Portfolios for Health Professionals

Elsevier
Health Sciences

This book is the ultimate treatise for the Security professionals up to senior manager level. It has

been aligned with Private Security Agencies (Regulation) Act-2005, Model Rules thereof, and National Occupation Standards for FOUR out of EIGHT Job Roles as identified Indian Sector Skill Council. These job roles comply with the NSQF guidelines, as such listed in National

Qualification Register. These job roles are: - (a) MEPQ7101: Unarmed Security Guard (b) MEPQ7102: Armed Security Guard (c) MEPQ7103: Personal Security Officer (d) MEPQ7201: Security Supervisor Consolidation of the four job roles was possible due to many a

common elements and Occupation Standards. The resultant product is economical and makes it suitable for the security staff employed in these four job roles. The book packs requisite knowledge and experience for Senior Managers/ Supervisors to manage/ supervise and mentor their staff, and Trainers to learn and train. The National Occupation Standards and legal aspects having a bearing on the private security sector have been the focus during development of its unique

discourse. The book covers the training needs of approx. 75% of the personnel employed in Commercial and Industrial Security Sector.

Performance Criteria and Knowledge Elements in the Qualification Pack and KLOs in Model Curriculums are global in nature, as such, as relevant globally, with exception of statutory aspects.

Textbook of Nursing Management and Leadership - E-Book
 JAYPEE BROTHERS
 PUBLISHERS

This book is a one-stop resource on all the critical aspects of planning and designing hospitals, one of the most complex healthcare projects to undertake. A well-planned and designed hospital should control infection rate, provide safety to patients, caregivers and visitors, help improve patients' recovery and have scope for future expansion and change. Reinforcing these basic principles, guidance on such effective planning and designing is the key focus. Readers are offered

insights into eliminating shortcomings at every stage of setting up a hospital which may not be feasible to rectify later on through alterations. Chapters from 1 to 12 of the book provide exhaustive notes on initial planning, such as detailed project reports, feasibility studies, and area calculation. Chapters 13 to 27 include designing and layout of all the essential departments/units such as OPD, emergency, intermediate care, diagnostics, operating

rooms, and intensive care units. Chapters 28 to 37 cover designing support services like sterilization department, pharmacy, medical gas pipeline, kitchen, laundry, medical record, and mortuary. Chapters 38 to 48 take the readers through planning other services like air-conditioning and ventilation, fire safety, extra low voltage, mechanical, electrical, and plumbing services. Chapter 49 is for the planning of medical equipment. A particular chapter on "Green"

hospital designing is included. This book is a single essential tabletop reference for hospital consultants, medical and hospital administrators, hospital designers, architecture students, and hospital promoters. *Textbook of Nursing Education - E-Book* Elsevier Health Sciences It was a long-time desire of nursing fraternity to have a textbook on nursing education that has the content for all the units of the INC-prescribed syllabus. This book pointedly deals with

all the contents specified by the INC curriculum. The book has been written keeping in mind the requirements of the modern Indian nurse educators—what they need to know and practice in the classroom. This book provides comprehensive study material and practice exercises on Nursing Education the way it is used in day-to-day conversations in the hospital environment. • Comprehensive, exhaustive and well-structured coverage •

Lucid presentation with easy language for ease of comprehension • Practical approach with relevant theoretical perspectives answering common questions and issues that arise while learning the subject • Ample number of examples, tables and other learning aids • All the essential elements of communication in modern-day nursing practice like nursing reports, records, etc., discussed, analysed and exemplified • Examples from real-life health care communications provided

• Exhaustive end-of-chapter exercises • Solutions for all objective type exercises given *Army Logistician* Elsevier Health Sciences Portfolios for Health Professionals 3e is a practical guide to designing and developing a portfolio that documents and communicates your professional achievements and competencies, in order to meet the Australian Health Practitioner Regulation Agency (AHPRA) annual registration requirements.

Now revised to address a range of health professions, this third edition will help students to gain a basic understanding of what a portfolio is, how it is used, and why different types of portfolio may be required for different purposes. The book provides health professionals with detailed guidelines for developing a quality portfolio that will help them to review their professional practice, direct their continuing professional development, assess their learning and

career planning, and communicate their professional achievements. Updated regulatory requirements for national registration Aligned to updated APRHA CPD standards New section on clinical reasoning Increased focus on reflective practice throughout, to encourage critical thinking Expanded section on ePortfolios, including examples Greater emphasis on evidence-based practice New Chapter 7, with practical examples of the approaches used by a

range of health practitioners to develop their professional portfolios
War Department Technical Manual
Elsevier Health Sciences Portfolios for Nursing, Midwifery and other Health Professions is a practical guide providing detailed strategies for developing a quality portfolio that will assist you to review your professional practice, assess your learning and career planning, direct your continuing professional development

and effectively communicate your professional achievements. Written by Lynette Cusack and Morgan Smith, this fourth edition will help you understand the drivers and benefits of portfolios and how to design and evaluate a quality portfolio in order to meet the Australian Health Practitioner Regulation Agency (AHPRA) annual registration requirements. Clearly outlines what a portfolio is, how it is used and why different types of portfolios are required for

different purposes Supports understanding of the relationship between portfolios and the AHPRA regulatory requirements of self-declaration and practising in accordance with professional practice standards Assists in understanding and applying reflection techniques in professional development, learning and portfolio use. An increased focus on how portfolios relate to career planning and achieving professional goals Highlights different ways of demonstrating

evidence of achievements An increased emphasis on demonstrating safety and quality in healthcare and person-centred practice *Technical Manual* Elsevier Health Sciences This book covers the knowledge of shipboard operations required by candidates for professional qualification as Chief Officer and Master Mariner. It deals with the basic routines and procedures, and the many regulations governing their use, for the safe and efficient operation of merchant

ships. The book is also designated a fundamental text for the Maritime Transport paper of the Chartered Institute of Transport's membership examinations. The second edition takes into account recent developments in technology and regulation, and in particular covers major international legislation on Safety of Life at Sea and on Maritime Pollution as well as recent UK regulations on occupational health and safety and on operation of ro-ro ferries.

In an analysis of political, economic, and social development in Peru in the years between 1980 and 2016, this book explores the failure of the socialist Left to realize its project of revolutionary social transformation.

Based on extensive interviews with leading cadres in the struggle for revolutionary change and a profound review of documents from the principal socialist organizations of the

1980s and 1990s, the volume reveals that the socialist Left did not fully comprehend the deep political and social implications of changes to the country's class structures. As such, the Left failed to develop and implement adequate strategic and tactical responses to the processes that eroded its political and social bases in the 1980s and 1990s, ultimately leading to its loss of social and political power. Lust concludes that the continued political and

organizational agony of the Peruvian socialist Left and the hegemony of neoliberalism in society is a product of the dialectical interplay between the objective and subjective conditions that determine Peruvian capitalist development.

A Guide to Effective Property Management in Hong Kong Elsevier

Health Sciences

A Guide to Effective Property Management in Hong Kong brings together the practical experience and insights of a chartered surveyor who

has had more than thirty years of experience in property management and real estate in Hong Kong and Canada. Property managers, property owners, administrators and students of the subject will find here a wealth of information and practical detail which provides the foundation for efficient and effective property management. The author also places particular emphasis on learning and improving interpersonal and communication skills.

The implementation of National registration requires Australian and New Zealand Nurses and Midwives to perform annual Continuing Professional Development. They must also document evidence of skills acquisition, activities, reflection, identification and prioritisation of their learning needs in a portfolio. With the global trend towards e-Portfolios, many higher education institutions encourage the

use of e-Portfolios as a tool to enhance learning and demonstrate career development. Nursing and Midwifery Portfolios: evidence of continuing competence 2e has been thoroughly revised with a focus on e-Portfolios to provide tools to structure, reflect, plan, develop and communicate professional achievements for nurses and midwives. A new chapter on Reflection highlights the value of including reflection within portfolios as a critical element towards addressing learning needs

for individuals. Australian and New Zealand regulatory frameworks: By providing direct application to the local regulatory context, including applied examples, this book gives the reader the opportunity to understand the perspective of their local regulator - thus assisting them in producing a product that addresses the needs of the regulator. A range of portfolio approaches: Through understanding a range of portfolio approaches, the reader

can gauge which approach best meets their needs. Examination of the nature and role of evidence: This assists the reader to understand the need for a range of evidence and how the different types of evidence contribute specific aspects necessary to substantiate the broader argument of competence. Through the use of quality evidence, the reader can compile a more compact but effective portfolio. Performance and career planning: The direct link

made in this book between portfolios, performance and career planning means that the value of this book extends beyond being a tool for undergraduate and postgraduate students. Rather this text is designed to assist a range of clinicians and managers, in assisting them either plan their own careers, or influence others in developing careers inline with the future needs of their organisation. Primary market: Undergraduate Nursing and Midwifery

students Secondary markets: Practicing Registered Nurses and Midwives. Also applicable to other health science students undertaking courses leading to regulated health professions. Management of Nursing Services and Education - E-Book Routledge Providing quality content on management and education in the current health care settings, this book is particularly useful for the students of B.Sc. nursing (4th year), where the nurses have to

manage patients and simultaneously provide nursing services in an effective manner. This text provides comprehensive coverage of all the important processes and techniques that are important for training and development of nurses as good administrators. Strictly as per the INC syllabus Comprehensive and exhaustive coverage yet concise and well structured Dual treatment of concepts: theoretical and applied Lucid style with easy language for

ease of comprehension
 Student-friendly style of presentation: short sentences, bulleted lists, and ample number of tables, figures and charts
 End-of-chapter questions including multiple-choice questions, especially included keeping in view the examination perspective
 New to the Second Edition
 New concepts/techniques of management added in several chapters
 Updated information added in a number of chapters
 Outdated content has been replaced with new

up-to-date information
 An altogether new look and feel provided to the book
Administration Jaypee Brothers Medical Publishers
 This work ushers in a change in the approach of books on hospital administration. To make the text interesting authors have used the case based learning approach. Apart from this many new topics have been introduced in this book which had not been addressed so far in the available books. For example:- due importance

has been given to the role of engineering department in ensuring provision of good quality of medical care by the hospitals. New concepts in hospital administration like information therapy, use of information and communication technology, health promoting hospital approach, impact of globalization on hospital care etc. have also introduced through this book. USP of the book is giving due importance to the feedback from experienced hospital

administrators across public and private hospitals of country. This book will surely be of use to medical superintendents and hospital administrators in government and private hospitals in India and other countries. Students as well as teachers of various courses namely, regular and distant learning courses of MBA in Health Care/Hospital Administration, Diploma of masters in Hospital Administrator, MD in hospital administrator , MD in community

medicine, Diploma/masters in laws, master's in public health will also find this book of immense value. This book will also be helpful for civil surgeons and senior medical officers of state health services. The book comprehensively consolidates a lot of practical aspects by incorporating plenty of illustrations, photographs, case studies, real life situations etc. which will help the readers to get a realistic practical experience. Salient Features New concepts in

hospital administration like use of information and communication technology, health promoting hospital approach, impact of globalization on hospital care, role of engineering department and information therapy, etc. have been introduced Case Studies presented in the chapters are useful for case based learning approach Comprehensively consolidates a lot of practical aspects by incorporating plenty of Flowcharts, Figures and

Tables help the readers to get a realistic practical experience
