fields with the aim to enhance knowledge and expertise in MAS engineering, to improve the state-of-the-art, to define new directions for MAS engineering, to

investigate how established methodologies for engineering and large-scale and open MAS can be adapted.

National Union Catalog INAP

This book features a multidisciplinary focus on walking as a mode in the context of transportation, urban planning and health. Breaking down the silos, this book presents a multidisciplinary focus bringing together research from transport, public health and planning to show linkages and the variation in experience around the world.

Nature's Contributions to People: On the Relation Between Valuations and Actions Ediciones UIS

El uso masificado de las nuevas tecnologías y la progresiva democratización de Internet han supuesto múltiples transformaciones de la realidad social en los últimos años. Los gobiernos están intentando brindar respuestas a las nuevas formas de interacción social presentes en el panorama cotidiano. Dentro de este esfuerzo, la incorporación de estrategias tecnológicas que permitan diseñar modelos alternativos de

gestión pública surgen como una necesidad. En este contexto de configuración de nuevas estrategias de gestión pública se ha producido el surgimiento de un nuevo modelo que ha despertado la atención de académicos, funcionarios públicos y sociedad civil: el Gobierno Abierto (GA). Este modelo emergente propone reinventar la forma de gobernar introduciendo elementos que combinan el uso de nuevas tecnologías y fortalecen los valores democráticos.

This book introduces the UTCI (Universal Thermal Climate Index) and summarizes progress in this area. The UTCI was developed as part of the European COST Action Program and first announced to the scientific community in 2009. Since then, a decade has followed of applicability tests and

research results, as well as knowledge gained from applying the UTCI in human adaptation and thermal perception. These findings are of interest to researchers in the interdisciplinary areas of biometeorology, climatology and urban planning. The book summarizes this progress, discussing the limitations found and provides pointers to future developments. It also discusses UTCI applications in the areas of human biometeorology and urban planning including possibilities of using UTCI and similar indices in climate-responsive urban planning. The book's message is illustrated with many case studies from the real world. Chapter 10 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com. *Le français pour et par une classe active et ouverte* John Wiley & Sons An authoritative overview of contemporary approaches to integrative skin health The popularity of integrative medical treatment of skin disorders has increased significantly in recent years—requiring

practicing clinicians to keep pace with continuing developments in dermatological research and methods. *Advances in Integrative Dermatology* offers a comprehensive survey of this dynamic field, providing up-to-date information on both preventative and therapeutic approaches to skin health. Combining clinical medicine with complimentary treatment plans, integrative dermatology provides an innovative perspective to individual patient care. This essential text explores new research in areas including the effects of stress and pollution on the skin, the importance of high-quality sleep, complementary methods of averting skin conditions, and more. Recognizing the impact skin disorders have on physiological, psychological, and emotional health, editors Katlein França and Torello Lotti illustrate key components of inclusive skin health strategies, such as therapeutic diets and nutritional supplements, topical botanicals, and other complementary therapies. Filling a significant gap in current literature on integrative dermatology,

this valuable resource: Answers the common questions asked by patients in real-world dermatology practices Addresses pervasive misconceptions of integrative dermatological methods and principles with evidence-based review of current practices Examines contemporary research in the diagnosis and treatment of dermatological disorders Presents comprehensive treatment options for a wide range of conditions such as rosacea, melanoma, and psoriasis *Advances in Integrative Dermatology* is an indispensable volume for physicians seeking to incorporate holistic techniques into their practices, expand their knowledge of integrative medicine, and provide the best possible care for their patients. [Bridging Music Informatics with Music Cognition](#) Editora Oficina Universitária "Quem controla o passado controla o futuro; quem controla o presente controla o passado", escrevia há 72 anos George Orwell em sua clássica distopia 1984. O poder do passado sobre o presente e sua capacidade de reafirmá-lo

motivou instituições em geral, estados e partidos em todo o mundo e ao longo do tempo a pretender domesticar a história, dominar o processo de construção de sua narrativa. Mitos e Mitologias da Participação militar brasileira no Haiti trata exatamente sobre isso, apresenta de forma instigante como, desde os momentos iniciais da participação brasileira na Minustah, as instituições militares empreenderam um esforço em dominar a narrativa sobre suas próprias experiências. No contexto desta elaboração, desenvolve-se o mito do "jeito brasileiro de fazer Operações de Paz", uma reedição requentada de ideias de Gilberto Freire e do incompreendido homem cordial de Sérgio Buarque de Holanda. Parcela da intelectualidade dedicada ao tema adere a essa narrativa e veio a ignorar contradições existentes entre a Doutrina de Coordenação Civil da ONU (Cimic) e as práticas operacionais dos militares brasileiros, estampadas nos diversos registros documentais do período, inclusive nos produzidos pelos próprios militares. A obra em questão lança um olhar objetivo e

compromissado com o método científico sobre essa participação, convidando o leitor, a compreender as bases da construção de uma Mitologia Moderna sobre a experiência militar no Haiti e os limites que impuseram uma verdadeira barreira à compreensão da Doutrina de Cimic da ONU por parte de nossos militares.

Applications of the Universal Thermal Climate Index UTCI in Biometeorology

Frontiers Media SA Evaluating the role of logistics and supply chain management skills or applications is necessary for the success of any organization or business. As market competition becomes more aggressive, it is crucial to evaluate ways in which a business can maintain a strategic edge over competitors. The Handbook of Research on Information Management for Effective Logistics and Supply Chains highlights strategies, tools, and skills necessary for supply management within organizations and companies. Featuring best practices and empirical research within the field, this handbook is a critical reference source for scholars, practitioners,

researchers, information systems and telecommunication specialists, and managers.

Alternative and Novel Livestock Feed: Reducing Environmental Impact

Oxford University Press Music informatics is an interdisciplinary research area that encompasses data driven approaches to the analysis, generation, and retrieval of music. In the era of big data, two goals weigh heavily on many research agendas in this area: (a) the identification of better features and (b) the acquisition of better training data. To this end, researchers have started to incorporate findings and methods from music cognition, a related but historically distinct research area that is concerned with elucidating the underlying mental processes involved in music-related behavior.

Engineering Multi-Agent Systems Springer

This handbook presents the great contemporary challenges facing cities and urban spaces in Latin America and the Caribbean. The content of this multidisciplinary book is organized into four large sections focusing on the histories and

trajectories of urban spatial development, inequality and displacement of urban populations, contemporary debates on urban policies, and the future of the city in this region. Scholars of diverse origins and specializations analyze Latin American and Caribbean cities showing that, despite their diversity, they share many characteristics and challenges and that there is value in systematizing this knowledge to both understand and explain them better and to promote increasing equity and sustainability. The contributions in this handbook enhance the theoretical, empirical and

methodological study of urbanization processes and urban policies of Latin America and the Caribbean in a global context, making it an important reference for scholars across the world. The book is designed to meet the interdisciplinary study and consultation needs of undergraduate and graduate students of architecture, urban design, urban planning, sociology, anthropology, political science, public administration, and more. Psicología del Deporte vol 29, nº 1, 2020 Routledge La Revista de Psicología del Deporte publica trabajos de carácter científico que estén realizados con rigor

metodológico y que supongan una contribución al progreso en el ámbito de la Psicología del Deporte. Se recogen trabajos de naturaleza teórica, experimental, empírica y profesional con preferencia para aquellos que presenten cuestiones actuales y de relevancia científica y discutan planteamientos polémicos. Por lo demás, la interdisciplinariedad en el campo de la actividad física y deportiva es un objetivo de la Revista. En este número 29-1 de 2020 se recogen varios artículos de investigación relacionados con el campo de la Psicología del Deporte.
