 War bows dominated battlefields across the world for centuries. In their various forms, they allowed trained archers to take down even well-armoured targets from great distances, and played a key role in some of the most famous battles in human history. The composite bow was a versatile and devastatingly effective weapon, on foot, from chariots and on horseback for over a thousand years, used by cultures as diverse as the Hittites, the Romans, the Mongols and the Ottoman Turks. The Middle Ages saw a clash between the iconic longbow and the more technologically sophisticated crossbow, most famously during the Hundred Years War, while in Japan, the samurai used the yumi to deadly effect, unleashing bursts of arrows from their galloping steeds. Historical weapons expert Mike Loades reveals the full history of these four iconic weapons that changed the nature of warfare. Complete with modern ballistics testing, action recreations of what it is like to fire each bow and a critical analysis of the technology and tactics associated with each bow, this book is a must-have for anyone interested in ancient arms.

 Although the longbow may best be known for its deployment during the Hundred Years' War, its origins lie with ancient Saxon seafighters and Welsh craftsmen. This book presents the story of this weapon. It describes the bow's use in medieval hunts and associated customs, and follows the weapon's development and tactical deployment.

 Chinese Archery is a broad view of traditional archery in China as seen through the eyes of historians, philosophers, poets, artists, novelists and strategists from 1500 BC until the present century. The book is written around parallel text translations of classical Chinese sources some famous and some little known in which Chinese writers give vivid and detailed explanations of the techniques of bow-building, archery and crossbow technique over the centuries. The author is both a sinologist and practising archer; his translations make the original Chinese texts accessible to the non-specialist. Written for readers who may never have picked up a book about China, but still containing a wealth of detail for Chinese scholars, the book brings the fascinating history of Chinese archery back to life through the voices of its most renowned practitioners.

 Winner of the 2014 Monica Hughes Award for Science Fiction and Fantasy, from the author of Plain Kate. At the very edge of the world live the Shadowed People. And with them live the dead. There, in the village of Westmost, Otter is born to power.

She is the proud daughter of Willow, the greatest binder of the dead in generations. It will be Otter's job someday to tie the knots of the ward, the only thing that keeps the living safe. Kestrel is training to be a ranger, one of the brave women who venture into the forest to gather whatever the Shadowed People can't live without and to fight off whatever dark threat might slip through the ward's defenses. And Cricket wants to be a storyteller -- already he shows the knack, the ear -- and already he knows dangerous secrets. But something is very wrong at the edge of the world. Willow's power seems to be turning inside out. The ward is in danger of falling. And lurking in the shadows, hungry, is a White Hand, the most dangerous of the dead, whose very touch means madness, and worse. Suspenseful, eerie, and beautifully imagined.

In the Paleolithic era, over 250,000 years ago, archery was invented. With bows and arrows made from wood (mostly pine), archery was presumably used only for hunting. As technology advanced, stone arrowheads were fashioned on the ends of arrows, making them more effective. Archery arrived in the Americas around 2,500 BC. While archery was mostly used for hunting, the tribes of the Southern United States created a game that involved shooting arrows into a moving hoop. The Indian tribes of the Great Plains were the first to become adept at archery on horseback. During the Iron Age, Babylonians and Assyrians used archery in warfare. Just as Native American tribes learned to perfect archery on horses, these peoples became skilled in archery on moving war chariots. Into the Middle Ages, European warfare relied heavily on both skilled and unskilled archers. Implementing mass archery tactics during the Crusades, the English invented their own bow, the English long bow, one of the most popular styles to this day. Today, archery is an Olympic sporting event, a skill used in recreational hunting, and somewhat of a lost art. Recently, archery has become a bit of a fad in America and the United Kingdom because of the rise in popular culture of archers like Robin Hood, Green Arrow and The Hunger Games' Katniss Everdeen.

The Bronze Bow Berkeley : University of California Press

Excerpt from A Study of Bows and Arrows The capacity of a bow to throw an arrow a given distance may be taken as a criterion of its value as a weapon, wherewith to do damage, either in the chase or in conflict. The weight and velocity of the missile are its

chief characteristics, Whether it be a stone, a bullet, or an arrow. Besides the cast of a bow, there are other factors that bear directly upon its function, namely: material, Size, strength, quality of recoil or action. Research on sexual violence has been a growing area of academic study since the 1970s. However, the focus of these efforts has centred on younger women, leaving older women largely ignored in research. This book presents data from the first UK study to examine the extent, nature and impacts of sexual violence against people aged 60 and over. Drawing on both quantitative analysis of reported cases of sexual violence against people over 60 and qualitative interviews with practitioners in sexual violence and age-related organisations as well as survivors of sexual violence, this book situates the research findings in the context of feminist criminology and gerontology, and sets an agenda for future research, policy and practice. Sexual Violence against Older People is vital reading for practitioners and policymakers, and those engaged in studies of criminology, health and nursing, social work, elder abuse and violence against women.
